This amendment A17 modifies the Harmonization Document HD 22.1 S2:1992; it was approved by CENELEC on 1995-02-15. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for implementation of this amendment on a national level.

Up-to-date lists and bibliographical references concerning such national implementation may be obtained on application to the Central Secretariat or to any CENELEC member.

This amendment exists in three official versions (English, French, German).

CENELEC members are the national electrotechnical committees of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This amendment was prepared by the Technical Committee CENELEC TC 20, Electric cables.

The text of the draft was submitted to the formal vote and was approved by CENELEC as amendment A17 to HD 22.1 S2:1992 on 1995-02-15.

The following dates were fixed:

- latest date by which the existence of the amendment has to be announced at national level (doa) 1995-09-01
- latest date by which the amendment has to be implemented at national level by publication of a harmonized national standard or by endorsement (dop) 1996-03-01
- latest date by which the national standards conflicting with the amendment have to be withdrawn (dow) 1996-03-01

For products which have complied with HD 22.1 S2:1992 and its amendments A11:1992, A12:1992, A13:1992, A14:1994, A15:1993, A16:1994 and A18:1995 before 1996-03-01, as shown by the manufacturer or by a certification body, this previous standard may continue to apply for production until 1997-03-01.

Sub-clause 5.5.1

After the first sentence add the following type to the list of compounds:

"Type EM 4 for cables sheathed with vulcanised EVA or equivalent synthetic elastomer".

5.2	Result to be obtained: - median of the depth of penetration max.	%	50		

- (1) No limit for the positive tolerance.
- (2) Variation is the difference between the median value after ageing and the median value without ageing, expressed as a percentage of the latter.
- (3) Unless otherwise specified in the relevant cable specifications a rotating fan inside the oven is normally permissible when testing rubber compounds. However, in case of dispute, ageing shall be carried out in an oven which is designed to operate without a fan rotating inside it.
