

# ETSI TS 123 280 V15.7.0 (2019-07)

TECHNICAL SPECIFICATION

**LTE;**  
**Common functional architecture to support mission critical**  
**services;**  
**Stage 2**  
**(3GPP TS 23.280 version 15.7.0 Release 15)**

## Reference

---

RTS/TSGS-0623280vf70

## Keywords

# Intellectual Property Rights

## Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

## Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

---

# Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found under <http://webapp.etsi.org/key/queryform.asp>.

---

# Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Modal verbs terminology.....	2
Foreword.....	12
1 Scope .....	13
2 References .....	13
3 Definitions, symbols and abbreviations .....	14
3.1 Definitions .....	14
3.2 Symbols.....	16
3.3 Abbreviations .....	16
4 Introduction .....	17
5 Assumptions and architectural requirements.....	17
5.1 Assumptions .....	17
5.1.1 Service continuity .....	17
5.1.2 Trust domain.....	18
5.2 Architectural requirements .....	18
5.2.1 General architectural requirements .....	18
5.2.2 Roaming requirements .....	18
5.2.3 UE-to-network relay MC service requirements .....	18
5.2.4 MC service user profile requirements .....	19
5.2.5 MC service group affiliation and MC service group de-affiliation .....	19
5.2.6 GCS AS requirements for the MC services .....	20
5.2.7 Bearer management .....	20
5.2.7.0 General .....	20
5.2.7.1 MBMS bearer management .....	21
5.2.7.2 EPS bearer considerations .....	21
5.2.8 External applications access to services in a MC system.....	22
5.2.9 Migration .....	22
5.2.9.1 General .....	22
5.2.9.2 PLMN utilisation.....	22
5.2.9.3 SIP core / IMS utilisation.....	23
5.2.10 Interconnection .....	23
5.2.10.1 General .....	23
5.2.10.2 Connectivity .....	23
5.2.10.3 Migration.....	24
5.2.10.4 Private calls .....	24
5.2.10.5 Group calls .....	24
5.2.10.6 Group configuration .....	24
5.2.10.7 MC system topology hiding .....	24
6 Involved business relationships.....	24
7 Functional model .....	27
7.1 General .....	27
7.2 Description of the planes .....	27
7.3 Functional model description .....	27
7.3.1 On-network functional model .....	27
7.3.2 Off-network functional model .....	31
7.4 Functional entities description.....	31
7.4.1 General.....	31
7.4.2 Application plane .....	31
7.4.2.1 General .....	31
7.4.2.2 Common services core .....	32
7.4.2.2.1 Configuration management client.....	32

