Intellectual Property Rights	14
Foreword.....	14
Modal verbs terminology.....	14
1 Scope	15
2 References	15
2.1 Normative references	15
2.2 Informative references.....	16
3 Definitions, symbols and abbreviations	16
3.1 Definitions.....	16
3.2 Symbols.....	20
3.3 Abbreviations	20
4 Overview	22
4.0 Overview introduction.....	22
4.1 Protocol architecture.....	23
4.1.0 Protocol architecture - Introduction	23
4.1.1 Air Interface Physical Layer (layer 1).....	24
4.1.2 Air Interface Data Link Layer (layer 2)	25
4.1.3 Air Interface Call Control Layer (layer 3)	25
4.2 Services and Facilities	26
4.3 Device Addresses	27
4.3.1 MS Addresses	27
4.3.2 Services and Gateway Addresses.....	27
4.4 Conventional/Trunked Systems.....	27
4.5 MS Location.....	27
4.6 Tier III Services.....	28
4.6.0 Tier III Services - Introduction	28
4.6.1 MS initiating calls.....	28
4.6.2 MS receiving calls	28
4.6.2.0 MS receiving calls - Introduction	28
4.6.2.1 MS receiving individual calls.....	29
4.6.2.1.0 MS receiving individual calls - Introduction	29
4.6.2.1.1 Off Air Call Set-Up (OACSU).....	29
4.6.2.1.2 Full Off Air Call Set-Up (FOACSU).....	29
4.6.2.2 MS receiving calls to talkgroups.....	29
4.6.2.3 MS receiving calls to All_MS.....	29
4.7 Physical Link Organization	29
4.7.0 Physical Link Organization - Introduction.....	29
4.7.1 Radio Frequency Allocation	29
4.7.2 Colour Code (CC).....	30
4.8 DMR TDMA burst and channel structure	30
4.9 TS Structure.....	31
4.9.0 Introduction to the TS Structure	31
4.9.1 An individual voice call example	31
4.9.1.1 Individual Call using OACSU.....	31
4.9.1.2 Individual Call using FOACSU	33
4.9.2 A talkgroup call example	34
4.10 Network architecture	35
4.10.0 Network architecture - Introduction.....	35
4.10.1 Network functions	35
4.10.1.0 Network functions - Introduction.....	35
4.10.1.1 Establishing service.....	35
4.10.1.2 Network Identifier.....	35
4.10.2 MS Location by Registration.....	35
4.11 Trunking methods.....	36
4.11.0 Trunking methods - Introduction	36

4.11.1	Message trunking.....	36
4.11.2	Transmission trunking	36
4.11.3	Quasi-Transmission trunking.....	36
5	Trunking Control Channel Formats	36
5.0	Trunking Control Channel Formats - Introduction.....	36
5.1	The use of the CACH.....	37
5.1.0	System Identity Code Structure	37
5.1.1	C_SYS_Parms and P_SYS Parms - System Identity Code Subset	37
5.1.2	C_SYS_Parms - Reg.....	37
5.1.3	C_SYS_Parms - Common_Slot_Counter	37
5.2	Tier III signalling.....	38
5.3	Modes of control channel	38
5.3.0	Control channel modes - Introduction	38
5.3.1	Dedicated TSCC	38
5.3.2	Non-Dedicated TSCC	39
5.3.3	Operation in shared spectrum	39
5.4	CSBK/MBC/UDT Block Structure	39
5.4.0	CSBK/MBC/UDT Block Structure - Introduction.....	39
5.4.1	CSBK/MBC/UDT PDUs on the TSCC outbound channel	39
5.4.2	CSBK/MBC/UDT PDUs on the TSCC inbound channel	41
5.4.3	CSBK/MBC PDUs on the Payload Channel Outbound channel	41
5.4.4	CSBK PDUs on the Payload Channel Inbound channel.....	42
6	Trunking Procedures	43
6.1	Basic Structure	43
6.1.1	Channel Structure	43
6.1.1.1	Fully Regulated Structure	43
6.1.1.2	Shared Channel Unregulated Structure	43
6.1.2	Physical Channel Addressing	43
6.1.3	Sub-Division of the MS population	44
