## Intellectual Property Rights

### Essential patents

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

### Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

---

## Foreword

This Harmonised European Standard (EN) has been produced by ETSI Technical Committee Electromagnetic compatibility and Radio spectrum Matters (ERM).

The present document has been prepared under the Commission's standardization request C (2015) 5376 final [i.4] to provide one voluntary means of conforming to the essential requirements of Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC [i.1]. <https://standards.iteh.ai/catalog/standards/sist/2875db10-9a74-4bfd-ac87-18e0eb01afd/sist-en-302-536-v2-1-1-2017>

Once the present document is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of the present document given in table A.1 confers, within the limits of the scope of the present document, a presumption of conformity with the corresponding essential requirements of that Directive and associated EFTA regulations.

| National transposition dates   |                 |
|--|-----------------|
| Date of adoption of this EN:   | 9 October 2017  |
| Date of latest announcement of this EN (doa):  | 31 January 2018 |
| Date of latest publication of new National Standard or endorsement of this EN (dop/e): | 31 July 2018    |
| Date of withdrawal of any conflicting National Standard (dow):                         | 31 July 2019    |

---

## Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

---

## Introduction

Animal Implant Devices (AIDs) and associated peripheral equipment are a technology in the medical field that supports the development of new drugs and surgical procedures that are under development by pharmaceutical firms, medically related research college and university institutions. AIDs provide, on a continuing basis, data related to the physical effects of new drugs and the efficacy of new surgical procedures after the implant is inserted. These animals are typically housed in commercial surroundings such as laboratory environments or similar facilities such as colleges and universities.

The present document is structured as follows:

- Clauses 1 through 3 provide a general description of the types of equipment covered by the present document and the definitions of terms and symbols and abbreviations used.
- Clause 4 specifies the requirements and limits relative to transmitter, receiver, and spectrum access.
- Clause 5 specifies the methods of measurement for the parameters specified in clause 4.
- Annex A (informative) provides the relationship between the present document and the essential requirements of Directive 2014/53/EU [i.1].
- Annex B (normative) provides specifications concerning radiated measurements.
- Annex C (normative) provides technical relationship between the radiating H-field and measurement distance.
- Annex D (informative) bibliography; provides additional information.

<https://standards.iteh.ai/catalog/standards/sist/2875db10-9a74-4bfd-ac87-18e0eb01af0d/sist-en-302-536-v2-1-1-2017>

# 1 Scope

The present document specifies technical characteristics and methods of measurements for Ultra Low Power-Animal Implant Devices (ULP-AIDs) and Peripherals as used by industry to develop new drugs and surgical techniques that provide improved health care for the benefit of human patients. ULP-AIDs operate in a Communications System using inductive technology in the frequency band 315 kHz to 600 kHz.

**Table 1: Ultra Low Power Animal Implants and Peripherals  
Operating in the frequency band 315 kHz to 600 kHz**

|  | Ultra Low Power Animal Implants and Peripherals service frequency bands |
|--|---|
| Transmitters - Ultra Low Power Animal Implants and Peripherals | 315 kHz to 600 kHz  |
| Receivers - Ultra Low Power Animal Implants and Peripherals    | 315 kHz to 600 kHz  |

The present document contains the technical requirements for characteristics of ULP-AID and ULP-AID-P radio equipment which are aligned with annex 12 sub-band (c) of CEPT/ERC Recommendation 70-03 [i.3].

The frequency usage conditions for the bands 315 kHz to 600 kHz are EU wide harmonised for the SRD category "active medical implant devices" according to 2013/752/EU [i.6] with the following usage restrictions:

- *"This set of usage conditions is only available to animal implantable devices".*

The present document covers the essential requirements of article 3.2 of Directive 2014/53/EU [i.1] under the conditions identified in annex A for Ultra Low Power Animal Implants and peripherals used in an implant communications system that supports development of medically related treatments that provide improved health care for patients. It does not necessarily include all the characteristics, which may be required by a user, nor does it necessarily represent the optimum performance achievable.

## 2 References

### 2.1 Normative references

References are specific, identified by date of publication and/or edition number or version number. Only the cited version applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <https://docbox.etsi.org/Reference/>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced document is necessary for the application of the present document.

- [1] CISPR 16-2-3 (2016): "Specification for radio disturbance and immunity measuring apparatus and methods. Part 2-3: Methods of measurement of disturbances and immunity - Radiated disturbance measurements".