7.4.2.2.2	Configuration management server.....	32
7.4.2.2.3	Group management client.....	32
7.4.2.2.4	Group management server.....	32
7.4.2.2.5	Identity management client .....	32
7.4.2.2.6	Identity management server.....	32
7.4.2.2.7	Key management client .....	33
7.4.2.2.8	Key management server .....	33
7.4.2.2.9	Location management client.....	33
7.4.2.2.10	Location management server.....	33
7.4.2.2.11	Migration management server.....	33
7.4.2.2.12	Functional alias management client.....	34
7.4.2.2.13	Functional alias management server.....	34
7.4.2.3	MC service .....	34
7.4.2.3.1	MC service client.....	34
7.4.2.3.2	MC service server.....	34
7.4.2.3.3	MC service user database .....	34
7.4.2.3.4	MC gateway server.....	35
7.4.3	Signalling control plane .....	35
7.4.3.1	SIP entities .....	35
7.4.3.1.1	Signalling user agent .....	35
7.4.3.1.2	SIP AS .....	35
7.4.3.1.3	SIP core .....	35
7.4.3.1.3.1	General.....	35
7.4.3.1.3.2	Local inbound / outbound proxy.....	35
7.4.3.1.3.3	Registrar finder .....	36
7.4.3.1.3.4	Registrar / application service selection.....	36
7.4.3.1.4	Diameter proxy.....	36
7.4.3.2	SIP database .....	37
7.4.3.2.1	General .....	37
7.4.3.2.2	SIP database logical functions.....	37
7.4.3.3	HTTP entities .....	38
7.4.3.3.1	HTTP client .....	38
7.4.3.3.2	HTTP proxy.....	38
7.4.3.3.3	HTTP server .....	38
7.5	Reference points.....	38
7.5.1	General reference point principle.....	38
7.5.2	Application plane .....	39
7.5.2.1	General .....	39
7.5.2.2	Reference point CSC-1 (between the identity management client and the identity management server) .....	39
7.5.2.3	Reference point CSC-2 (between the group management client and the group management server for configuration while UE is on-network) .....	39
7.5.2.4	Reference point CSC-3 (between the MC service server and the group management server).....	39
7.5.2.5	Reference point CSC-4 (between the configuration management client and the configuration management server for configuration while UE is on-network) .....	39
7.5.2.6	Reference point CSC-5 (between the MC service server and the configuration management server) .....	40
7.5.2.7	Reference point CSC-7 (between the group management servers) .....	40
7.5.2.8	Reference point CSC-8 (between the key management server and the key management client).....	40
7.5.2.9	Reference point CSC-9 (between the key management server and the MC service server) .....	40
7.5.2.10	Reference point CSC-10 (between the key management server and the group management server) .....	40
7.5.2.11	Reference point CSC-11 (between the configuration management client and the configuration management server for configuration while UE is off-network).....	40
7.5.2.12	Reference point CSC-12 (between the group management client and the group management server for configuration while UE is off-network).....	41
7.5.2.13	Reference point CSC-13 (between the configuration management server and the MC service user database) .....	41
7.5.2.14	Reference point CSC-14 (between the location management client and the location management server) .....	41
7.5.2.15	Reference point CSC-15 (between the location management server and the MC service server) .....	41
7.5.2.16	Reference point CSC-16 (between group management servers in different MC systems) .....	41

7.5.2.17	Reference point CSC-17 (between configuration management servers in different MC systems) .....	41
7.5.2.18	Reference point CSC-18 (between migration management servers in different MC systems) .....	42
7.5.2.19	Reference point MCX-1 (between MC service servers) .....	42
7.5.3	Signalling control plane .....	42
7.5.3.1	General .....	42
7.5.3.2	Reference point SIP-1 (between the signalling user agent and the SIP core) .....	42
7.5.3.3	Reference point SIP-2 (between the SIP core and the SIP AS) .....	42
7.5.3.4	Reference point SIP-3 (between the SIP core and SIP core) .....	43
7.5.3.5	Reference point HTTP-1 (between the HTTP client and the HTTP proxy) .....	43
7.5.3.6	Reference point HTTP-2 (between the HTTP proxy and the HTTP server) .....	43
7.5.3.7	Reference point HTTP-3 (between the HTTP proxy and HTTP proxy) .....	43
7.5.3.8	Reference point AAA-1 (between the SIP database and the SIP core) .....	43
7.5.3.9	Reference point AAA-2 (between the SIP core and Diameter proxy) .....	43
8	Identities .....	44
8.1	Application plane .....	44
8.1.1	Mission Critical user identity (MC ID) .....	44
8.1.2	MC service user identity (MC service ID) .....	44
8.1.3	MC service group identity (MC service group ID) .....	44
8.1.3.1	General .....	44
8.1.3.2	MC service group ID management (off-network operation) .....	45
8.1.4	MC system identity (MC system ID) .....	45
8.2	SIP signalling control plane .....	45
8.3	Relationship between identities in different planes .....	46
8.3.1	Relationship between MC service ID and public user identity .....	46
8.3.2	Relationship between MC service group ID and public service identity .....	46
9	Application of functional model to deployments .....	47
9.1	General .....	47
9.2	Architecture model and deployment scenarios for on-network operations .....	47
9.2.1	On-network architectural model .....	47
9.2.1.1	On-network architectural model diagram .....	47
9.2.1.2	Application services layer .....	48
9.2.1.2.1	Overview .....	48
9.2.1.2.2	Common services core .....	48
9.2.1.2.3	MC services .....	48
9.2.1.3	SIP core .....	49
9.2.1.4	EPS .....	49
9.2.1.5	UE 1 .....	49
9.2.1.6	UE 2 .....	49
9.2.2	Deployment scenarios .....	49
9.2.2.1	Administration of MC service, SIP core and EPS .....	49
9.2.2.1.1	General .....	49
9.2.2.1.2	Common administration of all planes .....	49
9.2.2.1.3	MC service provider separate from SIP core and EPS .....	50
9.2.2.1.4	MC service provider administers SIP core, separate from EPS .....	51
9.2.2.1.5	SIP core partially administered by both PLMN operator and MC service provider .....	51
9.2.2.1.6	PLMN operator administers SIP core with SIP identities administered by MC service provider .....	52
9.2.2.2	MC service user database, SIP database and HSS .....	53
9.2.2.3	Control of bearers by SIP core and MC service server .....	56
9.2.2.3.1	General .....	56
9.2.2.3.2	Control of bearers by SIP core .....	56
9.2.2.3.3	Control of bearers by MC service server .....	56
9.3	Architecture model for off-network operations .....	57
9.3.1	Off-network architectural model diagram .....	57
9.3.2	UE 3 .....	57
9.3.3	UE 4 .....	58
9.3.4	Offline common services server .....	58
9.4	Architecture model for roaming .....	58
10	Procedures and information flows .....	58
10.1	MC service configuration .....	58