6.2	Random Access Procedures	45
6.2.0	Random Access Procedures - Introduction	45
6.2.1	The Random Access Principle.....	45
6.2.1.0	Randon Access Principle - Introduction.....	45
6.2.1.1	Random Access Control.....	45
6.2.1.1.0	Random Access Control - Introduction	45
6.2.1.1.1	Sub dividing the MS population.....	46
6.2.1.1.2	Checking the Service-Function	46
6.2.1.1.3	Withdrawing slots from Random-Access	47
6.2.1.1.4	TSCC responses to Random Access attempts	48
6.2.1.1.5	Noting the response delay.....	48
6.2.1.1.6	Random Backoff.....	48
6.2.1.1.7	Retry decision and time-outs	50
6.2.1.1.8	Random Access (non-emergency) SDL for a MS as defined in clause 6.2.....	51
6.2.1.1.9	Random Access (emergency) SDL for a MS as defined in clause 6.2	54
6.2.1.2	Action after receiving an acknowledgement	56
6.2.1.3	MS Arriving on a Control Channel	57
6.3	Control Channel Acquisition and Retention.....	57
6.3.0	Control Channel Acquisition and Retention - Introduction	57
6.3.1	MS Parameter Volatility	58
6.3.2	Control Channel Acquisition Procedures.....	58
6.3.2.0	Control Channel Acquisition Procedures - Introduction	58
6.3.2.1	Entry into TSCC Acquisition Procedures	59
6.3.2.2	Identifying a Candidate Control Channel.....	59
6.3.2.2.0	Identifying a Candidate Control Channel - Introduction	59
6.3.2.2.1	Checking the System Identity Code	60
6.3.2.2.2	TSCC Authorization Procedure	62
6.3.2.2.3	Checking the SYS_AREA information element	63
6.3.2.3	Confirmation - Monitoring the TSCC outbound channel signal quality	64
6.3.2.4	Reading the Colour Code	64
6.3.3	MS Leaving a Control Channel	65

6.3.3.1	Reasons for Leaving a Control Channel when active but idle	65
6.3.3.2	Leaving a Control Channel Whilst Waiting for Signalling	65
6.4	Registration, Power Save, and Authentication Procedures.....	65
6.4.0	Registration, Power Save, and Auth Procedures - Introduction.....	65
6.4.1	Registration.....	66
6.4.1.1	Introduction.....	66
6.4.1.2	The Principle.....	67
6.4.2	MS Parameter Volatility	68
6.4.3	Action on confirmation of a TSCC.....	68
6.4.4	Registration Procedures	68
6.4.4.0	Registration Procedures - Introduction.....	68
6.4.4.1	Registration by Random Access	69
6.4.4.1.0	Registration by Random Access - Introduction.....	69
6.4.4.1.1	Intermediate Acknowledgement.....	70
6.4.4.1.2	Registration accepted.....	70
6.4.4.1.3	Registration Refused	70
6.4.4.1.4	Registration Denied.....	70
6.4.4.1.5	Challenge and Response Authentication	70
6.4.4.1.6	Registration Attempt Times Out.....	71
6.4.4.1.7	Registration Demand Received During Random Access Registration.....	71
6.4.4.1.8	No answer response Received after the maximum number of random access attempts.....	71
6.4.4.1.9	Registration Action on Switch-on or equivalent.....	71
6.4.4.1.10	Registration scenario MSC.....	72
6.4.4.1.11	Registration with MS authentication	73
6.4.4.1.12	Acceptance of user initiated service requests.....	74
6.4.4.1.13	Talkgroup Subscription and Talkgroup Attachment.....	74
6.4.5	Mass re-registration	77
6.4.5.0	Mass re-registration - Introduction.....	77
6.4.5.1	Procedure for MS on receipt of Mass Re-registration Broadcast.....	77
6.4.6	De-registration	78
6.4.7	Power Save	79
6.4.7.1	Overview.....	79
