# Intellectual Property Rights

## Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

## Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

**DECT™**, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™** and **LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

# Foreword

This draft European Standard (EN) has been produced by ETSI Technical Committee Environmental Engineering (EE), and is now submitted for the combined Public Enquiry and Vote phase of the ETSI EN Approval Procedure.

The present document is part 5 of a multi-part deliverable covering Environmental Engineering (EE); Assessment of material efficiency of ICT network infrastructure goods (circular economy), as identified below: <https://standards.iteh.ai/document/etsi/303-800-5-v1-1-0-2024-08>

Part 2: "Server and data storage product secure data deletion functionality";

Part 3: "Server and data storage product availability of firmware and of security updates to firmware";

**Part 5: "Server and data storage product disassembly and disassembly instruction".**

NOTE: Part 1 and Part 4 have been cancelled as their intended content is already covered by other standards.

### Proposed national transposition dates

Date of latest announcement of this EN (doa):	3 months after ETSI publication
Date of latest publication of new National Standard or endorsement of this EN (dop/e):	6 months after doa
Date of withdrawal of any conflicting National Standard (dow):	6 months after doa

---

## Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

---

## Introduction

The present document contains methods to assess the ability to disassemble certain key parts of servers and data storage products and the provision of information on these disassembly operations. The present document places a special emphasis on aspects relevant to the circular economy, such as fostering durability and reparability, in particular by third parties (such as spare parts repairers and maintenance).

---

# 1 Scope

The present document specifies methods to measure the ability of the following products to be disassembled:

- 1) servers;
- 2) data storage equipment.

The present document covers:

- i) The ability to disassemble, with particular regard to assessing that joining, fastening or sealing techniques do not prevent the disassembly for repair or reuse purposes.
- ii) The provision of instructions on the disassembly operations, including the type of operation, the type and number of fastening technique(s) to be unlocked and the tool(s) required.

The following products are out of scope of the present document:

- servers intended for embedded applications;
- servers classified as small-scale servers in terms of Regulation (EU) No 617/2013 [i.4];
- servers with more than four processor sockets;
- server appliances;
- large servers;
- fully fault tolerant servers;
- network servers;
- small data storage products;
- large data storage products.

The decision whether a product should be repaired, reused or upgraded, is out of scope. It is dependent on a range of factors including the various environmental aspects and other relevant considerations, such as safety and health, technical requirements for functionality, quality and performance of the server or storage product.

NOTE: See Directive 2009/125/EC [i.1].

---

## 2 References

### 2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <https://docbox.etsi.org/Reference/>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

Not applicable.
