FINAL DRAFT
FprEN 267

December 2016

ICS 27.060.10

Will supersede EN 267:2009+A1:2011

English Version

Forced draught burners for liquid fuels

Brûleurs à air soufflé pour combustibles liquides

Gebläsebrenner für flüssige Brennstoffe

This draft European Standard is submitted to CEN members for unique acceptance procedure. It has been drawn up by the Technical Committee CEN/TC 47.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

Introduction		11
1	Scope.....	12
2	Normative references.....	12
3	Terms and definitions	16
3.1	General definitions.....	16
3.2	Fuel flow rate and heat input.....	17
3.3	Combustion chamber, burner head and test rig.....	18
3.4	Composition of the gaseous combustion products	19
3.5	Adjusting, control and safety devices	20
3.6	Sequencing.....	21
3.7	Diagrams	24
4	Classification, constructional and operational requirements – safety requirements and/or protective measures	25
4.1	Types of atomization.....	25
4.1.1	Mechanical atomization by pressurization of the combustion liquid.....	25
4.1.2	Atomization by auxiliary fluid.....	25
4.2	Methods of control of automatic or semi-automatic oil burners.....	25
4.2.1	On-off control (single stage burner)	25
4.2.2	Multi-stage control (two and multi-stage burner).....	25
4.2.3	Modulating control (modulating burner)	25
4.3	Means of ignition	25
4.3.1	Automatic electric ignition	25
4.3.2	Automatic ignition with liquid or gaseous fuels	26
4.4	Construction.....	26
4.4.1	General.....	26
4.4.2	Design.....	26
4.4.3	Accessibility for maintenance and use	27
4.4.4	Soundness.....	27
4.4.5	Materials.....	27
4.4.6	Mounting	28
4.4.7	Connections.....	28
4.4.8	Pressure test points.....	28
4.5	Equipment	28
4.5.1	Motors, fans and movable parts.....	28
4.5.2	Electrical safety.....	28
4.5.3	Air flow control device	29
4.5.4	Fuel line components.....	29
4.5.5	Fuel preheating.....	31
4.5.6	Ignition device.....	31
4.5.7	Automatic burner control unit.....	34
4.6	Functional and operational requirements	34
4.6.1	General function requirements	34
4.6.2	Ensuring adequate oil pre-heating	35
4.6.3	Start heat input and safety times.....	35
4.6.4	Non-volatile lock-out, recycling and ignition restoration of the oil burner	36

4.6.5	Start gas ignition	36
4.6.6	Main burner ignition	36
4.6.7	Energizing of the safety shut-off valve for the oil supply	36
4.6.8	Flame failure response time	36
4.6.9	Total closing time	36
4.6.10	Burner shut-down	36
4.6.11	Resistance of the burner to over-heating	37
4.6.12	Temperatures of the control and safety devices	37
4.6.13	Surface temperature	38
4.6.14	Ignition, operation and flame stability	38
4.6.15	Heat input range of the burner	38
4.6.16	Dual-fuel burner	38
4.6.17	Remote reset from lock-out	38
4.7	Working diagram and test diagram	39
4.7.1	Working diagram	39
4.7.2	Test diagram	39
4.7.3	Diagrams	39
4.7.4	Determination of the flame stability and safe range of operation	40
4.8	Combustion products quality	40
4.8.1	Combustion	40
4.8.2	Measurements	41
4.8.3	Smoke number (see Annex A)	41
4.8.4	Unburned hydrocarbons (see Annex D)	41
4.8.5	Emission classes for NO _x and CO	41
4.8.6	Starting characteristics	42
4.8.7	Combustion quality of the combustion products for other liquid fuels	42
4.8.8	Excess air ratio λ	42
4.9	Machine safety requirements and/or protective measures	43
5	Testing	43
5.1	General	43
5.1.1	Verification of burner design and combustion testing	43
5.1.2	Verification of machine safety	43
5.2	Test room	44
5.3	Test rig	44
5.3.1	General	44
5.3.2	Test rig $\leq 2,4$ MW heat input	44
5.3.3	Test rig $> 2,4$ MW heat input	46
5.4	Measuring equipment	48
5.4.1	General	48
5.4.2	Determination of the CO ₂ or O ₂ as well as NO _x , CO and C _x H _y contents of the combustion gases	49
5.4.3	Determination of the smoke number	49
5.5	Measuring accuracy	49
5.5.1	Measurement accuracy of the measuring devices	49
5.5.2	Measurement accuracy during test	50
5.6	Test conditions	50
5.6.1	Fuel to be used	50
5.6.2	Testing	51
5.7	Test programme	51
5.7.1	Structural testing	51
5.7.2	Functional tests	51
5.7.3	Starting test	52
5.7.4	Ignition	53

FprEN 267:2016 (E)

