Rubber hoses and hose assemblies for use in oil burners — Specification

Tuyaux et flexibles en caoutchouc pour brûleurs — Spécifications

RECIPIENTS OF THIS DRAFT ARE INVITED TO SUBMIT, WITH THEIR COMMENTS, NOTIFICATION OF ANY RELEVANT PATENT RIGHTS OF WHICH THEY ARE AWARE AND TO PROVIDE SUPPORTING DOCUMENTATION.

IN ADDITION TO THEIR EVALUATION AS BEING ACCEPTABLE FOR INDUSTRIAL, TECHNOLOGICAL, COMMERCIAL AND USER PURPOSES, DRAFT INTERNATIONAL STANDARDS MAY ON OCCASION HAVE TO BE CONSIDERED IN THE LIGHT OF THEIR POTENTIAL TO BECOME STANDARDS TO WHICH REFERENCE MAY BE MADE IN NATIONAL REGULATIONS.

Please see the administrative notes on page iii

ISO/CEN PARALLEL PROCESSING

This final draft has been developed within the International Organization for Standardization (ISO), and processed under the **ISO-lead** mode of collaboration as defined in the Vienna Agreement. The final draft was established on the basis of comments received during a parallel enquiry on the draft.

This final draft is hereby submitted to the ISO member bodies and to the CEN member bodies for a parallel two-month approval vote in ISO and formal vote in CEN.

Positive votes shall not be accompanied by comments.

Negative votes shall be accompanied by the relevant technical reasons.

Contents		Page
Foreword		v
1 Scope		1
2 Normative references		1
3 Construction		1
4 Dimensions and tolerances		2
4.1 Inside diameter		2
4.2 Bend radii		2
4.3 Thickness of lining and cover		2
5 Physical requirements for lining and cover		2
6 Physical requirements for hoses and hose assemblies		3
6.1 Hydrostatic tests		3
6.2 Oil swell		3
6.3 External pressure test		3
6.4 Low-temperature flexibility		4
6.5 Flammability		4
6.6 Ozone resistance (cover only)		4
6.7 Impulse test		4
7 Frequency of testing		4
8 Type tests		4
9 Marking		4
Annex A (normative) Test frequency		5
Annex B (informative) Production tests		6
Annex C (normative) Determination of oil swell		7
Annex D (normative) Determination of resistance to external pressure		8
Annex E (normative) Determination of flammability		9
Annex F (normative) Pressure impulse test		11
Bibliography		12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Hoses (rubber and plastics)*.

This third edition cancels and replaces the second edition (ISO 6806:1992), which has been revised as specified below.

The following changes (mainly editorial) were made as required to bring the standard up to date.

- Clause 2 (Normative references) has been updated where necessary. Reference to ISO 4672 has been replaced by ISO 10619-2 and the new titles of ISO 1307, ISO 1436 and ISO 4671 have been quoted.
- Wherever necessary the terminology has been amended to conform to ISO 8330.
- New [Clause 7](#) (Frequency of testing) and [Clause 8](#) (Type tests) have been introduced; new [Annexes A](#) and [B](#) ([Tables A.1](#) and [B.1](#)) have been introduced to standardize the frequency of the tests already required in the previous edition (ISO 6806:1992).
- Clause 9 (Marking) has been amended (maximum working pressure and date of publication of this International Standard to be marked on hose).
- No technical changes from requirements already specified in the second edition (ISO 6806:1992) have been made.
