

**SLOVENSKI STANDARD**  
**SIST EN 300 220-2 V3.3.1:2025**  
**01-maj-2025**

---

**Naprave kratkega dosega (SRD), ki delujejo v frekvenčnem območju od 25 MHz do 1000 MHz z močnostnimi nivoji do 500 mW e.r.p. - 2. del: Harmonizirani standard za dostop do radijskega spektra za nespecifično radijsko opremo**

Short Range Devices (SRD) operating in the frequency range 25 MHz to 1 000 MHz with power levels ranging up to 500 mW e.r.p. - Part 2: Harmonised Standard for access to radio spectrum for non specific radio equipment

# Intellectual Property Rights

## Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the [ETSI IPR online database](#).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

## Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

**DECT™**, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™**, **LTE™** and **5G™** logo are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

## Foreword

This final draft Harmonised European Standard (EN) has been produced by ETSI Technical Committee Electromagnetic compatibility and Radio spectrum Matters (ERM), and is now submitted for the Vote phase of the ETSI Standardisation Request deliverable Approval Procedure (SRdAP).

The present document has been prepared under the Commission's standardisation request C(2015) 5376 final [i.5] to provide one voluntary means of conforming to the essential requirements of Directive 2014/53/EU on the harmonisation of the laws of the Member States relating to the making available on the market of radio equipment and repealing Directive 1999/5/EC [i.2].

Once the present document is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of the present document given in Table A.1 confers, within the limits of the scope of the present document, a presumption of conformity with the corresponding essential requirements of that Directive and associated EFTA regulations.

For non EU countries the present document may be used for regulatory (Type Approval) purposes.

<b>Proposed National transposition dates</b>	
Date of latest announcement of this EN (doa):	3 months after ETSI publication
Date of latest publication of new National Standard or endorsement of this EN (dop/e):	6 months after doa
Date of withdrawal of any conflicting National Standard (dow):	36 months after doa

## Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

---

## Introduction

The present document is part 2 of a multi-part deliverable covering Short Range Devices (SRD) operating in the frequency range 25 MHz to 1 000 MHz.

Compared to earlier versions, the concept of wanted channel is replaced by Operating Channel for all equipment, equipment transmitting analog voice are not anymore excluded from the scope, a clarification has been made regarding the maximum occupied bandwidth requirement which is now split into two different requirements: occupied bandwidth and transmitter frequency stability in order to clearly separate the impact of Tx frequency drift on the transmitted signal, from the spectrum broadening due to modulation. Out of band transmission masks have also been split into two different requirements, one spectrum mask applying to the operating channel and a separate spectrum mask applying to the permitted frequency band. Adjacent channel power limits have been reviewed as a discrepancy in values was corrected. New receiver requirements have been added according to the ETSI EG 203 336 [i.4] on Rx parameters. Some of these parameters were previously only applicable to specific life critical application with extremely high receiver performances also called Receiver Category 1. Although the requirements are now applied generally, the limits have been adapted to non specific SRD category. Tests for timing compliance of equipment using polite spectrum access have been added.

The intended use of radio equipment is provided in equipment documentation according to article 10 of the Radio Equipment Directive 2014/53/EU [i.2].

The present document is structured as follows:

- Clause 2 provides references.
- Clause 3 provides definitions of terms, symbols and abbreviations used.
- Clause 4 provides operating conditions and technical requirements specification.
- Clause 5 provides testing for compliance with technical requirements.
- Annex A (informative) provides the relationship between the present document and the essential requirements of Directive 2014/53/EU [i.2].
- Annex B (normative): EU wide harmonised national radio interfaces from 25 MHz to 1 000 MHz.
- Annex C (normative): National Radio Interfaces not EU wide harmonised.
- Annex D (normative): Test sites and arrangements for radiated measurement.
- Annex E (normative): Test fixture.
- Annex F (informative): Guideline for operating channel.
- Annex G (informative): Properties of EUT.
- Annex H (informative): Maximum measurement uncertainty.
- Annex I (informative): Selection of technical parameters.
- Annex J (informative): Bibliography.
- Annex K (informative): Change history.

---

# 1 Scope

The present document specifies technical requirements, limits and test methods for Short Range Devices in the non-specific category operating in the frequency range 25 MHz to 1 000 MHz.

The non specific SRD category is defined by the EU Commission Decision 2019/1345/EU [i.3] as:

*"The non-specific short-range device category covers all kinds of radio devices, regardless of the application or the purpose, which fulfil the technical conditions as specified for a given frequency band. Typical uses include telemetry, telecommand, alarms, data transmissions in general and other applications".*

These radio equipment types are capable of transmitting up to 500 mW effective radiated power and operating indoor or outdoor.

NOTE: The relationship between the present document and the essential requirements of article 3.2 of Directive 2014/53/EU [i.2] is given in Annex A.

---

## 2 References

### 2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found in the [ETSI docbox](https://standards.iteh.ai).

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

Not applicable.

### 2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.