10.1.1	General.....	58
10.1.1.1	MC service configuration on primary MC system.....	58
10.1.1.2	MC service configuration for migration to partner MC system.....	59
10.1.2	Information flows for MC service configuration.....	61
10.1.2.1	Store group configuration request.....	61
10.1.2.2	Store group configuration response.....	61
10.1.2.3	Get group configuration request.....	61
10.1.2.4	Get group configuration response.....	62
10.1.2.5	Subscribe group configuration request.....	62
10.1.2.6	Subscribe group configuration response.....	62
10.1.2.7	Notify group configuration request.....	62
10.1.2.8	Notify group configuration response.....	62
10.1.2.9	Get functional alias configuration request.....	63
10.1.2.10	Get functional alias configuration response.....	63
10.1.2.11	Subscribe functional alias configuration request.....	63
10.1.2.12	Subscribe functional alias configuration response.....	63
10.1.2.13	Notify functional alias configuration request.....	64
10.1.2.14	Notify functional alias configuration response.....	64
10.1.3	MC service UE configuration data.....	64
10.1.3.1	General.....	64
10.1.3.2	Procedures.....	64
10.1.3.3	Structure of UE configuration data.....	65
10.1.4	MC service user profile.....	65
10.1.4.1	General.....	65
10.1.4.2	Information flows for MC service user profile.....	66
10.1.4.2.1	Get MC service user profile request.....	66
10.1.4.2.2	Get MC service user profile response.....	66
10.1.4.2.3	Notification for MC service user profile data update.....	67
10.1.4.2.4	Get updated MC service user profile data request.....	67
10.1.4.2.5	Get updated MC service user profile data response.....	67
10.1.4.2.6	Update MC service user profile data request.....	67
10.1.4.2.7	Update MC service user profile data response.....	67
10.1.4.2.8	Update pre-selected MC service user profile request.....	68
10.1.4.2.9	Update pre-selected MC service user profile response.....	68
10.1.4.2.10	Update selected MC service user profile request.....	68
10.1.4.2.11	Update selected MC service user profile response.....	68
10.1.4.3	MC service user obtains the MC service user profile(s) from the network.....	69
10.1.4.3.1	MC service user receiving MC service in primary MC system.....	69
10.1.4.3.2	MC service user receiving MC service from a partner MC system.....	69
10.1.4.4	MC service user receives updated MC service user profile data from the network.....	71
10.1.4.5	MC service user updates MC service user profile data to the network.....	71
10.1.4.6	Updating the pre-selected MC service user profile.....	72
10.1.4.7	Updating the selected MC service user profile for an MC service.....	73
10.1.5	MC service group configuration management.....	75
10.1.5.1	Store group configurations at the group management server.....	75
10.1.5.2	Retrieve group configurations at the group management client.....	75
10.1.5.3	Subscription and notification for group configuration data.....	76
10.1.5.4	Structure of group configuration data.....	77
10.1.5.5	Dynamic data associated with a group.....	77
10.1.5.6	Subscription and notification for dynamic data associated with a group.....	77
10.1.5.6.1	Information flows for subscription and notification for dynamic data associated with a group.....	78
10.1.5.6.1.1	Subscribe group dynamic data request.....	78
10.1.5.6.1.2	Subscribe group dynamic data response.....	78
10.1.5.6.1.3	Notify group dynamic data request.....	78
10.1.5.6.1.4	Notify group dynamic data response.....	78
10.1.5.6.2	Procedure for subscription and notification for dynamic data associated with a group.....	78
10.1.6	MC service UE migration.....	79
10.1.6.1	MC service UE obtains migration connectivity information of partner MC system.....	79
10.1.6.2	Signalling plane registration for the MC service UE between the primary and the partner MC systems.....	79
10.1.7	Functional alias configuration management.....	81
10.1.7.1	Retrieve functional alias configurations from the functional alias management server.....	81

