English Version

Safety of packaging machines - Part 7: Group and secondary packaging machines

Sécurité des machines d'emballage - Partie 7: Machines de groupe et d'emballage secondaire

Sicherheit von Verpackungsmaschinen - Teil 7: Sammelpackmaschinen

This European Standard was approved by CEN on 20 April 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 415-7:2006) has been prepared by Technical Committee CEN/TC 146, "Packaging machines - Safety", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2007, and conflicting national standards shall be withdrawn at the latest by January 2007.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association and supports essential requirements of EU Directives.

For the relationship with EC Directives, see informative Annex ZA, which is an integral part of this document.

Other standards produced by the Technical Committee are:

EN 415 Safety of packaging machines;

Part 1: Terminology and classification of packaging machines and associated equipment.

Part 2: Pre-formed rigid container packaging machines.

Part 3: Form, fill and seal machines.

Part 4: Palletisers and depalletisers.

Part 5: Wrapping machines.

Part 6: Pallet wrapping machines.

Part 8: Strapping machines.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Introduction

Group and secondary packaging machines are used extensively in Europe, in an increasingly wide range of industries. They contain several significant hazards and have the potential to cause serious injury.

This document is a type C standard as defined in the Introduction of EN ISO 12100-1:2003.

The machinery concerned and the extent to which hazards, hazardous situations and events are covered are indicated in the scope of this European Standard.

When provisions of this type C standard are different from those which are stated in type A or B standards, the provisions of this type C standard take precedence over the provisions of the other standards, for machines that have been designed and built according to the provisions of this type C standard.

1 Scope

This European Standard applies to the following groups of machines:

Group and secondary packaging machines and the collating systems associated with them.

The individual machines are described in 3.2 of this European Standard.

This European Standard deals with safety requirements for machine design, construction, installation, commissioning, operation, adjustment, maintenance and cleaning of group and secondary packaging machines.

The extent to which hazards, hazardous situations and events are covered, are indicated in Clause 4.

Exclusions

This European Standard is not applicable to the following machines:

— machines that were manufactured before the date of publication of this document by CEN;

— strapping machines. These machines are covered by EN 415-8;

— crate loaders and un-loaders for pre-formed rigid containers. These machines are covered by EN 415-2;

— cartoning machines. Cartoning machines are covered by EN 415-3.

This European Standard does not consider the following hazards:

— use of group and secondary packaging machines in potentially explosive atmospheres;

— health, safety or hygiene hazards associated with the products that may be handled by the machines, but does include general advice on this subject;

— hazards that may be associated with electromagnetic emissions from group and secondary packaging machines;

— hazards that may be associated with decommissioning group and secondary packaging machines.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Terms and definitions

For the purposes of this document, the terms and definitions given in Clause 3 of EN ISO 12100-1:2003, EN 415-1:2000 and the following apply.

3.1 Definition of terms

3.1.1
pack, package
assembly of product and packaging materials produced by a packaging machine

3.1.2
group package
package comprising a number of products, grouped together for distribution

NOTE Group packages include cases, trays, crates and carton board sleeves

3.1.3
secondary package
package comprising one or a number of products, grouped together for distribution

NOTE Secondary packages include cases, trays, crates and carton board sleeves

3.1.4
product
substance, article or articles (including packs or packages) that are handled in the packaging machine

3.1.5
packaging material
material used to make a package

EXAMPLE corrugated board, carton board

3.1.6
carton
container that is made from carton board, generally between 250 μm and 1 000 μm in thickness, and is usually delivered to the user in the form of a carton blank or folded and side seam glued

3.1.7
carton blank
individual carton in the flat after cutting and creasing and with the strippings removed

3.1.8
carton tray
rectangular open carton with sides and ends made from carton board generally between 250 μm and 1 000 μm in thickness and usually delivered to the user in the form of a carton blank

3.1.9
carton board
paper board used for folding cartons generally between 250 μm and 1 000 μm thick and pliable enough so that it can be folded along score lines without cracking the material

3.1.10
case
container, which is generally made from corrugated board that is used to contain groups of packages and is delivered to the user in the form of a glued or stitched case or a flat blank