6.4.7.2	Power Save Procedures	79
6.4.7.2.1	Basic Power Save Procedures.....	79
6.4.8	Authentication Procedures.....	81
6.4.8.0	Authentication Procedures - Introduction	81
6.4.8.1	Key Management	81
6.4.8.2	Authentication Procedures for the TSCC to authenticate a MS	81
6.4.8.3	Authentication Procedures for the MS	82
6.4.9	MS Stun/Revive.....	82
6.4.9.0	MS Stun/Revive - Introduction	82
6.4.9.1	MS Stun/Revive without authentication.....	83
6.4.9.1.0	MS Stun/Revive without authentication - Introduction	83
6.4.9.1.1	Stun / Revive procedures for the TSCC	83
6.4.9.1.2	Stun / Revive procedures for the MS.....	83
6.4.9.2	MS Stun/Revive with authentication.....	84
6.4.9.2.0	MS Stun/Revive with authentication - Introduction	84
6.4.9.2.1	Stun / Revive procedures with authentication for the TSCC	84
6.4.9.2.2	Stun / Revive procedures with authentication for the MS	85
6.4.10	MS Kill	85
6.4.10.0	MS Kill - Introduction.....	85
6.4.10.1	Kill procedures with authentication for the TSCC.....	86
6.4.10.2	Kill procedures with authentication for the MS	87
6.4.11	IP Connection Advice.....	88
6.4.11.0	IP Connection Advice - Introduction	88
6.4.11.1	IP Connection Advice procedures for the MS.....	88
6.4.11.1.0	IP Connection Advice procedures for the MS - Introduction	88
6.4.11.1.1	Registration Attempt Times Out.....	89
6.4.11.1.2	No answer response received after the maximum number of random access attempts	89
6.4.11.1.3	MS response to C_AHOY inviting the MS to send an IP address.....	89
6.4.11.1.4	Final acknowledgment to IP connection advice received by the calling MS	89
6.4.11.2	IP Connection Advice procedures for the TSCC	89

6.4.12	Unsolicited MS Radio Check.....	90
6.4.13	Supplementary_User Data Service	91
6.4.13.0	Supplementary_User Data Service - Introduction.....	91
6.4.13.1	Supplementary data Inbound Phase	91
6.4.13.2	Supplementary Data Outbound Phase.....	92
6.4.14	MS Power Control and PTT De-key.....	94
6.4.14.0	MS Power Control and PTT De-key - Introduction	94
6.4.14.1	Reverse Channel	95
6.4.14.2	Procedures for Power Control.....	95
6.4.14.3	Procedures for PTT De-key.....	95
6.4.15	Transmit Interrupt.....	95
6.4.15.1	TSCC Initiated Interrupt	95
6.4.15.2	Payload Interrupt.....	96
6.4.15.2.0	Payload Interrupt - Introduction	96
6.4.15.2.1	TSCC and TS Procedures for the Transmit Interrupt	97
6.4.15.2.2	MS Procedures for the Interrupting MS	97
6.4.15.2.3	MS Procedures for the MS being interrupted	97
6.5	Unified Data Transport Mechanism	98
6.5.0	Unified Data Transport Mechanism - Introduction.....	98
6.5.1	Format of the appended data.....	101
6.5.1.0	Format of the appended data - Introduction	101
6.5.1.1	UDT Block Structure	101
6.5.1.2	UDT Content for Services Carried on the Outbound channel.....	102
6.5.1.3	UDT Mechanism for the Inbound channel.....	103
6.6	Call procedures.....	104
6.6.0	Call procedures - Introduction	104
6.6.1	Procedures common to Voice calls and Packet Data Calls.....	106
6.6.1.1	MS Availability Checks	106
6.6.1.1.1	Availability of calling MS	106
6.6.1.1.2	Availability of called party as part of a call.....	106
6.6.1.1.3	General MS radio check	106
6.6.1.2	Call Cancellation.....	106
6.6.1.2.0	Call Cancellation - Introduction	106