10.1.7.2	Subscription and notification for functional alias configuration data .....	82
10.2	Group management (on-network) .....	83
10.2.1	General.....	83
10.2.2	Information flows for group management .....	83
10.2.2.1	Group creation request .....	83
10.2.2.2	Group creation response.....	84
10.2.2.3	Group regroup request (group management client – group management server) .....	84
10.2.2.4	Group regroup response (group management server – group management client).....	84
10.2.2.5	Group regroup teardown request.....	85
10.2.2.6	Group regroup teardown response .....	85
10.2.2.7	Group creation notify .....	85
10.2.2.8	Group regroup notify.....	85
10.2.2.9	Group regroup teardown notify.....	85
10.2.2.10	Group regroup teardown notification .....	86
10.2.2.11	Group regroup teardown notification response .....	86
10.2.2.12	Group regroup request (group management server – group management server).....	86
10.2.2.13	Group regroup response (group management server – group management server) .....	86
10.2.2.14	Group regroup notification.....	86
10.2.2.15	Group regroup notification response.....	87
10.2.2.16	Group information query request .....	87
10.2.2.17	Group information query response.....	87
10.2.2.18	Group membership update request.....	87
10.2.2.19	Group membership update response .....	88
10.2.2.20	Group membership notification .....	88
10.2.2.21	Group deletion request .....	88
10.2.2.22	Group deletion response.....	88
10.2.2.23	Group deletion notification .....	89
10.2.2.24	Group information provision request .....	89
10.2.2.25	Group information provision response.....	89
10.2.2.26	Group information request .....	89
10.2.2.27	Group information response.....	90
10.2.2.28	Group information subscribe request .....	90
10.2.2.29	Group information subscribe response .....	90
10.2.2.30	Group information notify request.....	90
10.2.2.31	Group information notify response.....	91
10.2.3	Group creation .....	91
10.2.4	Group regrouping.....	92
10.2.4.1	Temporary group formation – group regrouping within an MC system .....	92
10.2.4.2	Temporary group formation involving multiple MC systems.....	93
10.2.4.3	Temporary group tear down involving multiple group host servers .....	95
10.2.4.4	Group regroup rules .....	97
10.2.5	Membership and affiliation list query .....	97
10.2.5.1	General .....	97
10.2.5.2	Procedure .....	97
10.2.6	Group membership .....	98
10.2.6.1	Group membership notification .....	98
10.2.6.2	Group membership update by authorized user.....	98
10.2.7	Group configuration for interconnection .....	99
10.2.7.1	Overview.....	99
10.2.7.2	Primary MC system provides group configuration to the partner MC system.....	100
10.2.7.3	Partner MC system requests group configuration from the primary MC system .....	101
10.2.7.4	Partner MC system subscribes to group configuration.....	102
10.2.7.5	Primary MC system notifies group configuration .....	103
10.2.8	Group deletion .....	104
10.3	Pre-established session (on-network) .....	105
10.3.1	General.....	105
10.3.2	Procedures.....	105
10.3.2.1	General.....	105
10.3.2.2	Pre-established session establishment .....	105
10.3.2.3	Pre-established session modification .....	106
10.3.2.4	Pre-established session release.....	108
10.4	Simultaneous session (on-network).....	109

