Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 4 to ISO 7010:2003 was prepared by Technical Committee ISO/TC 145, *Graphical symbols*, Subcommittee SC 2, *Safety identification, signs, shapes, symbols and colours*.

Graphical symbols — Safety colours and safety signs — Safety signs used in workplaces and public areas

AMENDMENT 4

IMPORTANT — The electronic file of this document contains colours which are considered to be useful for the correct understanding of the document. Users should consider printing this document using a colour printer. ISO 3864-1 provides colorimetric and photometric properties together with, as a guideline, references from colour order systems.

Add the following safety signs:

— E010: Automated external heart defibrillator

— E011: Eyewash station

— E012: Safety shower

— E013: Stretcher

— M012: Use handrail

— M013: Wear face shield

— M014: Wear head protection

— M015: Wear high visibility clothing

— M016: Wear a mask

— M017: Wear respiratory protection

— M018: Wear safety harness

— M019: Wear welding mask

— M020: Wear safety belts

— M022: Use barrier cream

— M023: Use footbridge

— P020: Do not use lift in the event of fire

— P021: No dogs

— P022: No eating or drinking

— P023: Do not obstruct

— P024: Do not walk or stand here

— W022: Warning; Sharp elements

<https://standards.iteh.ai/catalog/standards/sist/093575bb-4a0b-4728-b78f-f8dfc231bfad/sist-iso-7010-2010-amd-4-2010>

ISO 7010:2003/Amd.4:2009(E)

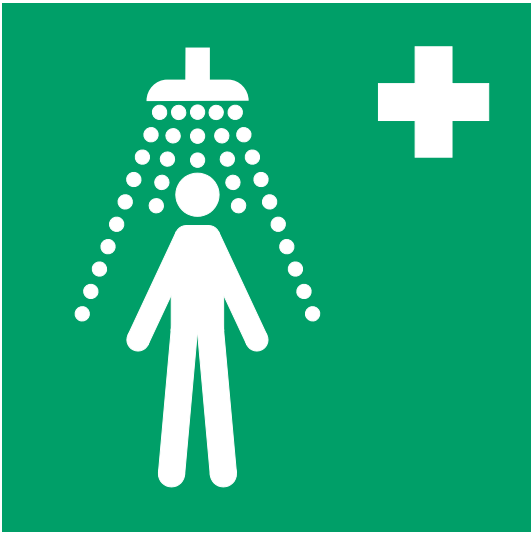

Safety sign E010: Automated external heart defibrillator

	Reference No. <p style="text-align: center;">ISO 7010-E010</p>
	Referent <p style="text-align: center;">Automated external heart defibrillator</p>
	Function To indicate the location of an automated external heart defibrillator
	Image content Heart with flash in the middle, first aid cross
Hazard Not being able to locate the automated external heart defibrillator which is provided to assist in the avoidance of death from a heart attack	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Being aware of the location of an automated external heart defibrillator at the time of need	
Human behaviour that is intended to be prevented Not being aware of the location of an automated external heart defibrillator at the time of need	
Need The use of an automated external heart defibrillator can reduce the risk of death from a heart attack.	
Related referents E003	
Field of application In workplaces, in public areas, on products	
Format of application Safety signing, safety manuals and notices, product labelling	
Context of use In public facilities such as airports, railway stations and shopping areas and in workplaces where automated external heart defibrillators have been installed	
Additional information The first aid cross may be replaced with another element appropriate to cultural requirements of the target group. Test data obtained according to ISO 9186-1 are available from more than one country. Findings from testing showed that the graphical symbol did not reach the criteria of acceptability. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign E011: Eyewash station

	Reference No. ISO 7010-E011
	Referent Eyewash station
	Function To indicate the location of an eyewash station
	Image content Eye above running water coming out of a shower head, first aid cross
Hazard Not being able to locate the eyewash station which is provided to assist in the clearance of eye contamination from substances which can lead to eye damage and loss of sight, if not cleared sufficiently quickly	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Being aware of the location of an eyewash station sufficiently quickly at the time of need	
Human behaviour that is intended to be prevented Not being aware of the location of an eyewash station sufficiently quickly at the time of need	
Need The use of an eyewash can reduce the risk of damage to eyes and loss of sight following contamination from substances.	
Related referents E003, E012	
Field of application In workplaces	
Format of application Safety signing, safety manuals and notices	
Context of use In areas where eye contamination can take place and eyewash stations are provided	
Additional information The first aid cross may be replaced with another element appropriate to cultural requirements of the target group. Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign E012: Safety shower

	Reference No. <p style="text-align: center;">ISO 7010-E012</p>
	Referent <p style="text-align: center;">Safety shower</p>
	Function To indicate the location of a safety shower
	Image content Human figure under running water coming out of a shower head, first aid cross
Hazard Not being able to locate the safety shower which is provided to assist in the clearance of contamination from substances which can lead to death, injury or illness, if not cleared sufficiently quickly	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Being aware of the location of a safety shower sufficiently quickly at the time of need	
Human behaviour that is intended to be prevented Not being aware of the location of a safety shower sufficiently quickly at the time of need	
Need The use of a safety shower can reduce the risk of death, injury and illness following contamination from substances.	
Related referents E003, E011	
Field of application In workplaces	
Format of application Safety signing, safety manuals and notices	
Context of use In areas where contamination of people from substances can take place and safety showers are provided	
Additional information The first aid cross may be replaced with another element appropriate to cultural requirements of the target group. Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign E013: Stretcher

	Reference No. <p style="text-align: center;">ISO 7010-E013</p>
	Referent <p style="text-align: center;">Stretcher</p>
	Function To indicate the location of a stretcher
	Image content Human figure outlined on a white stretcher, first aid cross
Hazard Not being able to locate the stretcher which is provided to assist in the transport of people with injury or illness to a place where medical care will be available	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Being aware of the location of a stretcher sufficiently quickly at the time of need	
Human behaviour that is intended to be prevented Not being aware of the location of a stretcher sufficiently quickly at the time of need	
Need The use of a stretcher to transport people to a place where medical care will be available can reduce the risk of death and the aggravation of injuries or illness.	
Related referents E003	
Field of application In workplaces, in public areas	
Format of application Safety signing, safety manuals and notices	
Context of use In areas where stretchers are provided to take people who are injured or ill to receive medical care	
Additional information The first aid cross may be replaced with another element appropriate to cultural requirements of the target group. Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.
