In this standard: the following print types are used:

- requirements, compliance with which can be tested and definitions: in roman type;
- explanations, advice, introductions, general statements, exceptions and references: in smaller type;
- *test specifications: in italic type;*
- TERMS DEFINED IN CLAUSE 2 OF THE GENERAL STANDARD OR THIS PARTICULAR STANDARD: SMALL CAPITALS.

The requirements are followed by specifications for the relevant tests.

Following the decision taken by Sub-Committee 62D at the meeting in Washington in 1979, a rationale for the more important requirements is given in Appendix AA.

It is considered that a knowledge of the reasons for these requirements will not only facilitate the proper application of the Standard but will, in due course expedite any revision necessitated by changes in clinical practices or as a result of developments in technology. However this appendix does not form part of the requirements of this Standard.
