Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 18436-3:2008 was prepared by Technical Committee ISO/TC 108, *Mechanical vibration, shock and condition monitoring*, Subcommittee SC 5, *Condition monitoring and diagnostics of machines*.

Annex A **(normative)**

Qualifications for trainers

Assessment of trainers shall be carried out in accordance with relevant parts of ISO 18436. Trainers shall be assessed to at least category II (category III for vibration) on the particular field of application. For categories above category I (category II for vibration), trainers shall be assessed to at least the same category.

When a training body initially applies the training scheme, it may appoint personnel as trainers during a period not exceeding five years who meet the following requirements:

- a) have knowledge of the principles of condition monitoring and diagnostics of machines;
- b) have industrial experience of the application of condition monitoring and diagnostics of machines;
- c) have the ability to conduct training in accordance with the relevant part of ISO 18436.

All trainers shall sign a statement that they have received and carried out the set of rules for proper conduct of training programmes in which they participate.
