**Plastics - Verification of pendulum impact-testing machines -
Charpy, Izod and tensile impact-testing (ISO 13802:2015)**

Plastiques - Vérification des machines d'essai de choc pendulaire - Essais de choc Charpy, Izod et de choc-traction (ISO 13802:2015)

Kunststoffe - Verifizierung von Pendelschlagwerken - Charpy-, Izod- und Schlagzugversuch (ISO 13802:2015)

This European Standard was approved by CEN on 16 April 2015.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword

This document (EN ISO 13802:2015) has been prepared by Technical Committee ISO/TC 61 "Plastics" in collaboration with Technical Committee CEN/TC 249 "Plastics" the secretariat of which is held by NBN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2015, and conflicting national standards shall be withdrawn at the latest by December 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN ISO 13802:2006.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 13802:2015 has been approved by CEN as EN ISO 13802:2015 without any modification.

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Measurement instruments	4
5 Description of a pendulum impact-testing machine	4
5.1 Types of pendulum impact-testing machines	4
5.2 Testing machine components	4
5.2.1 Machine frame — The base of the machine and the structure supporting the pendulum	4
5.2.2 Pendulum	4
5.2.3 Test specimen anvils, supports, clamps and/or holders	5
5.2.4 Indicating equipment for absorbed energy (e.g. scale and friction pointer or electronic readout device)	5
6 Procedure for verification and inspection of a pendulum impact-testing machine	5
6.1 Certification of machine design and manufacturer	5
6.2 Field verification of the machine frame shall consist of determining the following items (see Table 4)	6
6.2.1 Installation	6
6.2.2 Levelness	6
6.2.3 Axial play of the pendulum bearings	6
6.2.4 Radial play of the pendulum bearings	6
6.2.5 Mechanism for holding and releasing the pendulum	6
6.2.6 Free hanging position	6
6.2.7 Contact between specimen and striking edge (Izod/Charpy)	6
6.2.8 Potential energy, E	7
6.2.9 Pendulum length, L_p	8
6.2.10 Impact length, L_i	9
6.2.11 Velocity of the pendulum at instant of impact, v_i	9
6.3 Charpy testing machines	10
6.4 Izod testing machines	11
6.4.1 Line of contact of the striker	11
6.4.4 Location of specimen and striker	12
6.4.5 Vice faces	12
6.5 Tensile impact testing machines (see ISO 8256)	12
6.5.1 Specimen clamps for tensile impact test machines	12
6.5.2 Clamps for tensile impact testing	13
6.5.3 Alignment	13
6.5.4 Mass of crosshead	13
6.6 Energy indicating system	13
6.6.1 Types of scale	13
6.6.2 Verification of analogue indicating equipment shall consist of the following examinations	13
6.6.3 Error in the indicated absorbed energy, W_i , on analogue indicating systems	14
6.6.4 Verification of digital indicating equipment shall ensure that the following requirements are met	14
6.7 Losses due to friction	15
6.7.1 Types of loss	15
6.7.2 Determination of the loss due to friction in the pointer	15
6.7.3 Determination of losses due to air resistance and friction in the pendulum bearings	15
6.7.4 Calculation of the total energy lost due to friction	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 61, *Plastics*, Subcommittee SC 2, *Mechanical properties*.

This second edition cancels and replaces the first edition (ISO 13802:1999), which has been technically revised. It also incorporates the Technical Corrigendum ISO 13802:1999/Cor.1:2000.