6.6.1.2.1	Cancelling a OACSU Call.....	106
6.6.1.2.2	Cancelling a FOACSU Call.....	106
6.6.1.3	Acknowledgements sent to calling MS.....	107
6.6.1.4	Called Party Answering Mechanism.....	107
6.6.1.4.0	Called Party Answering Mechanism - Introduction	107
6.6.1.4.1	TSCC response to the Call Answer Random Access.....	108
6.6.1.4.2	Call Party Answer behaviour for the MS.....	109
6.6.1.5	Maintenance of call progress waiting timers.....	109
6.6.1.5.1	Call waiting timer for the calling MS	109
6.6.1.5.2	Call waiting timer for the called MS	109
6.6.1.6	Payload Channel Assignment to a Payload Channel.....	111
6.6.1.6.1	Payload Channel Assignment	111
6.6.1.6.2	Timing requirements for the allocation of a Payload Channel and PDUs that may be sent	111
6.6.1.7	Calls to ALLMSID, ALLMSIDL and ALLMSIDZ.....	113
6.6.2	Voice Call Procedures	113
6.6.2.0	Voice Call Procedures - Introduction.....	113
6.6.2.1	Voice Call Procedures for the TSCC	114
6.6.2.1.0	Voice Call Procedures for the TSCC - Introduction.....	114
6.6.2.1.1	TSCC Response to single-part voice call set-up.....	114
6.6.2.1.2	TSCC Response to multi-part voice call set-up.....	115
6.6.2.1.3	Acknowledgements sent by the TSCC to the calling MS (voice).....	115
6.6.2.1.4	Voice Radio Check.....	116
6.6.2.1.5	Availability Check for Voice Calls connected through Gateways	116
6.6.2.2	Voice Call Procedures for MS	117
6.6.2.2.0	Voice Call Procedures for MS - Introduction.....	117
6.6.2.2.1	Initiating a single-part voice call service	117
6.6.2.2.2	Response to the single-part voice service request.....	118
6.6.2.2.3	Response to the multi-part voice service request.....	118
6.6.2.2.4	Acknowledgements received by the calling MS (voice)	118

6.6.2.2.5	Availability Check to the called party (voice)	119
6.6.2.2.6	Payload Channel Allocation	120
6.6.2.2.7	Calling MS in single part voice call setup SDL.....	120
6.6.2.2.8	Call set-up MSC that also transfers supplementary_user data.....	123
6.6.2.3	Procedures for the Voice Payload Channel.....	123
6.6.2.3.0	Procedures for the Voice Payload Channel - Introduction	123
6.6.2.3.1	TS Procedures for the Voice Payload Channel.....	124
6.6.2.3.2	MS Procedures for the Voice Payload Channel.....	128
6.6.3	Packet Data Call Procedures	129
6.6.3.0	Packet Data Call Procedures - Introduction	129
6.6.3.1	Packet Data Call Procedures for the TSCC.....	130
6.6.3.1.0	Packet Data Call Procedures for the TSCC - Introduction	130
6.6.3.1.1	TSCC Response to single-part packet data call set-up	130
6.6.3.1.2	TSCC Response to multi-part packet data call setup.....	131
6.6.3.1.3	Acknowledgements sent on the TSCC to the calling MS (packet).....	131
6.6.3.1.4	Radio Check for packet data.....	131
6.6.3.1.5	Availability Check for Packet Calls connected through Gateways	132
6.6.3.2	Packet Data Call Procedures for MS.....	132
6.6.3.2.0	Packet Data Call Procedures for MS - Introduction	132
6.6.3.2.1	Initiating a single-part packet data call service.....	133
6.6.3.2.2	Response to the single-part packet data service request	133
6.6.3.2.3	Response to the multi-part packet data service request	133
6.6.3.2.4	Acknowledgements received by the calling MS (packet data)	134
6.6.3.2.5	Availability Check to the called MS (packet data)	134