5.7.5	Safety times	54
5.7.6	Auxiliary electricity consumption (ErP).....	54
5.7.7	Sound power level, L_{wa} (ErP).....	55
5.7.8	Tests to be carried out on soundness and devices.....	55
5.7.9	Tests to be carried out on the test diagrams.....	55
5.7.10	Result of the completed tests, test report	59
5.7.11	Electrical voltage conditions.....	59
5.7.12	Testing during continuous operation in the case of multistage or modulating control burners	59
5.7.13	Burners with separate fan	59
5.8	Replacement of individual parts and equivalent components.....	60
6	Marking and labelling.....	60
6.1	General.....	60
6.2	Data plate	60
6.3	Other marking.....	60
6.4	Instructions for installation, adjustment, maintenance and operation.....	61
6.5	Packaging.....	61
Annex A	(normative) Smoke number	63
A.1	Apparatus.....	63
A.2	Smoke measuring.....	63
A.3	Determination of the smoke number	63
Annex B	(normative) Determination of combustion characteristics — Carbon monoxide and nitrogen oxides, conversion and corrections	65
B.1	CO content (Q_{CO}), calculation from ml/m ³ into mg/kWh.....	65
B.2	NO _x content (Q_{NO_x}), calculation from ml/m ³ into mg/kWh.....	66
B.3	Correction for the influence of combustion air temperature and humidity on NO _x emissions Q_{NO_x}	67
B.4	Correction of the influence of the nitrogen content of fuel oil in case of NO _x -emissions.....	67
B.5	NO _x mean value for evaluating the NO _x classes.....	68
B.6	Other conversion factors for emissions, calculated from ml/m ³ into mg/m ³ at 3 % O ₂ reference flue gas conditions.....	68
Annex C	(informative) Void	69
Annex D	(normative) FID measuring method for recording the unburned hydrocarbons.....	70
D.1	Measuring system	70
D.2	Starting.....	70
Annex E	(informative) Conformity evaluation.....	71
E.1	Test laboratories and test samples, procedure.....	71
E.1.1	Test laboratories	71
E.1.2	Test samples	71
E.2	Types of test and test documents for oil burners.....	71
E.2.1	Type test.....	71

E.2.2	Type test in the overall system	71
E.2.3	Drawing test	71
E.2.4	Supplementary test	72
E.2.5	Test documentation for oil burners	72
Annex F (informative)	Examples for equipping of burners	74
F.1	Burners \leq 400 kW	74
F.2	Burners > 400 kW	76
Annex G (informative)	Other fuels	78
Annex H (informative)	Specific additional requirements and limitations for use of EN 267 burners for industrial applications	79
H.1	Pre-heating of the combustion air	79
H.2	Continuous working of the forced draught fan	79
H.3	Variable excess of combustion air	79
H.4	Burner with spark ignition	79
H.5	Air filtering	79
H.6	Electrical equipment and EMC-compatibility	79
Annex I (informative)	Check of the air proving device	80
Annex J (normative)	Machine related hazards - additional safety requirements and/or protective measures	81
J.1	General	81
J.2	List of significant hazards	81
J.3	Safety requirements and /or protective measures	81
J.3.1	General	81
J.3.2	Additional requirements	84
J.3.2.1	Mechanical safety, stability and control devices	84
J.3.2.2	Motors, fans and movable parts	84
J.3.2.3	Electrical safety	84
J.3.2.4	Noise reduction	84
J.4	Verification of machine safety requirements and/or protective measures	84
J.5	Information for use	85
J.5.1	General	85
J.5.2	Instructions for installation, adjustment, maintenance	85
Annex K (normative)	Additional requirements for burners with pressurized parts and burners firing pressurized bodies as defined in the Pressure Equipment Directive (PED) 2014/68/EU	86
K.1	General	86
K.2	Pressurized parts	87
K.2.1	Design	87

FprEN 267:2016 (E)

K.2.2	Materials.....	87
K.2.3	Permanent joints.....	87
K.3	Electrical safety and fuel line components	87
K.3.1	Electrical safety.....	87
K.3.2	Fuel line components.....	88
K.4	Air proving device.....	88
K.5	Automatic burner control unit.....	88
K.6	General functions requirements	88
K.7	Protection of the oil and air supply	89
K.8	External safety limiter.....	89
K.9	Design according to Annex L in conjunction with EN 60204-1:2006	89
K.9.1	General.....	89
K.9.2	Pressure control.....	90
K.9.3	Burner control and flame detection.....	90
K.9.4	Safe shut-off of the oil supply.....	90
K.9.5	Air/fuel ratio control	90
K.9.6	Integration of the superior safety equipment of the boiler and of the firing system.....	90
K.10	Consideration: Safety life cycle	90
K.11	Tests of pressurized parts.....	91
K.11.1	Component pressure strength test.....	91
K.11.2	Component design mechanical deformation test.....	92
K.11.3	Component design welded joint test.....	92
K.11.4	External soundness	92
K.12	Marking.....	92
K.12.1	Data plate.....	92
K.12.2	Other marking.....	92
K.13	Instructions for installation, adjustment, maintenance and operation.....	92
Annex L (normative) Electrical requirements – modifications to EN 60204-1.....		94
L.1	Scope.....	94
L.2	Normative references.....	94
L.3	Terms and definitions	94
L.3.1	Protective system.....	94
L.3.2	Safety device	95
L.3.3	Sensor.....	95
L.3.4	Protective equipment.....	95
L.3.5	Actuating element.....	95
L.3.6	Control system	95
