19 Abnormal operation

19.101 Replace the last but one dashed item by:

- failure or blocking of the mechanical part of a water level switch.
This fault condition is not applied if the cross section of the tube supplying the air-reservoir with water is greater than 5 cm² with a minimum dimension of 1 cm and if the air-reservoir outlet is at least 2 cm above the maximum water level. The tube connecting the air-reservoir and the water level switch is to be fixed so that there is no likelihood of bending or pinching.
