Predgovor

Mednarodna organizacija za standardizacijo (ISO) je svetovna zveza nacionalnih organov za standarde (članov ISO). Mednarodne standarde po navadi pripravljajo tehnični odbori ISO. Vsak član, ki ga zanima področje, za katero je bil ustanovljen tehnični odbor, ima pravico biti zastopan v tem odboru. Pri delu sodelujejo tudi mednarodne vladne in nevladne organizacije, povezane z ISO. V vseh zadevah, ki so povezane s standardizacijo na področju elektrotehnike, ISO tesno sodeluje z Mednarodno elektrotehniško komisijo (IEC).

Postopki, uporabljeni pri razvoju tega dokumenta, in postopki, predvideni za njegovo nadaljnje vzdrževanje, so opisani v Direktivah ISO/IEC, 1. del. Posebna pozornost naj se nameni različnim kriterijem odobritve, potrebnim za različne vrste dokumentov ISO. Ta dokument je bil pripravljen v skladu z uredniškimi pravili Direktiv ISO/IEC, 2. del (glej www.iso.org/directives).

Opozoriti je treba na možnost, da je lahko nekaj elementov tega dokumenta predmet patentnih pravic. ISO ne prevzema odgovornosti za identifikacijo katerihkoli ali vseh takih patentnih pravic. Podrobnosti o morebitnih patentnih pravicah, prepoznanih med pripravo tega dokumenta, bodo navedene v uvodu in/ali na seznamu patentnih izjav, ki jih je prejela organizacija ISO (glej www.iso.org/patents).

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Uvod

Ta mednarodni standard določa zahteve za vzpostavitev, izvajanje, vzdrževanje in izboljševanje sistema vodenja za obvladovanje premoženja, imenovanega "sistem obvladovanja premoženja".

Ta mednarodni standard lahko uporablja katerakoli organizacija. Organizacija določi, za katera od njenih premoženj se ta mednarodni standard uporablja.

Ta mednarodni standard je v prvi vrsti namenjen:

- tistim, ki so vključeni v vzpostavitev, izvajanje, vzdrževanje in izboljševanje sistema obvladovanja premoženja;
- tistim, ki so vključeni v izvajanje aktivnosti obvladovanja premoženja, in izvajalcem storitev;
- notranjim in zunanjim stranem za oceno zmožnosti organizacije izpolnjevati zakonske, regulativne in pogodbene zahteve ter lastne zahteve organizacije.

Vrstni red, v katerem so zahteve predstavljene v tem mednarodnem standardu, ne odraža njihove pomembnosti ali namiguje na vrstni red, v katerem jih je treba izvajati.

Dodatni napotki o uporabi zahtev v tem mednarodnem standardu so na voljo v ISO 55002.

Splošne informacije o obvladovanju premoženja in informacije o terminologiji, ki se uporablja za ta mednarodni standard, so na voljo v ISO 55000. Organizacije lahko ugotovijo, da bo upoštevanje načel pomagalo pri razvoju obvladovanja premoženja v njihovi organizaciji.

Ta mednarodni standard uporablja definicijo "tveganja" iz standardov ISO 31000:2009 in ISO Guide 73:2009. Poleg tega uporablja izraz "deležnik" in ne "zainteresirana stran".

Ta mednarodni standard je zasnovan tako, da omogoči organizaciji, da uskladi in integrira svoj sistem obvladovanja premoženja s sorodnimi zahtevami sistemov vodenja.

Dodatek A zagotavlja dodatne informacije o področjih, povezanih z aktivnostmi obvladovanja premoženja.

Introduction

This International Standard specifies the requirements for the establishment, implementation, maintenance and improvement of a management system for asset management, referred to as an "asset management system".

This International Standard can be used by any organization. The organization determines to which of its assets this International Standard applies.

This International Standard is primarily intended for use by:

- those involved in the establishment, implementation, maintenance and improvement of an asset management system;
- those involved in delivering asset management activities and service providers;
- internal and external parties to assess the organization's ability to meet legal, regulatory and contractual requirements and the organization's own requirements.

The order in which requirements are presented in this International Standard does not reflect their importance or imply the order in which they are to be implemented.

Further guidance regarding the application of the requirements within this International Standard is provided in ISO 55002.

General information on asset management, and information on the terminology applicable to this International Standard, is provided in ISO 55000. Organizations can find that consideration of the principles will assist the development of asset management in their organization.

This International Standard applies the definition of "risk" given in ISO 31000:2009 and ISO Guide 73:2009. In addition, it uses the term "stakeholder" rather than "interested party".

This International Standard is designed to enable an organization to align and integrate its asset management system with related management system requirements.

Annex A provides additional information on areas related to asset management activities.
