AMENDMENT 1
2012-02-01

**Glass-reinforced thermosetting plastics
(GRP) pipes — Determination of the
resistance to cyclic internal pressure**

AMENDMENT 1

*Tubes en plastiques thermodurcissables renforcés de verre (PRV) —
Détermination de la résistance à la pression cyclique interne*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 15306:2003 was prepared by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, Subcommittee SC 6, *Reinforced plastics pipes and fittings for all applications*. The Scope has been revised to clarify the intended diameter range of applicability.

Glass-reinforced thermosetting plastics (GRP) pipes — Determination of the resistance to cyclic internal pressure

AMENDMENT 1

Page 1, Scope

Replace the Scope with the following:

This International Standard specifies a method for the determination of the resistance of glass-reinforced thermosetting plastics (GRP) pipes to cyclic internal pressure.

This International Standard is applicable to pipes of nominal size up to and including DN 600.
