ISO 10303-203 Application modules:2008(E)

ISO 10303 supports many different product information exchange and sharing scenarios which contain common information requirements. The ISO 10303 application modules contain reusable data models for key collections of product information within ISO 10303, which can be combined to support information exchange for different business scenarios. By reusing these models, users will save the cost of remodelling common information structures, and can be assured of interoperable data exchange processes.

This CD-ROM contains 91 application modules in HTML format, forming part of the ISO 10303 series of documents. These 91 application modules, together with 86 other application modules already published, are intended for use with Application protocol 203 (ISO/TS 10303-203:2005, currently under revision), which specifies the application protocol for configuration controlled three-dimensional design of parts and assemblies. The application modules will also be used in other ISO 10303 parts currently under development, and are available for developers to use as core information models for product data.

Each application module is published as a separate part: 403, 1001, 1003 to 1004, 1007 to 1009, 1012, 1022, 1025 to 1027, 1032, 1040, 1103 to 1104, 1106, 1109 to 1112, 1115, 1129 to 1132, 1136, 1206, 1215 to 1216, 1231, 1233, 1248, 1275, 1291, 1308 to 1324, 1327, 1329 to 1331, 1345, 1349, 1362, 1366, 1369, 1509, 1514, 1628, 1652, 1654 to 1655, 1667, 1672, 1681, 1702, 1715, 1747, 1749 to 1750, 1753, 1760, 1762, 1767 to 1768, 1770 to 1773, 1775 to 1780, 1782.

All parts are first editions except the following:

Installation

If this publication has been packaged as a zipped file, do NOT open the file from the CD-ROM, but copy it to the desired location in your local environment. Once the file has been copied to your local environment, open the file to unzip its contents. For compound documents (e.g. HTML documents comprising several files or folders, documents that have been subdivided owing to the total file size, etc.), in order for the links between documents to function properly, the file and folder names must be maintained and all the files stored in the same folder.

Where the zip file contains a Readme file, it is essential to consult this file to understand the way in which the document has been structured.