6.6.3.2.6	Payload Channel Allocation	134
6.6.3.3	Procedures for the Packet Data Payload Channel	135
6.6.3.3.0	Procedures for the Packet Data Payload Channel - Introduction.....	135
6.6.3.3.1	TS Procedures for the Packet Data Payload Channel	135
6.6.3.3.2	MS Procedures for the Packet Data Payload Channel.....	137
6.6.3.4	Application Data Over IP Bearer Service	139
6.6.3.4.0	Application Data Over IP Bearer Service - Introduction.....	139
6.6.3.4.1	Text Messaging	139
6.6.3.4.2	Location.....	139
6.6.4	Short Data Message Procedure	139
6.6.4.0	Short Data Message Procedure - Introduction.....	139
6.6.4.1	Short Data Procedures for the TSCC	141
6.6.4.1.0	Short Data Procedures for the TSCC - Introduction.....	141
6.6.4.1.1	TSCC Response to a call to an individual MS or talkgroup	141
6.6.4.1.2	TSCC Response to a call to an extended_address destination.....	142
6.6.4.1.3	Availability Check to the called MS (UDT short data)	143
6.6.4.1.4	Final acknowledgement to the calling party	143
6.6.4.2	Short Data Message procedures for MS.....	143
6.6.4.3	Initiating a Short Data Message service	144
6.6.4.4	Response to a random access UDT short data message call service	144
6.6.4.5	Acknowledgements received by the calling MS	145
6.6.4.6	Timeout waiting for further signalling	145
6.6.4.7	MS receiving a UDT short data message	145
6.6.4.8	Short Data Message procedure MSC	146
6.6.5	Short Data Polling Service.....	147
6.6.5.0	Short Data Polling Service - Introduction	147
6.6.5.1	Short Data Polling Procedures for the TSCC.....	148
6.6.5.1.0	Short Data Polling Procedures for the TSCC - Introduction	148
6.6.5.1.1	TSCC Response to a poll request from an MS	148
6.6.5.1.2	Availability Check to the called MS (UDT short data poll)	149
6.6.5.1.3	Delivery of the polled data to the calling party	149
6.6.5.1.4	Final acknowledgement by the calling party to the TSCC	149
6.6.5.1.5	Short Data Polling procedures from a TSCC gateway	149
6.6.5.2	Short Data Polling Message procedures for MS	149
6.6.5.3	Initiating a Short Data Polling service	150
6.6.5.4	Response to a random access UDT short data polling message.....	150
6.6.5.5	Final Acknowledgement transmitted by the calling MS	150
6.6.5.6	Timeout waiting for further signalling	150

6.6.5.7	MS receiving a C_AHOY poll for a short polling message	150
6.6.6	Status Call Service	151
6.6.6.0	Status Call Service - Introduction	151
6.6.6.1	Status Service Delivery Procedure	151
6.6.6.1.0	Status Service Delivery Procedure - Introduction	151
6.6.6.1.1	Status Service Delivery Procedures for the TSCC	152
6.6.6.1.2	Status Service Delivery Procedures for MS	154
6.6.6.2	Status Polling Service Procedure	156
6.6.6.2.0	Status Polling Service Procedure - Introduction	156
6.6.6.2.1	Status Service Polling Procedures for the TSCC	157
6.6.6.2.2	Status Polling Service Procedures for MS	158
6.6.6.3	Defined Status Values for Status Call Service	160
6.6.6.3.1	Emergency Alarm	160
6.6.7	Call Diversion	160
6.6.7.1	Call Diversion Service	160
6.6.7.1.0	Call Diversion Service - Introduction	160
6.6.7.1.1	TSCC Procedures for the Call Diversion Service	161
6.6.7.1.2	MS Procedures for the Call Diversion Service	163
6.6.7.2	Diverting Calls	165
