Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 2575:2004 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 13, *Ergonomics applicable to road vehicles*.

Road vehicles — Symbols for controls, indicators and tell-tales

AMENDMENT 1

Annex B

Add the following symbols to those of Annex B, in sequence according to symbol number.

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
B.03		Brake system 1st circuit	Application of ISO 7000-1405
B.04		Brake system 2nd circuit	Application of ISO 7000-1406
B.18		Anti-lock braking system (ABS) off or not available Alternatively "off" or "not available" may be indicated by the use of base symbol B.05 as an amber or yellow tell-tale.	Application of ISO 7000-2623

ISO 2575:2004/Amd.1:2005(E)

Annex D

Add the following symbol to those of Annex D, in sequence according to symbol number.

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
D.17		Roof ventilation, passenger car	Application of ISO 7000-2612

Annex F

Add the following symbol to those of Annex F, in sequence according to symbol number.

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
F.22		Engine emission system failure Alternatively "failure" or "malfunction" may be indicated by the use of the base symbol with an appropriate colour code; i.e. red or amber/yellow.	ISO 7000-2596