10.4.1	General.....	109
10.5	Use of UE-to-network relay .....	109
10.5.1	UE-to-network relay service authorization .....	109
10.5.2	UE-to-network relay MC service.....	109
10.6	General user authentication and authorization for MC services.....	109
10.6.1	Primary MC system .....	109
10.6.2	Interconnection partner MC system.....	110
10.6.3	Migration to partner MC system.....	110
10.6.3.1	General .....	110
10.6.3.2	Information flows for migrated service authorization.....	111
10.6.3.2.1	Migration service authorization request .....	111
10.6.3.2.2	Migration service authorization response .....	111
10.6.3.3	Procedure .....	111
10.7	Use of MBMS transmission .....	113
10.7.1	General.....	113
10.7.2	Information flows for MBMS transmission.....	113
10.7.2.1	MBMS bearer announcement.....	113
10.7.2.2	MBMS listening status report .....	114
10.7.2.3	MBMS suspension reporting instruction.....	114
10.7.2.4	Discover bearer request.....	115
10.7.2.5	Discover bearer response .....	115
10.7.2.6	Media distribution request.....	115
10.7.2.7	Media distribution request response.....	116
10.7.2.8	Identify multicast participants request .....	116
10.7.2.9	Remove call from bearer request .....	116
10.7.2.10	Media distribution release .....	116
10.7.2.11	Media broadcasting notification.....	116
10.7.3	Procedures for MBMS usage.....	116
10.7.3.1	Use of pre-established MBMS bearers.....	116
10.7.3.1.1	General .....	116
10.7.3.1.2	Procedure.....	117
10.7.3.2	Use of dynamic MBMS bearer establishment .....	118
10.7.3.3	Switching from MBMS bearer to unicast bearer.....	119
10.7.3.4	Use of MBMS bearer for application level control signalling .....	120
10.7.3.4.1	Description .....	120
10.7.3.4.2	Procedure.....	121
10.7.3.5	MBMS bearer announcement over MBMS bearer.....	121
10.7.3.5.1	Description .....	121
10.7.3.5.2	Procedure.....	122
10.7.3.6	MBMS bearer quality detection .....	123
10.7.3.6.1	Description .....	123
10.7.3.6.2	Procedure.....	123
10.7.3.7	Service continuity in MBMS scenarios.....	124
10.7.3.7.1	General .....	124
10.7.3.7.2	Service continuity when moving from one MBSFN to another .....	124
10.7.3.7.3	Service continuity with a UE-to-Network relay .....	126
10.7.3.8	MBMS suspension notification.....	128
10.7.3.8.1	Description .....	128
10.7.3.8.2	Procedure.....	128
10.7.3.9	Multi-server bearer coordination.....	129
10.7.3.9.1	General .....	129
10.7.3.9.2	Procedures .....	129
10.7.3.9.2.1	MBMS bearer coordination independent on broadcasted media .....	129
10.7.3.9.2.2	MBMS bearer coordination within one group call.....	131
10.7.3.10	MBMS bearer event notification.....	133
10.7.3.10.1	General .....	133
10.7.3.10.2	Procedure.....	134
10.7.3.11	Use of FEC to protect MBMS transmissions .....	135
10.7.3.11.1	General .....	135
10.7.3.11.2	FEC encoding by the BM-SC.....	135
10.7.3.11.3	FEC encoding by the MC service server .....	136
10.7.3.12	Header compression over MBMS with ROHC.....	137