6.6.8	Dynamic Group Numbering Assignment Service	167
6.6.8.0	Dynamic Group Numbering Assignment Service - Introduction	167
6.6.8.1	Rules for the allocation of Dynamic Group Addresses	168
6.6.8.1.0	Allocation Rules - Introduction	168
6.6.8.1.1	DGNA_Address Mode	168
6.6.8.1.2	DGNA_Alias Mode	169
6.6.8.2	Dynamic Regroup Assignment Procedures for the TSCC	170
6.6.8.2.0	Dynamic Regroup Assignment Procedures for the TSCC - Introduction	170
6.6.8.2.1	TSCC Response to a call to an individual MS or talkgroup	170
6.6.8.2.2	UDT Outbound phase	170
6.6.8.2.3	Final acknowledgement to the calling party	171
6.6.8.3	Dynamic Regroup Assignment procedures for MS	171
6.6.8.3.0	DGNA Procedures for MS - Introduction	171
6.6.8.3.1	Initiating a Dynamic Group Numbering service	172
6.6.8.3.2	Response to a random access UDT Dynamic Group Numbering service	172
6.6.8.3.3	MS Response to the TSCC AHOY for the UDT Inbound	172
6.6.8.3.4	Acknowledgements received by the calling MS	173
6.6.8.3.5	Timeout waiting for further signalling	174
6.6.8.3.6	MS receiving a UDT Dynamic Group Numbering PDU	174
6.6.9	Full-Duplex MS to MS Voice Call Procedures	174
6.6.9.0	Full-Duplex MS to MS Voice Call Procedures - Introduction	174
6.6.9.1	Full-Duplex MS to MS Voice Call Procedures for the TSCC	174
6.6.9.1.0	Full-Duplex MS to MS Voice Call Procedures for the TSCC - Introduction	174
6.6.9.1.1	TSCC Response to single-part voice call set-up	174
6.6.9.1.2	TSCC Response to multi-part voice call set-up	175
6.6.9.1.3	Acknowledgements sent by the TSCC to the calling MS (voice)	175
6.6.9.1.4	Voice Radio Check	175
6.6.9.2	Full-Duplex MS to MS Voice Call Procedures for MS	175
6.6.9.2.0	Full-Duplex MS to MS Voice Call Procedures for MS - Introduction	175
6.6.9.2.1	Initiating a single-part voice call service	176
6.6.9.2.2	Response to the single-part voice service request	176
6.6.9.2.3	Response to the multi-part voice service request	176
6.6.9.2.4	Acknowledgements received by the calling MS (voice)	177
6.6.9.2.5	Availability Check to the called party (voice)	177
6.6.9.2.6	Payload Channel Allocation	178
6.6.9.2.7	Calling MS in single part voice call setup SDL	178
6.6.9.2.8	Call set-up MSC that also transfers supplementary_user data	178
6.6.9.3	Timing requirements for the allocation of a Payload Channel	178
6.6.9.4	Procedures for the Voice Payload Channel	178
6.6.9.4.0	Procedures for the Voice Payload Channel - Introduction	178
6.6.9.4.1	TS Procedures for the Voice Payload Channel	178
6.6.9.4.2	MS Procedures for the Voice Payload Channel	179
6.6.10	Full-Duplex MS to MS Packet Data Call Procedures	179

6.6.10.0	Full-Duplex MS to MS Packet Data Call Procedures - Introduction	179
6.6.10.1	Full-Duplex MS to MS Packet Data Call Procedures for the TSCC	179
6.6.10.1.0	Full-Duplex MS to MS Packet Data Call Procedures for the TSCC - Introduction	179
6.6.10.1.1	TSCC Response to single-part packet call set-up	179
6.6.10.1.2	TSCC Response to multi-part packet call setup	179
6.6.10.1.3	Acknowledgements sent on the TSCC to the calling MS (packet)	179
6.6.10.1.4	Radio Check for packet data	179
6.6.10.2	Full-Duplex MS to MS Packet Data Call Procedures for MS	180
