6.12 CAT session timeout 112

7 ENVELOPE commands 112
7.1 Void 112
7.2 Menu selection 112
7.2.0 Description 112
7.2.1 Procedure 112
7.2.2 Structure of ENVELOPE (MENU SELECTION) 112
7.3 Call Control by NAA 113
7.3.1 Call Control by NAA 113
7.3.1.1 Procedure for mobile originated calls 113
7.3.1.2 Void 113
7.3.1.3 Indication to be given to the user 114
7.3.1.4 Interaction with Fixed Dialling Number (FDN) 114
7.3.1.5 Support of Barred Dialling Number (BDN) service 115
7.3.1.6 Structure of ENVELOPE (CALL CONTROL) 115
7.4 Timer expiration 117
7.4.1 Description 117
7.4.2 Structure of ENVELOPE (TIMER EXPIRATION) 117
7.5 Event download 118
7.5.0 Overview 118
7.5.1 MT call event 118
7.5.1.1 Procedure 118
7.5.1.2 Structure of ENVELOPE (EVENT DOWNLOAD - MT call) 118
7.5.2 Call connected event 119
7.5.2.1 Procedure 119
7.5.2.2 Structure of ENVELOPE (EVENT DOWNLOAD - call connected) 119
7.5.3 Call disconnected event 120
7.5.3.1 Procedure 120
7.5.3.2 Structure of ENVELOPE (EVENT DOWNLOAD - call disconnected) 120
7.5.4 Location status event 121
7.5.4.1 Procedure 121
7.5.4.2 Structure of ENVELOPE (EVENT DOWNLOAD - Location status) 121
7.5.5 User activity event 122
7.5.5.1 Procedure 122
7.5.5.2 Structure of ENVELOPE (EVENT DOWNLOAD - User activity) 122

7.5.6 Idle screen available event 123
7.5.6.1 Procedure 123
7.5.6.2 Structure of ENVELOPE (EVENT DOWNLOAD - Idle screen available) 123
7.5.7 Card reader status event 124
7.5.7.1 Procedure 124
7.5.7.2 Structure of ENVELOPE (EVENT DOWNLOAD - Card reader status) 124
7.5.8 Language selection event 124
7.5.8.1 Procedure 124
7.5.8.2 Structure of ENVELOPE (EVENT DOWNLOAD - Language selection) 125
7.5.9 Browser termination event 125
7.5.9.1 Procedure 125
7.5.9.2 Structure of ENVELOPE (EVENT DOWNLOAD - Browser termination) 125
7.5.10 Data available event 126
7.5.10.1 Procedure 126
7.5.10.2 Structure of ENVELOPE (EVENT DOWNLOAD - Data available) 126
7.5.11 Channel status event 127
7.5.11.1 Procedure 127
7.5.11.2 Structure of ENVELOPE (EVENT DOWNLOAD - Channel status) 127
7.5.12 Access Technology Change Event 128
7.5.12.1 Procedure 128
7.5.12.2 Structure of ENVELOPE (EVENT DOWNLOAD - Access Technology Change) 128
7.5.13 Display parameters changed event 129
7.5.13.1 Procedure 129
7.5.13.2 Structure of ENVELOPE (EVENT DOWNLOAD - Display parameters changed) 129
7.5.14 Local Connection event 129
7.5.14.1 Procedure 129
7.5.14.2 Structure of ENVELOPE (EVENT DOWNLOAD - Local Connection) 130
7.5.15 Network Search Mode Change Event 130
7.5.15.1 Procedure 130
7.5.15.2 Structure of ENVELOPE (EVENT DOWNLOAD - Network Search Mode Change) 131
7.5.16 Browsing status event 131
7.5.16.1 Procedure 131
7.5.16.2 Structure of ENVELOPE (EVENT DOWNLOAD - Browsing status) 131
7.5.17 Frames Information changed event 132
7.5.17.1 Procedure 132
7.5.17.2 Structure of ENVELOPE (EVENT DOWNLOAD - Frames Information changed) 132
7.5.18 HCI connectivity event 133
7.5.18.1 Procedure 133
7.5.18.2 Structure of ENVELOPE (EVENT DOWNLOAD - HCI connectivity event) 133
7.5.19 Contactless state request 133
7.5.19.1 Procedure 133
7.5.19.2 Structure of ENVELOPE(EVENT DOWNLOAD - Contactless state request) 134
7.5.20 Profile Container 134
7.5.20.1 Procedure 134
7.5.20.2 Structure of ENVELOPE (EVENT DOWNLOAD - Profile Container) 135
7.5.21 Void 136
7.5.22 Poll Interval Negotiation 136
7.5.22.1 Procedure 136
7.5.22.2 Structure of ENVELOPE (EVENT DOWNLOAD – Poll Interval Negotiation) 137
7.6 MMS Transfer Status 137
7.6.1 Procedure 137
7.6.2 Structure of ENVELOPE (MMS Transfer Status) 138
7.7 MMS notification download 138
7.7.0 Introduction 138
7.7.1 Procedure 139
7.7.2 Structure of ENVELOPE (MMS notification download) 139
7.8 Terminal Applications 140
7.8.1 Description 140
7.8.2 Structure of ENVELOPE (TERMINAL APPLICATIONS) 140
7.9 Envelope Container 141
7.9.1 Description 141
7.9.2 Structure of ENVELOPE (ENVELOPE CONTAINER) 141