10.7.3.12.1	General .....	137
10.7.3.12.2	Header compression by the MC service server .....	137
10.7.3.12.3	Header compression by the BM-SC .....	138
10.8	Affiliation and de-affiliation to/from MC service group(s) .....	140
10.8.1	General .....	140
10.8.2	Information flows .....	140
10.8.2.1	MC service group affiliation request .....	140
10.8.2.2	MC service group affiliation request (MC service server – MC service server) .....	140
10.8.2.3	MC service group affiliation response .....	140
10.8.2.4	MC service group affiliation response (MC service server – MC service server) .....	141
10.8.2.5	Group affiliation status update .....	141
10.8.2.6	MC service group de-affiliation request .....	141
10.8.2.7	MC service group de-affiliation request (MC service server – MC service server) .....	141
10.8.2.8	MC service group de-affiliation response .....	142
10.8.2.9	MC service group de-affiliation response (MC service server – MC service server) .....	142
10.8.2.10	Group de-affiliation status update .....	142
10.8.2.11	MC service group affiliation change request .....	142
10.8.2.12	MC service group affiliation change response .....	143
10.8.2.13	MC service group de-affiliation notification .....	143
10.8.3	Affiliation .....	143
10.8.3.1	MC service group affiliation procedure .....	143
10.8.3.2	Affiliation to MC service group(s) defined in partner MC system without topology hiding .....	144
10.8.3.2.1	Functional description .....	144
10.8.3.2.2	Procedure .....	145
10.8.3.2a	Affiliation to MC service group(s) defined in partner MC system using topology hiding .....	146
10.8.3.2a.1	Functional description .....	146
10.8.3.2a.2	Procedure .....	146
10.8.4	De-affiliation from MC service group(s) .....	148
10.8.4.1	General .....	148
10.8.4.2	MC service group de-affiliation procedure .....	148
10.8.4.3	De-affiliation from MC service group(s) defined in partner MC service system .....	149
10.8.4.4	MC server initiated group de-affiliation procedure .....	150
10.8.4.5	MC server initiated group de-affiliation from group defined in partner MC service system .....	151
10.8.5	Remote change of affiliation .....	153
10.8.5.1	Remote change of affiliation for groups defined in primary MC system .....	153
10.8.5.1.1	Authorized user remotely changes another MC service user's affiliated MC service group(s) – mandatory mode .....	153
10.8.5.1.2	Authorized user remotely changes another MC service user's affiliated MC service group(s) – negotiated mode .....	154
10.8.5.2	Remote change of affiliation for groups defined in partner MC system .....	156
10.8.5.2.1	Authorized user remotely changes another MC service user's affiliated MC service group(s) defined in partner MC system – mandatory mode .....	156
10.9	Location management (on-network) .....	157
10.9.1	General .....	157
10.9.2	Information flows for location information .....	158
10.9.2.1	Location reporting configuration .....	158
10.9.2.2	Location information report .....	158
10.9.2.3	Location information request .....	158
10.9.2.4	Location reporting trigger .....	158
10.9.2.5	Location information subscription request .....	159
10.9.2.6	Location information subscription response .....	159
10.9.2.7	Location information notification .....	159
10.9.3	Procedure .....	160
10.9.3.1	Event-triggered location reporting procedure .....	160
10.9.3.2	On-demand location reporting procedure .....	161
10.9.3.3	Client-triggered location reporting procedure .....	161
10.9.3.4	Location reporting cancel procedure .....	162
10.9.3.5	Location information subscription procedure .....	163
10.9.3.6	Usage of location information procedure .....	163
10.9.3.6.1	Event-trigger location information notification procedure .....	163
10.9.3.6.2	On-demand usage of location information procedure .....	164
10.10	Emergency Alert .....	164

