## Foreword

This corrigendum corrects editorial differences between the officially published version of ITU-T Recommendation Q.2140 (1995) and ITU-T Study Group 11 Report R 70 (COM 11-R 70-E, October 1994).

Table 6/Q.2140 (a state transition table which comprises eight states) has been split into nine parts distributed over nine consecutive pages. The first four pages specify the transitions for states 1/1/1 *Out of Service/Idle*, 1/4/1 *Out of Service/Outgoing Disconnection Pending*, 2/1/2 *Alignment/Idle* and 2/2/2 *Alignment/Outgoing Connection Pending*. The last five pages specify the transitions for states 2/4/2 *Alignment/Outgoing Disconnection Pending*, 3/10/5 *In Service/Data Transfer Ready*, 2/10/3 *Proving/Data Transfer Ready* and 2/10/4 *Aligned Ready/Data Transfer Ready*.

ITU-T Recommendation Q.2140 (1995) does not contain the correct table headings for the last five pages showing the latter four states, and has misplaced one event.

## Amendments

The following modifications to table 6/Q.2140 need to be applied:

### Page 23, table 6/Q.2140 (continuation)

Delete the last row associated with the event AAL-START.request.

### Page 24, table 6/Q.2140 (continuation)

Replace the table heading and insert the row associated with the event AAL-START.request, as follows:

State	Alignment/ Outgoing Disconnection Pending 2/4/2	In Service/ Data Transfer Ready 3/10/5	Proving/ Data Transfer Ready 2/10/3	Aligned Ready/ Data Transfer Ready 2/10/4
SSCF Timers running	T2		T2, T3	T2
Event				
AAL-START-request	Illegal	Illegal	Illegal	Illegal
⋮	⋮	⋮	⋮	⋮

### Pages 25 to 28, table 6/Q.2140 (continuations and end)

Replace the table heading by:

State	Alignment/ Outgoing Disconnection Pending 2/4/2	In Service/ Data Transfer Ready 3/10/5	Proving/ Data Transfer Ready 2/10/3	Aligned Ready/ Data Transfer Ready 2/10/4
SSCF Timers running	T2		T2, T3	T2
Event
