FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 72 has reviewed ISO Recommendation R 367 and found it technically suitable for transformation. International Standard ISO 367 therefore replaces ISO Recommendation R 367-1967 to which it is technically identical.

ISO Recommendation R 367 was approved by the Member Bodies of the following countries :

Australia	Germany	Poland
Austria	Greece	Spain
Brazil	India	Switzerland
Bulgaria	Italy	Turkey
Chile	Japan	United Kingdom
Czechoslovakia	Netherlands	U.S.S.R.
France	New Zealand	

No Member Body expressed disapproval of the Recommendation.

The Member Bodies of the following countries disapproved the transformation of ISO/R 367 into an International Standard :

Belgium
France
Germany
United Kingdom

Textile machinery and accessories – Metal reeds with plate baulk – Dimensions

iTeh STANDARD PREVIEW
(standards.iteh.ai)

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies the dimensions of metal reeds with plate baulk for use in the textile industry.

ISO 367-1976
<https://standards.iteh.ai/catalog/standards/sist/3bb74690-2882-4b59-b857-6f89f0e93a26/iso-367-1976>

2 DIMENSIONS

- b = width of dents
- d = thickness of reed baulk
- h = overall depth

Dimensions in millimetres

Basic dimensions			Co-ordinated dimensions						
h	d	b	b	2,5	3	4			
90	4,5	2,5	d	4,5	5	5	5,5	6	6,5
100			h						
110	5	2,5	90	X					
120			100	X	X				
130	5,5	3	110	X	X	X			
140			120	X	X	X			
150	6	3	130	X	X	X			
160			140			X	X		
150	6,5	4	150		X	X			
160			160				X
