iTeh STANDARD PREVIEW
 This amendment A1 modifies the European Standard EN ISO 140-3:1995; it was approved by CEN on 8 August 2004.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for inclusion of this amendment into the relevant national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This amendment exists in three official versions (<http://www.iteh.ai/standards/itc/140-3-1995/A1/2004>) ([A298802/2004/ITEH/140-3-1995/A1/2004](http://www.iteh.ai/standards/itc/140-3-1995/A1/2004)). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

EN ISO 140-3:1995/A1:2004 (E)**Foreword**

This document (EN ISO 140-3:1995/A1:2004) has been prepared by Technical Committee CEN/TC 126 "Acoustic properties of building elements and of buildings", the secretariat of which is held by AFNOR, in collaboration with Technical Committee ISO/TC 43 "Acoustics".

This Amendment to the European Standard EN ISO 140-3:1995 shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2005, and conflicting national standards shall be withdrawn at the latest by June 2005.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Introduction

Evaluation of the results of a European Inter Laboratory Test in 1998 showed that the requirements given in ISO 140-1 are inadequate for lightweight twin partitions therefore the following annex is added.

iTeh STANDARD PREVIEW (standards.iteh.ai)

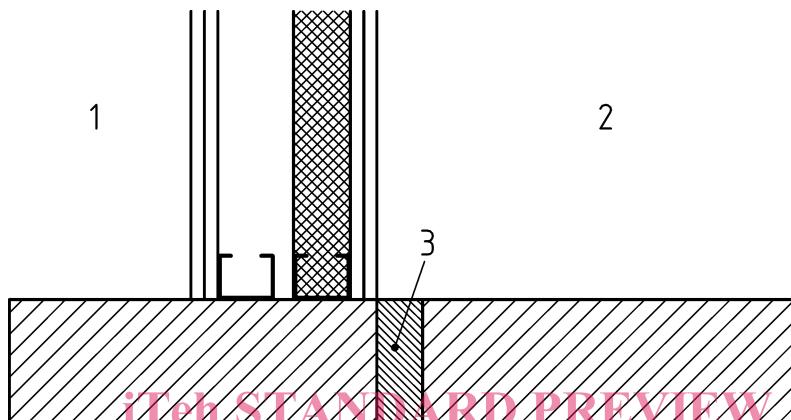

[SIST EN ISO 140-3:1997/A1:2005](#)

Annex H (normative)

Installation guidelines for lightweight twin leaf partitions

The sound reduction index of lightweight twin leaf partitions is influenced by the mounting conditions in the test opening of the laboratory. The important installation parameters are the aperture (niche effect) depth and the position of the partition in relation to the acoustic break in the test aperture.

Key

- 1 source room
 - 2 receiving room
 - 3 acoustic break of the laboratory
- [SIST EN ISO 140-3:1997/A1:2005](#)

Figure H.1 — Example for the position of the specimen relative to the acoustic break of the laboratory

To improve the reproducibility between laboratories and to facilitate comparison of sound reduction indices from different lightweight double wall products, the light weight twin leaf partition shall not be mounted across the acoustical break of the laboratory (Figure H.1). The aperture depth should meet the requirement in 5.2.1, as far as practical.

Other mounting conditions may be used but shall be fully described in the test report.

NOTE Mounting the lightweight partition with one leaf on one side and the other leaf on the other side of the acoustic break may result in higher values for the sound reduction index.

Other mounting conditions may be appropriate for some twin leaf partitions e.g. in semidetached houses where the leaves may be vibrationally decoupled. In such cases the leaves should be mounted on either side of the acoustic break.