10.10.1	On-network emergency alert.....	164
10.10.1.1	General.....	164
10.10.1.2	MC service emergency alert.....	165
10.10.1.2.1	MC service emergency alert initiation.....	165
10.10.1.2.2	MC service emergency alert cancel.....	167
10.10.2	Off-network emergency alert.....	169
10.10.2.1	General.....	169
10.10.2.2	MC service emergency alert.....	169
10.10.2.2.1	Emergency alert initiation .....	169
10.10.2.2.2	Emergency alert cancel.....	170
10.11	MC service resource management (on-network).....	171
10.11.1	General.....	171
10.11.2	Request for unicast resources at session establishment .....	172
10.11.3	Request for modification of unicast resources .....	173
10.11.4	Management of multicast media bearers .....	174
10.11.5	Request for resources with shared priority .....	174
10.11.5.1	General.....	174
10.11.5.2	Procedure .....	174
10.11.6	Request for media resources from MC service server .....	175
10.11.6.1	General.....	175
10.11.6.2	Procedure .....	176
10.12	Priority Management.....	177
10.12.1	General.....	177
10.12.2	Information flows .....	177
10.12.2.1	MC priority request.....	177
10.12.3	Procedure for priority coordination between multiple MC service servers .....	177
10.13	Functional alias management (on-network) .....	179
10.13.1	General.....	179
10.13.2	Information flows for functional alias management.....	179
10.13.2.1	Functional alias information query request .....	179
10.13.2.2	Functional alias information query response.....	179
10.13.2.3	Functional alias activation request .....	179
10.13.2.4	Functional alias activation response.....	180
10.13.2.5	Functional alias de-activation request.....	180
10.13.2.6	Functional alias de-activation response.....	180
10.13.2.7	Functional alias status notification.....	180
10.13.2.8	Functional alias take over request.....	181
10.13.2.9	Functional alias take over response.....	181
10.13.2.10	Functional alias revoke notification .....	181
10.13.3	Authorised MC service user retrieves active functional alias(es) for a certain MC service user.....	181
10.13.4	MC service user activates functional alias(es) within an MC system.....	182
10.13.5	MC service user de-activates functional alias(es) within an MC system.....	183
10.13.6	Authorised MC service user takes over functional alias(es) within an MC system.....	184
10.14	Generic procedures for interconnection .....	185
10.14.1	General.....	185
10.14.2	Generic call procedure with topology hiding.....	185
10.14.2.1	General .....	185
10.14.2.2	Procedure for calls with topology hiding .....	185
10.14.3	Generic call procedure for enforcement of local MC service group configuration.....	187
10.14.3.1	General .....	187
10.14.3.2	MC service group call initiated in the partner MC system of the MC service group.....	187
10.14.3.3	MC service group call request received from the primary MC system of the MC service group .....	188
10.14.4	Generic call procedure for media replication in participating MC system in MC service group calls .....	189
10.14.4.1	General.....	189
10.14.4.2	Media replication in the partner MC system of the MC service group .....	189
<b>Annex A (normative): Configuration data for MC services.....</b>		<b>191</b>
A.1	General .....	191
A.2	MC service UE configuration data.....	192
A.3	MC service user profile configuration data.....	192

A.4	Group configuration data.....	192
A.5	MC service configuration data.....	197
A.6	Initial MC service UE configuration data.....	197
<b>Annex B (informative):</b>	<b>Service continuity for MC service .....</b>	<b>199</b>
B.1	Service continuity between on-network MC service and UE-to-network relay MC service .....	199
<b>Annex C (informative):</b>	<b>Change history .....</b>	<b>202</b>
History .....		206

**iTeh STANDARD PREVIEW**

# Foreword

This Technical Specification has been produced by the 3<sup>rd</sup> Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
  - 1 presented to TSG for information;
  - 2 presented to TSG for approval;
  - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.
