Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 61, *Plastics*, Subcommittee SC 2, *Mechanical properties*.

Plastics — Acquisition and presentation of comparable single-point data —

Part 1: Moulding materials

AMENDMENT 1

Page 2, Clause 2

Delete “ISO 3167, *Plastics — Multipurpose test specimens*” and add “ISO 20753, *Plastics — Test specimens*”.
Add the year of publication to “IEC 60093” to read “IEC 60093:1980”.

Page 5, Table 2

In the “Specimen type” column, for lines 2.1 to 2.9, replace “ISO 3167” by “ISO 20753”.

STANDARD PREVIEW
(standards.iteh.ai)

Page 6, Table 2

In line 2.16 (“Puncture impact behaviour”), in the third column, replace the symbol W_P by E_P .

In the “Specimen type” column, for lines 3.7 and 3.8, replace “ISO 3167” by “ISO 20753”.

In the “Specimen type” column, for lines 3.10 and 3.12, (“Burning behaviour”), replace “Greater thickness h ” by “Additional thickness h ”.

Page 7, Table 2

In the “Specimen type” column, for lines 4.1 to 4.6, delete “(see Note 4)”.

In line 4.6 (“Surface resistivity”), last column, replace “Use contacting line electrodes 1 mm to 2 mm wide, 50 mm long and 5 mm apart” by:

“Use contacting line electrodes 1 mm to 2 mm wide, 50 mm long and 5 mm apart or circular electrodes as shown in IEC 60093:1980, Figure 2”

Page 8, Notes to Table 2

In Note 4, fourth line, replace “ISO 3167” by “ISO 20753”.

In Note 5, first line, replace “ISO 3167” by “ISO 20753”.

In Note 5, first line, second sentence, replace “Type A” by “Type A1”.

In Note 5, fourth line, replace “Type B” by “Type A2”.