6.6.10.2.0	Full-Duplex MS to MS Packet Data Call Procedures for MS - Introduction	180
6.6.10.2.1	Initiating a single-part packet data call service	180
6.6.10.2.2	Response to the single-part packet service request	181
6.6.10.2.3	Response to the multi-part packet data service request	181
6.6.10.2.4	Acknowledgements received by the calling MS (packet data)	181
6.6.10.2.5	Availability Check to the called MS (packet data)	181
6.6.10.2.6	Payload Channel Allocation	182
6.6.10.3	Procedures for the Packet Data Payload Channel	182
6.6.10.3.0	Procedures for the Packet Data Payload Channel - Introduction	182
6.6.10.3.1	TS Procedures for the Packet Data Payload Channel	182
6.6.10.3.2	MS Procedures for the Packet Data Payload Channel	182
6.6.11	Full-Duplex MS to MS Packet Data Call Procedures	182
6.6.11.0	Full-Duplex MS to MS Packet Data Call Procedures - Introduction	182
6.4.11.1	Full-Duplex MS to MS Packet Data Call Procedures for the TSCC	183
6.4.11.1.0	Full-Duplex MS to MS Packet Data Call Procedures for the TSCC - Introduction	183
6.6.11.1.1	TSCC Response to single-part packet call set-up	183
6.6.11.1.2	TSCC Response to multi-part packet call setup	183
6.6.11.1.3	Acknowledgements sent on the TSCC to the calling MS (packet)	183
6.6.11.1.4	Radio Check for packet data	183
6.6.11.2	Full-Duplex MS to MS Packet Data Call Procedures for MS	184
6.6.11.2.0	Full-Duplex MS to MS Packet Data Call Procedures for MS - Introduction	184
6.6.11.2.1	Initiating a single-part packet data call service	184
6.6.11.2.2	Response to the single-part packet service request	184
6.6.11.2.3	Response to the multi-part packet data service request	185
6.6.11.2.4	Acknowledgements received by the calling MS (packet data)	185
6.6.11.2.5	Availability Check to the called MS (packet data)	185
6.6.11.2.6	Payload Channel Allocation	186
6.6.11.3	Procedures for the Packet Data Payload Channel	186
6.6.11.3.0	Procedures for the Packet Data Payload Channel - Introduction	186
6.6.11.3.1	TS Procedures for the Packet Data Payload Channel	186
6.6.11.3.2	MS Procedures for the Packet Data Payload Channel	186
6.7	System Management Procedures	186
6.7.1	Network System Announcements	186
6.7.1.0	Network System Announcements - Introduction	186
6.7.1.1	Announce/Withdraw TSCC	187
6.7.1.2	Specify Call Timer parameters	187
6.7.1.3	Vote now advice	187
6.7.1.4	Announce Local Time	188
6.7.1.5	Mass Registration	188
6.7.1.6	Announce a logical physical channel relationship	189
6.7.1.7	Adjacent Site Information	189
7	PDU description	189
7.0	PDU description - Introduction	189
7.1	Layer 3 PDUs	189
7.1.0	Layer 3 PDUs - Introduction	189

7.2.34	Payload Channel Type	247
7.2.35	Site Time Slot Synchronization	247
7.2.36	One Key format flag (OK).....	247
Annex A (normative): Timers, constants levels and addresses		248
A.0	Timers, constants levels and addresses - Introduction	248
A.1	Layer 3 timers.....	248
A.2	Layer 3 constants.....	250
A.3	Layer 3 levels	250
A.4	Tier III Gateways/Identifiers	251
Annex B (normative): Opcode Reference Lists		252
B.1	CSBK/MBC/UDT Opcode List.....	252
B.2	Short Link Control Opcode List.....	253
B.3	Appended Data Information Elements	253
B.3.0	Appended Data Information Elements - Introduction	253
B.3.1	Appended Data Binary Format.....	253
