## ITeH STANDARD PREVIEW

This amendment A1 modifies the European Standard EN 60154-1:1994. It was approved by CENELEC on 1994-07-05. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

#### FOREWORD

The CENELEC questionnaire procedure, performed for finding out whether or not amendment 1:1993 to the International Standard IEC 154-1:1982 could be accepted without textual changes, has shown that no common modifications were necessary for the acceptance as European Standard.

The reference document was submitted to the CENELEC members for formal vote and was approved by CENELEC as amendment A1 to EN 60154-1 on 5 July 1994.

The following dates were fixed:

- latest date of publication of an identical national standard (dop) 1995-07-15
- latest date of withdrawal of conflicting national standards (dow) 1995-07-15

#### ENDORSEMENT NOTICE

The text of amendment 1:1993 to the International Standard IEC 154-1:1982 was approved by CENELEC as an amendment to the European Standard without any modification.

## FOREWORD

This amendment has been prepared by sub-committee 46B: Waveguides and their accessories, of IEC technical committee No. 46: Cables, wires, waveguides, r.f. connectors and accessories for communication and signalling.

The text of this amendment is based on the following documents:

DIS	Report on Voting
46B(CO)117	46B(CO)120

Full information on the voting for the approval of this amendment can be found in the report on voting indicated in the above table.

The dimensions and tolerances contained herein are in conformance with ISO 4014 and ISO 4759/1.

CONTENTS

*Add the following new clause 3:*  
<https://standards.iteh.ai/catalog/standards/sist/fec7ecb0-d627-4598-ae15-9ce4a6aac76/sist-en-60154-1-1998-a1-1998>  
 SIST EN 60154-1:1998/A1:1998

**3. Metric thread precision shoulder bolts and precision pins used for alignment of flanges**

Page 13

*Add the following new clause:*

**3. Metric thread precision shoulder bolts and precision pins used for alignment of flanges**

The shank diameter of the alignment shafts contained herein is identical with the diameter of the alignment bolts in this standard. Alignment bolt lengths have been so chosen to permit the use of additional hardware such as washers, lockwashers, and either plain or self-locking nuts.

When ordering, the designation comprises the following:

- For type of alignment shaft:
  - B = bolt
  - P = pin
- For size:
  - bolts: M followed by a number [X]      M[X] = size
  - pins: M followed by a number [X]      M[X] = size
- For material:
  - A = stainless steel
  - X = material agreed upon between user and manufacturer
- A letter indicating finish:
  - U = untreated
  - T = tin
  - Z = zinc
  - C = cadmium
  - X = alternative finish agreed upon between user and manufacturer.
- For bolts, additional numbers to indicate the overall length and the length of the unthreaded portion:
 

SIST EN 60154-1:1998/A1:1998

*Example:* BM 4 AU 18 x 9 is a bolt size M4 made from stainless steel, untreated, overall length of 18 mm and the length of the unthreaded portion 9 mm.

It should be noted that the bolts for R 100, 120, 140 and 180 are of the same length, but the bolts for R 100 have a larger (4,152 mm) diameter plain shank. When ordering these, therefore, it should be indicated for which flange/waveguide size they are to be used.
