This European Standard was approved by CEN on 28 February 2003.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 13920-12:2003) has been prepared by Technical Committee CEN/TC 132, "Aluminium and aluminium alloys", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2003, and conflicting national standards shall be withdrawn at the latest by October 2003.

Within its programme of work, Technical Committee CEN/TC 132 has entrusted CEN/TC132/WG 20 "Scrap" to prepare the following standard.

EN 13920 Comprises the following parts under the general title "*Aluminium and aluminium alloys — Scrap*".

- *Part 1: General requirements, sampling and tests*
- *Part 2: Unalloyed aluminium scrap*
- *Part 3: Wire and cable scrap*
- *Part 4: Scrap consisting of one single wrought alloy*
- *Part 5: Scrap consisting of two or more wrought alloys of the same series*
- *Part 6: Scrap consisting of two or more wrought alloys*
- *Part 7: Scrap consisting of castings*
- *Part 8: Scrap consisting of non-ferrous materials from shredding processes destined to aluminium separation processes*
- *Part 9: Scrap from aluminium separation processes of non-ferrous shredded materials*
- *Part 10: Scrap consisting of used aluminium beverage cans*
- *Part 11: Scrap consisting of aluminium-copper radiators*
- *Part 12: Turnings consisting of one single alloy*
- *Part 13: Mixed turnings consisting of two or more alloys*
- *Part 14: Scrap from post-consumer aluminium packagings*
- *Part 15: Decoated aluminium scrap from post-consumer aluminium packagings*
- *Part 16: Scrap consisting of skimmings, drosses, spills and metallics*

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and the United Kingdom.

EN 13920-12:2003 (E)**1 Scope**

This European Standard specifies characteristics, chemical composition and metal yield of scrap which consists of aluminium turnings of one single wrought (EN 573-3) or cast (EN 1706) specified alloy.

EXAMPLE Scalpings, millings, borings from plates, extruded profiles, castings, etc.

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text, and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies (including amendments).

prEN 12258-3:2000, *Aluminium and aluminium alloys — Terms and definitions — Part 3: Scrap*.

EN 13920-1:2003, *Aluminium and aluminium alloys — Scrap — Part 1: General requirements, sampling and tests*.

3 Terms and definitions

For the purposes of this European Standard, the terms and definitions given in prEN 12258-3:2000 and EN 13920-1:2003 apply.

4 Ordering information

[SIST EN 13920-12:2004](https://standards.iteh.ai/catalog/standards/sist/3B63171-36c4-42d7-a29b-3ec263cdba50/sist-en-13920-12-2004)

[https://standards.iteh.ai/catalog/standards/sist/3B63171-36c4-42d7-a29b-](https://standards.iteh.ai/catalog/standards/sist/3B63171-36c4-42d7-a29b-3ec263cdba50/sist-en-13920-12-2004)

The ordering information shall include: [3ec263cdba50/sist-en-13920-12-2004](https://standards.iteh.ai/catalog/standards/sist/3B63171-36c4-42d7-a29b-3ec263cdba50/sist-en-13920-12-2004)

- the number of this European Standard (EN 13920-12);
- the scrap category (turnings consisting of one single alloy);
- the designation and/or the chemical composition of the alloy;
- the gross mass of the consignment;
- the definition of the beginning and end of the period during which the scrap shall be delivered;
- any characteristics deviating from those specified under 5.1, e.g. particle size, presence of foreign material.

The ordering information should include:

- information about the origin of the scrap;
- any information about size and surface condition of the particles, whenever meaningful.

5 Requirements

5.1 General

In addition to the requirements specified in EN 13920-1, the requirements given in 5.2, 5.3 and 5.4 shall be met.

If the scrap does not meet all these requirements, the supplier shall notify the deviating characteristics to the purchaser and shall obtain his agreement before shipment.

5.2 Characteristics

The scrap shall be unoxidized and the following tolerances apply to the delivered mass:

- 0,5 % (mass fraction) of magnetic iron;
- 5 % (mass fraction) of moisture and oil;
- 3% (mass fraction) of fines passing through a 20 mesh sieve (0,71 mm opening), after drying.

The scrap shall not contain any other foreign material.

5.3 Chemical composition

The turnings shall have the chemical composition of the alloy specified in the contract.

5.4 Metal yield

The metal yield of turnings, after drying and removal of free iron, as determined in accordance with EN 13920-1 shall be ≥ 90 %.

6 Classification procedure, treatment of non-conformities and arbitration

The classification procedure which includes sampling and tests, the treatment of non-conformities and arbitration shall be in accordance with EN 13920-1, as appropriate.