B.3.2	Appended Data Addressing Format	255
B.3.3	Appended Data BCD Format	256
B.3.4	Appended Data ISO 7 bit character set Format	258
B.3.5	Appended Data ISO 8 bit Character Format.....	260
B.3.6	Appended Data NMEA (IEC 61162-1) format	262
B.3.6.0	Appended Data NMEA - Introduction.....	262
B.3.6.1	Short NMEA (IEC 61162-1) format	262
B.3.6.2	Long NMEA (IEC 61162-1) format specified	263
B.3.6.3	Long NMEA (IEC 61162-1) format unspecified.....	263
B.3.7	UDT DMR IP format	264
B.3.8	Appended Data Unicode 16 bit UTF-16BE Character Format.....	265

B.3.9	Appended Data Mixed Format	266
Annex C (informative): Physical Channel Plan		269
C.1	Transmission and Reception	269
C.1.1	RF carriers	269
C.1.1.1	Nominal carriers frequencies	269
C.1.1.2	Fixed Channel Plan	269
C.1.1.3	Flexible Channel Plan	271
C.1.1.4	Determination of Transmitter and Receiver frequency from CdefParms	271
Annex D (informative): Control Channel Hunting Procedures		272
D.1	Control Channel Hunting Procedures	272
D.1.0	Introduction	272
D.1.1	Resuming a TSCC hunt channel	274
D.1.2	Commanded TSCC hunt channel	274
D.1.2.1	Conditions to enter a Commanded TSCC hunt	274
D.1.2.2	Nominated Channel for the Single Channel Hunt	274
D.1.2.3	Short Hunt Sequence	275
D.1.2.3.0	Short Hunt Sequence - Introduction	275
D.1.2.3.1	Conditions to enter a Short Channel Hunt	275
D.1.2.4	Comprehensive Hunt Sequence	275
D.1.2.4.0	Comprehensive Hunt Sequence - Introduction	275
D.1.2.4.1	Conditions to enter a Comprehensive Channel Hunt	275
D.1.2.5	Receiver Sensitivity During Control Channel Acquisition	276
Annex E (informative): Fleet numbering and dialling plan		277
E.1	Introduction	277
E.2	Subscriber mapping	278
E.2.0	Subscriber mapping - Introduction	278
E.2.1	User Interface - Air Interface	278
E.3	Numbering Plan	279
E.3.0	Numbering Plan - Introduction	279
E.3.1	Definition of User Number and Address	280
E.3.1.0	User Number - Introduction	280
E.3.1.1	Definition of Air Interface User Address	280
E.3.1.2	Relationship between NAI and Air Interface MS Address	281
E.3.1.3	Individual Number	281
E.3.1.3.1	Short Subscriber Identity (SSI)	281
E.3.1.3.2	Fleet Individual Identity	281
E.3.1.3.3	Algorithm to convert an Individual Number to an AI Address	281
E.3.1.4	Group Number	282
E.3.1.4.1	Group Identity	282
E.3.1.4.2	Fleet Group Identity	282
E.3.1.4.3	Algorithm to convert a Group Number to an AI Address	282
E.3.2	Dispatcher	282
E.3.3	Short Dispatcher Dialling	283
E.3.4	All Call Dialed Strings	283
E.3.4.0	All Call Dialed Strings Introduction	283
E.3.4.1	Dialed Strings for Local All Calls	283
E.3.4.2	Dialed Strings used to address all MS in a subset of the system's radio sites as a talkgroup	283
E.3.4.3	Dialed Strings used to address all MS in the System as a talkgroup	284
E.3.5	Call Modifiers	284
E.3.6	Dialed Function Strings	285
E.3.7	Calls to Line Connected Destinations	285
E.3.7.1	Calls to the PABX and PSTN	285
E.3.7.1.0	Calls to the PABX and PSTN - Introduction	285
E.3.7.1.1	Calls to the PSTN	285
E.3.7.1.2	Calls to the PABX	286

Annex F (informative):	Use of MSC and SDL diagrams	287
F.1	Introduction	287
F.2	Principle	287
F.3	Notation.....	287
Annex G (informative):	Bibliography	288
History		289
