## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 23480 was prepared by Technical Committee ISO/TC 29, Small tools, Subcommittee SC 8, Tools for pressing and moulding.

## Tools for pressing — Sliding plates

## 1 Scope

This International Standard specifies the main dimensions and tolerances of sliding plates, to be used in press tools (an application example is shown in Figure 1).

It also specifies the designation of sliding plates.

Key <u>ISO 23480:2008</u>

- 1 sliding plates, type https://standards.iteh.ai/catalog/standards/sist/9ef87606-eb17-4108-8a97-a158232b1511/iso-23480-2008
- 2 sliding plates, type B

Figure 1 — Application example of sliding plates

## 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 2768-1, General tolerances — Part 1: Tolerances for linear and angular dimensions without individual tolerance indications

ISO 4762, Hexagon socket head cap screws

ISO 13715, Technical drawings — Edges of undefined shape — Vocabulary and indications

### 3 Dimensions

## 3.1 Type A, one-face sliding plates

The dimensions of one-face sliding plates, type A, shall conform to the indications in Figure 2 and Table 1.

All edges of undefined shape shall be in accordance with ISO 13715.

General tolerance: ISO 2768m dimensions in millimetres surface roughness values in micrometers

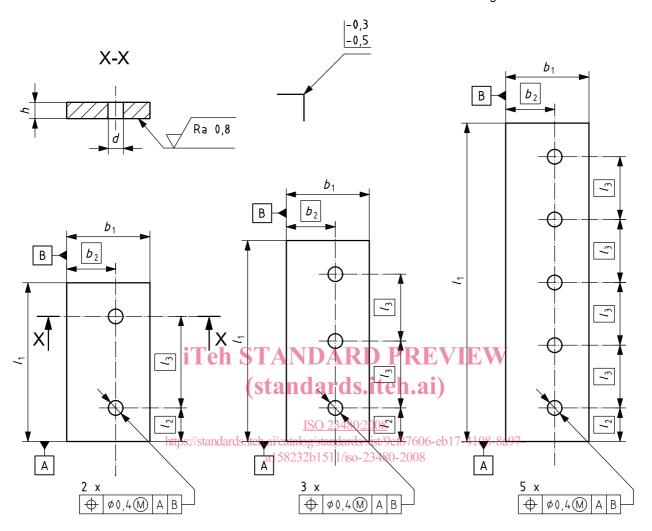

Figure 2 — Type A, one-face sliding plates

Table 1 — Dimensions of one-face sliding plates, type A

## 3.2 Type B, two-face sliding plates

The dimensions of two-face sliding plates, type B, shall conform to the indications in Figure 3 and Table 2.

All edges of undefined shape shall be in accordance with ISO 13715.

General tolerance: ISO 2768m dimensions in millimetres surface roughness values in micrometers

## Material

The choice of material is left to the manufacturer's discretion. R R V IR W

Steel for type A sliding plate and bronze with embedded solid lubricant for type B sliding plate. **EXAMPLE** 

## **Designation** https://standards.iteh.ai/catalog/standards/sist/9ef87606-eb17-4108-8a97-

58232b1511/iso-23480-2008

Sliding plates in accordance with this International Standard shall be designated by:

- "Sliding plate"; a)
- reference to this International Standard, i.e. ISO 23480; b)
- the type A, or B; c)
- the width,  $b_1$ , in millimetres;
- the height, h, in millimetres; e)
- the length,  $l_1$ , in millimetres.

EXAMPLE 1 A sliding plate of type A with width  $b_1 = 100$  mm, height h = 25 mm and the length of  $l_1 = 250$  mm is designated as follows:

Sliding plate ISO 23480 — A  $100 \times 25 \times 250$ 

A sliding plate of type B with width  $b_1$  = 60 mm, height h = 30 mm and the length of  $l_1$  = 125 mm is EXAMPLE 2 designated as follows:

Sliding plate ISO 23480 — B  $60 \times 30 \times 125$
