## Contents

Foreword .....	7
Introduction .....	7
1 Scope .....	9
2 Normative references .....	9
3 Definition, abbreviations and symbols .....	9
3.1 Definitions .....	9
3.2 Abbreviations .....	10
3.3 Symbols .....	10
4 General .....	10
4.1 Presentation of equipment for testing purposes .....	10
4.2 Mechanical and electrical design .....	10
4.2.1 General .....	10
4.2.2 Controls .....	11
4.2.3 Marking .....	11
4.3 Interpretation of the measurement results .....	11
5 Technical characteristics .....	11
5.1 Common characteristics .....	11
5.1.1 Frequency band .....	11
5.1.2 Carrier frequencies and channel numbers .....	12
5.1.3 Channel separation .....	12
5.1.4 Multi-channel equipment .....	13
5.1.5 Type of modulation .....	13
5.1.6 Push-to-talk (ptt) and voice activated switch .....	13
5.1.7 Controls .....	13
5.1.8 Combination with other equipment .....	13
5.2 Transmitter parameter limits .....	13
5.2.1 Frequency error .....	13
5.2.2 Power .....	13
5.2.3 Frequency deviation .....	13
5.2.4 Unwanted amplitude modulation .....	14
5.2.5 Adjacent channel power .....	14
5.2.6 Spurious emissions of the transmitter .....	14
5.2.7 Transient frequency behaviour of the transmitter .....	15
5.2.8 Synthesisers and Phase Locked Loop (PLL) systems .....	15
5.3 Receiver parameter limits .....	16
5.3.1 Maximum usable sensitivity .....	16
5.3.2 Adjacent channel selectivity .....	16
5.3.3 Intermodulation response rejection .....	16
5.3.4 Spurious radiations .....	16
6 Test conditions, power sources and ambient temperatures .....	17
6.1 Normal and extreme test conditions .....	17
6.2 Test power source .....	17
6.3 Normal test conditions .....	17
6.3.1 Normal temperature and humidity .....	17
6.3.2 Normal test power source .....	17
6.3.2.1 Mains voltage and frequency .....	17
6.3.2.2 Regulated lead-acid battery power sources on vehicles .....	17
6.3.2.3 Other power sources .....	17
6.4 Extreme test conditions .....	18
6.4.1 Extreme temperatures .....	18

6.4.2	Extreme test source voltages .....	18
6.4.2.1	Mains voltage .....	18
6.4.2.2	Regulated lead-acid battery power sources on vehicles .....	18
6.4.2.3	Power sources using other types of battery .....	18
6.4.2.4	Other power sources .....	18
6.5	Procedure for tests at extreme temperatures .....	18
6.5.1	Test procedure .....	18
7	General conditions .....	19
7.1	Arrangements for test signals applied to the receiver input .....	19
7.2	Receiver mute or squelch facility .....	19
7.3	Receiver rated audio output power .....	19
7.4	Normal test modulation .....	19
7.5	Artificial antenna .....	19
7.6	Test fixture .....	19
7.7	Arrangement for test signals at the input of the transmitter .....	20
7.8	Test site and general arrangements for radiated measurements .....	20
8	Method of measurement for transmitter parameters .....	20
8.1	Frequency error .....	20
8.1.1	Definition .....	20
8.1.2	Method of measurement .....	20
8.2	Transmitter carrier power .....	20
8.2.1	Definition .....	20
8.2.2	Method of measurement (for equipment other than equipment with integral antenna only) .....	20
8.2.3	Method of measurement for equipment with integral antenna .....	20
8.3	Maximum frequency deviation .....	21
8.3.1	Maximum permissible frequency deviation .....	21
8.3.1.1	Definition .....	21
8.3.1.2	Method of measurement .....	21
8.4	Unwanted amplitude modulation .....	21
8.4.1	Method of measurement .....	21
8.5	Adjacent channel power .....	22
8.5.1	Definition .....	22
8.5.2	Method of measurement .....	22
8.6	Spurious emissions .....	22
8.6.1	Definition .....	22
8.6.2	Method of measuring the power level in a specified load, subclause 8.6.1 (a) .....	22
8.6.3	Method of measuring the effective radiated power, subclause 8.6.1 (b) .....	23
8.6.4	Method of measuring the effective radiated power, subclause 8.6.1 (c) .....	24
8.7	Transient frequency behaviour of the transmitter .....	24
8.7.1	Definitions .....	24
8.7.2	Method of measurement .....	24
9	Methods of measurement for receiver parameters .....	27
9.1	Maximum usable sensitivity .....	27
9.1.1	Definition .....	27
9.1.2	Method of measuring the SND/ND ratio .....	27
9.2	Adjacent channel selectivity .....	27
9.2.1	Definition .....	27
9.2.2	Method of measurement .....	27
9.3	Intermodulation response rejection .....	28
9.3.1	Definition .....	28
9.3.2	Method of measurement .....	28
9.4	Spurious radiations .....	28
9.4.1	Definition .....	28
9.4.2	Method of measuring the power level in a specified load, subclause 9.4.1 (a) .....	29
9.4.3	Method of measuring the effective radiated power, subclause 9.4.1 (b) .....	29
9.4.4	Method of measuring the effective radiated power, subclause 9.4.1 (c) .....	29

10	Measurement uncertainty.....	30
Annex A:	Radiated measurement.....	31
A.1	Test sites and general arrangements for measurements involving the use of radiated fields .....	31
A.1.1	Outdoor test site.....	31
A.1.1.2	Test site for handportable stations .....	31
A.1.2	Test antenna.....	32
A.1.3	Substitution antenna .....	32
A.1.4	Optional additional indoor site.....	32
A.2	Guidance on the use of radiation test sites .....	33
A.2.1	Measuring distance .....	33
A.2.2	Test antenna .....	33
A.2.3	Substitution antenna .....	34
A.2.4	Artificial antenna .....	34
A.2.5	Auxiliary cables .....	34
A.3	Further optional alternative indoor test site using an anechoic chamber .....	34
A.3.1	Example of the construction of a shielded anechoic chamber .....	34
A.3.2	Influence of parasitic reflections in anechoic chambers .....	35
A.3.3	Calibration of the shielded anechoic chamber .....	35
Annex B:	Specification for adjacent channel power measurement arrangements.....	37
B.1	Power measuring receiver specification.....	37
B.1.1	IF filter .....	37
B.1.2	Variable attenuator.....	38
B.1.3	Rms value indicator .....	38
B.1.4	Oscillator and amplifier .....	38
History.....		39
