Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Foreword

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities, UMTS identities or GSM identities. These should be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between GSM, UMTS, 3GPP and ETSI identities can be found under <http://webapp.etsi.org/key/queryform.asp>.

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Annex A (normative):	Support of USAT by Mobile Equipment	109
Annex B (informative):	Example of DISPLAY TEXT Proactive UICC Command	110
Annex C (normative):	Structure of USAT communications	111
Annex D (informative):	ME display in proactive UICC session.....	112
Annex E (informative):	Help information feature processing.....	113
Annex F (informative):	Monitoring of events.....	114
Annex G (normative):	Support of Multiple Card Operation	115
Annex H (informative):	Multiple Card proactive command examples	116
Annex I (informative):	Bearer independent protocol proactive command examples.....	117
Annex J (informative):	WAP References	118
Annex K (informative):	Use of USAT Bearer independent protocol for local links Bluetooth case	119
Annex L (informative):	Bluetooth Service Discovery protocol	120
Annex M (informative):	Use of USAT Bearer independent protocol for local links, server case ..	121
Annex N (informative):	USSD information flow between the Network, the ME and the UICC...122	
N.1	MMI Mode	122
N.2	Application Mode.....	124
N.3	USSD Data Download.....	126
Annex O (informative):	Geographical location information discovery information flow between the ME and the UICC.....	127
Annex P (normative):	Support of USAT by Terminals with reduced feature capabilities.....	128
Annex Q (normative):	Default routing for USAT over AT interface	129
Q.0	3GPP-specific facilities	129
Q.1	Default routing mechanism	129
Q.2	Combination rules for terminal profiles	130
Annex R (informative):	UICC access to IMS, command flow examples.....	131
R.1	Discovery of the UICC's IARI and IMS Registration	131
R.2	Notification of Incoming IMS data	132
R.3	UICC originating a SIP message.....	133
Annex S (informative):	Change History	134
History	138

Foreword

This Technical Specification (TS) has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

x the first digit:

- 1 presented to TSG for information;
- 2 presented to TSG for approval;
- 3 or greater indicates TSG approved document under change control.

Y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.

Z the third digit is incremented when editorial only changes have been incorporated in the document.

PREVIEW
iTech STANDARD
(standards.itih.ai)
Full standard:
<https://standards.itih.ai/catalog/standards/sist/987b0a7f-3b55-4b57-a015-30fb82a2cc83/etsi-ts-131-111-v13.8.0-2018-10>

1 Scope

The present document defines the interface between the UICC and the Mobile Equipment (ME), and mandatory ME procedures, specifically for "USIM Application Toolkit".

The present document refers in its majority to the ETSI TS 102 223 [32], which describes the generic aspects of application toolkits within the UICC.

USAT is a set of commands and procedures for use during the network operation phase of 3G/LTE, in addition to those defined in TS 31.101 [13].

Specifying the interface is to ensure interoperability between a UICC and an ME independently of the respective manufacturers and operators.

The present document defines for 3G/LTE technology:

- the commands;
- the application protocol;
- the mandatory requirements on the UICC and ME for each procedure.

The present document does not specify any aspects related to the administrative management phase. Any internal technical realization of either the UICC or the ME are only specified where these reflect over the interface. The present document does not specify any of the security algorithms which may be used.

For the avoidance of doubt, references to clauses of ETSI TS 102 223 [32] include all the subclauses of that clause, unless specifically mentioned.

The target specification ETSI TS 102 223 [32] contains material that is outside of the scope of 3GPP requirements and the present document indicates which parts are in the scope and which are not.

A 3GPP ME may support functionality that is not required by 3GPP, but the requirements to do so are outside of the scope of 3GPP.

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document in the same Release as the present document.