### 2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

- [i.1] Directive 2014/53/EU of the European Parliament and of the Council of 16 April 2014 on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC.
- [i.2] ETSI TR 100 028 (V1.3.1): "Electromagnetic compatibility and Radio spectrum Matters (ERM); Uncertainties in the measurement of mobile radio equipment characteristics".
- [i.3] CEPT/ERC Recommendation 70-03: "Relating to the use of Short Range Devices (SRD)".
- [i.4] Commission Implementing Decision C (2015) 5376 final of 4.8.2015 on a standardisation request to the European Committee for Electro technical Standardisation and to the European Telecommunications Standards Institute as regards radio equipment in support of Directive 2014/53/EU of the European Parliament and of the Council.
- [i.5] Recommendation ITU-T O.153: "Basic parameters for the measurement of error performance at bit rates below the primary rate".
- [i.6] 2013/752/EU: "Commission Implementing Decision of 11 December 2013 amending Decision 2006/771/EC on harmonisation of the radio spectrum for use by short-range devices and repealing Decision 2005/928/EC".

## 3 Definitions, symbols and abbreviations

SIST EN 302 536 V2.1.1:2017

### 3.1 Definitions

<https://standards.iteh.ai/catalog/standards/sist/2875db10-9a74-4bfd-ac87-18e0eb01af0d/sist-en-302-536-v2-1-1-2017>

For the purposes of the present document, the following terms and definitions apply:

**animal implant device:** active implant that includes a transmitter, with or without an integral receiver, that operates in the ULP-AID band that is placed inside the body of the animal for the purpose of performing diagnostic functions and/or delivery of therapeutic treatment

**artificial antenna:** tuned reduced-radiating dummy load whose impedance is equal to the nominal impedance specified by the manufacturer

**body worn device:** physiologic sensor, holter type device, or other physiological data transfer device containing a transmitter or transceiver intended to be operated in close proximity to the animal body, which has its radio antenna external to the body, and is used to sense and/or transfer, via means of radio frequency transmission, physiological parameters or system programming information

**conducted measurements:** measurements which are made using a direct connection to the equipment under test

**dedicated antenna:** removable antenna supplied and tested with the radio equipment that is designed as an indispensable part of the equipment

**H-field test antenna:** electric field shielded loop or equivalent antenna, with which the magnetic component of the radio frequency field can be measured

**integral antenna:** permanent fixed antenna, which may be built-in, that is designed as an indispensable part of the equipment

**magnetic dipole moment:** product of (Number of coil turns) × (coil area) × (coil current)

NOTE: Air coils only.

**mobile station:** equipment external to the animal body intended to provide communication capability to an active implant device placed within the body

**programmer/controller:** ULP-AID-P equipment used to communicate with an ultra low power animal implant device (ULP-AID)

**radiated measurements:** measurements which involve the absolute measurement of a radiated field

**telecommand:** use of radio communication for the transmission of signals to initiate, modify or terminate functions of equipment at a distance

**telemetry:** use of radio communication for transferring data at a distance

**Ultra Low Power Animal Implant Device(ULP-AID):** active implant transmitter that is designed to radiate RF energy in accordance with the provisions of Annex 12, band (c), to CEPT/ECC Recommendation 70-03 [i.3]

**Ultra Low Power Animal Implant Device Peripheral (ULP-AID-P):** peripheral to an active implant transmitter that is designed to radiate RF energy in accordance with the provisions of Annex 12, band (c), to CEPT/ECC Recommendation 70-03 [i.3]

## 3.2 Symbols

For the purposes of the present document, the following symbols apply:

|                |   |
|----------------|---|
| E              | Electrical field strength                         |
| E <sub>o</sub> | Reference electrical field strength (see annex B) |
| f              | frequency   |
| H              | Magnetic field strength                           |
| H <sub>o</sub> | Reference magnetic field strength (see annex B)   |
| μ <sub>d</sub> | magnetic dipole moment                            |
| P              | Power   |
| R              | Distance  |
| R <sub>o</sub> | Reference distance (see annex B)                  |
| t              | time  |

## 3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

|           |   |
|-----------|---|
| ERC       | European Radio Committee                          |
| EUT       | Equipment Under Test                              |
| RF        | Radio Frequency                                   |
| RMS       | Root Mean Square                                  |
| SRD       | Short Range Device                                |
| ULP-AID   | Ultra Low Power - Animal Implant Device           |
| ULP-AID-P | Ultra Low Power- Animal Implant Device Peripheral |

---

## 4 Technical requirements specifications

### 4.1 Environmental profile

#### 4.1.0 General requirements

The technical requirements of the present document apply under the environmental profile for operation of the equipment, which shall be declared by the manufacturer.
