Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO/IEC 14496-3:2005 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

Information technology — Coding of audio-visual objects —

Part 3: Audio

AMENDMENT 1: Low delay AAC profile

In subclause 1.5.2.1 (Profiles), add:

X. The **Low Delay AAC Profile** contains the audio object type 23 (ER AAC LD).

where X shall be adjusted to be the increment of the highest available number.

In Table 1.3 (Audio Profiles Definition), add a column with the term “Low Delay AAC Profile” in the first column, and an “X” in the column with the Object Type ID 23.

In subclause 1.5.2.3 (Levels within the profiles), add:

The following level is specified: [45d662ed5f28/iso-iec-14496-3-2005-amd-1-2007](https://standards.iteh.ai/catalog/standards/sist/49146c71-07ae-400c-8347-45d662ed5f28/iso-iec-14496-3-2005-amd-1-2007)

Table 1.11.A — Level for the Low Delay AAC Profile

Level	Max. channels/object	Max. sampling rate [kHz]	epConfig
1	2	48	0

LTP is not permitted. Pulse data is not permitted.

In subclause 1.5.2.4 (audioProfileLevelIndication), Table 1.12 (audioProfileLevelIndication values), replace:

0x34 – 0x7F	reserved for ISO use	-
-------------	----------------------	---

with:

0x34	Low Delay AAC Profile	L1
0x35 – 0x7F	reserved for ISO use	-
