

Alphabetical Index

2D SRF	145	celestiodetic SRFT	151
3D SRF	145	celestial magnetic OBRs	137
ε -neighbourhood	324	celestial magnetic SRFT	158
A		central scale	43
abstract CS	27	class	219
abstract object	11	closed curve	328
accuracy domain template	301	closed set	324
accuracy domain	301	closure of a set	324
affine	325	closure point	324
angle between two curves	328	code	307
applicable ORM to SRFT	301	common error conditions	233
approximation error	336	compatible normal embedding	115
arc length	330	compatible ORM and SRFT	301
arctan2 function	330	component function	325
Aries true of date	130	composition of functions	325
augmented equidistant cylindrical CS	80	computational accuracy requirement	302
augmented Lambert conformal conic CS	74	computational error	336
augmented map projection	44	conformal map projection	37
augmented Mercator CS	65	conformance - application	321
augmented oblique Mercator spherical CS	67	conformance - exchange format	320
augmented polar stereographic CS	77	conformance - functional implementation	319
augmented transverse Mercator CS	70	conformance - language binding	320
axis	33	conic classification	42
azimuthal CS	93	conic projection function	333
azimuthal spherical CS	55	connected	329
B		continued normal vector	329
basic data type	220	convergence of the meridian	40
binding constraint	116	coordinate	28
binding of a CS via a normal embedding	143	coordinate frame rotation	114
bound RD	111	coordinate of a position	28
Bursa-Wolfe equation	342	coordinate-component	28
C		coordinate-component curve	31
canonical basis	323	coordinate-component surface	30
Cartesian CS	33	coordinate-space	27
celestiocentric SRFT	150	coordinated universal time	102
		cross product	324

CS domain	27	enumerated data type	222
CS localization	34	epoch	101
CS parameters	28	equator	32
CS range	28	equatorial inertial OBRS	130
CS type	29	equatorial inertial SRFT	158
curve generating function	329	equatorial plane	5
curvilinear CS	32	equatorial spherical CS	52
curvilinear SRF	145	equidistant cylindrical CS	80
cylindrical classification	42	equidistant cylindrical SRFT	168
cylindrical CS	62	equinox	130
cylindrical projection function	333	equipotential surface	195
D		Euclidean 1D CS	98
deprecation	501	Euclidean 2D CS	90
description	308	Euclidean 3D CS	49
designated spatial surface	195	Euclidean distance	324
digitization error	335	Euclidean distance coordinate expression	216
dimension of an ORM	144	extended valid-region	145
directed curve	328	extended valid-region specification	146
direction	213	F	
direction vector at c	214	false easting	43
directional point distortion	38	false northing	43
display coordinate	38	first derivative	325
distance-preserving function	112	first point of Aries	130
dot-product	323	flattening	327
DSS model	195	four parameter transformation	114
dynamic temporal coordinate system	101	G	
E		generating function	27
Earth gravitational model	5	generating projection	36
Earth reference model	115	geocentric solar magnetospheric SRFT	161
easting	36	geocentric SRFT	150
eccentricity	327	geodesic	330
ecliptic longitude of the Sun	343	geodesic distance	330
ecliptic plane	5	geodesic distance operation	216
elevation	198	geodetic 3D CS	58
ellipse implicitly defined	330	geodetic azimuth	39
ellipse parametrically specified	327	geodetic datum	5
ellipsoid of revolution	326	geodetic SRFT	152

geoid	195	latitudinal point distortion	38
geoidal separation	197	left-handed embedding	112
geomagnetic SRFT	158	linear CS	32
global model	115	linear function	325
gradient	324	linear SRF	145
Greenwich sidereal hour angle	343	local model	115
H		local space azimuthal 2D SRFT	170
heliocentric Aries ecliptic OBRS	134	local space polar 2D SRFT	171
heliocentric planet ecliptic OBRS	135	local space rectangular 2D SRFT	169
heliocentric planet equatorial OBRS	136	local space rectangular 3D SRFT	150
heliospheric Aries ecliptic SRFT	161	local tangent frame at coordinate c	213
heliospheric Earth ecliptic SRFT	162	local tangent space azimuthal spherical SRFT	154
heliospheric Earth equatorial SRFT	163	local tangent space cylindrical SRFT	156
Helmert transformation	207	local tangent space Euclidean SRFT	153
horizontal datum shift	207	local tangent vectors at coordinate c	213
I		localization operator	34
implicit surface	326	lococentre	35
inertial direction	130	lococentric	35
inner product	323	lococentric azimuthal CS	94
integrated temporal coordinate system	101	lococentric azimuthal spherical CS	56
interior of a set	324	lococentric cylindrical CS	63
interior point	324	lococentric equatorial spherical CS	53
https://standards.iec.ch/standard/18026-2009		lococentric Euclidean 2D CS	91
international atomic time	102	lococentric Euclidean 3D CS	50
inverse generating function	28	lococentric Euclidean 3D SRFT	157
J		lococentric polar CS	96
Jacobian determinant	325	lococentric surface azimuthal CS	87
Jacobian elliptic functions	330	lococentric surface Euclidean CS	85
Jacobian matrix	325	lococentric surface polar CS	89
K		longitude of origin	43
k^{th} coordinate-component	28	longitudinal point distortion	38
L		M	
label	306	major semi-axis	327
Lambert conformal conic CS	74	map azimuth	39
lambert conformal conic SRFT	166	map projection	35
latitude of origin	43	map projection CS	36
latitude of true scale	44	map scale	38

map-east	36	orientation preserving function	325
map-north	36	oriented surface	329
mapping equations	36	origin of the embedding	112
Mercator CS	65	ORM template	116
Mercator SRFT	163	orthogonal CS	33
meridian	32	orthogonal to a set	323
method of a class	219	orthogonal vectors	323
minor semi-axis	327	orthographic projection function	331
N		orthometric height	199
norm	323	orthonormal CS	33
normal embedding	111	orthonormal set of vectors	323
north pole	5	P	
northing	36	parallel (geodetic)	31
<i>n</i> -tuple of real numbers	323	perpendicular vectors	323
NULL Object	222	perspective projection function	332
O		physical object	11
object binding rule	129	planetodetic 3D CS	60
object binding rule set	129	plumbline	198
object instance	219	point	323
object life cycle	219	point scale	39
object reference	219	polar CS	95
object reference model	115	polar stereographic CS	77
http://Object_Reference/	222	polar stereographic SRFT	167
object-dynamic embedding	115	position	28
object-dynamic ORM	115	position error	338
object-fixed embedding	115	position vector rotation	114
object-fixed ORM	115	position-space	11
object-fixed RD binding	111	position-space	28
object-space	10	prime meridian	32
oblate ellipsoid RD	108	profile	301
oblique Mercator spherical CS	67	projection function	331
oblique Mercator SRFT	164	prolate ellipsoid	327
obliquity of the ecliptic	343	prolate ellipsoid RD	108
open set	324	promotion operation	209
operator	325	Q	
orientable surface	329	quasi-inertial direction	130
orientation preserving CS	33	R