9.1 BER-TLV tags in terminal to UICC direction 202
9.2 BER-TLV tags in UICC to terminal direction 202
9.3 COMPREHENSION-TLV tags in both directions 203
9.4 Type of command and next action indicator 203

10 Allowed type of command and device identity combinations 204

11 Void 205

Annex A (normative): Support of CAT by terminal equipment 206

Annex B (informative): Example of DISPLAY TEXT proactive UICC command 208

Annex C (normative): Structure of CAT communications 209

Annex D (informative): Terminal display in proactive UICC session 210

Annex E (informative): Help information feature processing 211

Annex F (informative): Monitoring of events 212

Annex G (normative): Support of multiple card operation 213

Annex H (informative): Multiple card proactive command examples 214

Annex I (informative): Bearer independent protocol proactive command examples 215

Annex J (informative): WAP terminology 220

Annex K (informative): Use of CAT bearer independent protocol for local links Bluetooth case 221

K.0 Foreword 221
K.1 Service search command 221
K.2 Get service information command 221
K.3 OPEN CHANNEL command 221

Annex L (informative): Bluetooth service discovery protocol 224

L.0 Overview 224
L.1 Service attribute 225

Annex M (informative): Use of CAT bearer independent protocol for local links, server case 226

Annex N (informative): Browsing terminology 227

Annex O (informative): Use of USAT Bearer independent protocol for local links IrDA case 228

O.0 Foreword 228
O.1 Service Search command 228
O.2 Get Service Information command 228

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Smart Card Platform (SCP).

It is based on work originally done in the 3GPP in TSG-terminals WG3.

The contents of the present document are subject to continuing work within TC SCP and may change following formal TC SCP approval. If TC SCP modifies the contents of the present document, it will then be republished by ETSI with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

x the first digit:

0 early working draft;

1 presented to TC SCP for information;

2 presented to TC SCP for approval;

3 or greater indicates TC SCP approved document under change control.

y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.

z the third digit is incremented when editorial only changes have been incorporated in the document.

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

1 Scope

The present document defines the interface between the UICC and the terminal, and mandatory terminal procedures, specifically for "NAA Card Application Toolkit".

The Card Application Toolkit (CAT) is a set of generic commands and procedures for use by the ICC, irrespective of the access technology of the network. Within the scope of the present document, the UICC refers here to an ICC which supports at least one application in order to access a network. This application is called here Network Access Application (NAA).

The ICC is considered as a platform, which is either based on ETSI TS 102 221 [1] or ETSI TS 102 600 [38], here called "3G platform" or ETSI TS 151 011 [8], here called "2G platform".

NAA can be:

- a USIM application, as defined in ETSI TS 131 102 [6], which can reside only on a 3G platform;
- a SIM application, as defined in ETSI TS 151 011 [8], which can reside either on a 3G or a 2G platform;
- a TSIM application, as defined in ETSI TS 100 812 [i.2], which can reside only on a 3G platform;
- a ISIM application, as defined in ETSI TS 131 103 [36], which can reside only on a 3G platform;
- a CSIM application, as defined in 3GPP2 C.S0065-B [53];
- an R-UIM application, as defined in 3GPP2 C.S0023-D [30]; or
- other applications residing on a 3G platform or a 2G platform. Specifying the interface is to ensure interoperability between an ICC and a terminal independently of the respective manufacturers and operators.

The present document specifies as well mechanisms in order to expand the generic set of commands and procedures by access technology specific ones.

The present document defines:

- the commands;
- the application protocol;
- the mandatory requirements on the ICC and terminal for each procedure.

The present document does not specify any aspects related to the administrative management phase. Any internal technical realization of either the ICC or the terminal are only specified where these reflect over the interface. The present document does not specify any of the security algorithms that may be used.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

- In the case of a reference to a TC SCP document, a non-specific reference implicitly refers to the latest version of that document in the same Release as the present document.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.
