

Designation: D4465 – 05

Standard Performance Specification for Zippers for Dungarees, Jeans and Work Trousers¹

This standard is issued under the fixed designation D4465; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This performance specification covers zippers to be used as fly closures in dungarees, jeans and work trousers made from heavy denim or other durable fabric, approximately 475 g/m² (14 oz/yd²).

1.2 Zippers covered by this specification may be satisfactory for lighter weight denim and other fabrics.

1.2.1 When lighter weight material is being used, consideration should be given to the zipper size and slider type because of their effect on the appearance of the zipper installation area.

1.3 The values stated in SI units are to be regarded as the standard. The values in parentheses are for information only.

3. Terminology

3.1 *Definitions*:

¹ This performance specification is under the jurisdiction of ASTM Committee D13 on Textiles and is the direct responsibility of Subcommittee D13.54 on Subassemblies. This performance specification was developed in cooperation with the Slide Fastener Association, Inc.

Current edition approved Sept. 1, 2005. Published October 2005. Originally approved in 1985. Last previous edition approved in 1997 as D4465 – 97. DOI: 10.1520/D4465-05.

² For referenced ASTM standards, visit the ASTM website, www.astm.org, or contact ASTM Customer Service at service@astm.org. For *Annual Book of ASTM Standards* volume information, refer to the standard's Document Summary page on the ASTM website.

³ Withdrawn. The last approved version of this historical standard is referenced on www.astm.org.

3.1.1 *denim, n*—a durable woven twill fabric, usually of all cotton or a blend of cotton and man-made fibers, made from a variety of yarn numbers, and in various fabric weights, colors, designs, and finishes.

3.1.1.1 *Discussion*—Traditionally, denim is made with indigo blue dyed cotton warp and undyed or tinted filling. Denim fabrics are used for many types of garments including work clothes, sportswear, dresswear, and home furnishings.

3.2 *Definitions of Terms Specific to This Standard*:

3.2.1 *jeans, n*—a style of trousers made of a twill fabric used as sportswear and work clothing.

3.2.2 *dungaree, n*—trousers made from denim and designed for general heavy work wear.

3.2.3 *trouser, n*—a garment that closes at the waist and covers the lower body to the crotch and each leg from the waist to the ankle.

3.3 For other textile terminology used in this specification, refer to Terminology D123. For definitions of zipper terms used in this specification, refer to Terminology D2050.

4. Specification Requirements

4.1 The properties of zippers for dungarees, jeans and work trousers shall conform to the specification requirements in Table 1.

5. Significance and Use

5.1 This specification serves as a guide for the purchase of zippers to be used for dungarees, jeans or work trousers.

5.2 Upon agreement between the purchaser and the supplier, zippers intended for this end-use should meet all of the requirements listed in Table 1 of this specification.

5.3 It is recognized that for purposes of fashion or aesthetics the ultimate consumer may find acceptable dungarees, jeans or work trousers, having zippers that do not conform to all of the requirements in Table 1. Therefore, one or more of the requirements listed in Table 1 may be modified by agreement between the purchaser and the supplier.

5.3.1 In such cases, and references to this specification shall specify that: This zipper meets Performance Specification D4465 except for the following characteristic(s).
