# iTeh STANDARD PREVIEW (standards.iteh.ai)

### **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 29, Small tools, Subcommittee SC 8, Tools for pressing and moulding.

ISO 9448-42013

This second edition results from the reinstatement of ISO 9448-4-1991; which was withdrawn in 2006 and with which it is technically identical. 7df00a773a7b/iso-9448-4-2013

ISO 9448 consists of the following parts, under the general title *Tools for pressing — Guide bushes*:

- Part 1: Forms
- Part 2: Form A, gliding bushes, plain, type 1
- Part 3: Form B, ball cage bushes, plain, type 1
- Part 4: Form C, gliding bushes, headed, type 1
- Part 5: Form D, ball cage bushes, headed, type 1
- Part 6: Form E, gliding bushes, flanged, type 1
- Part 7: Form F, ball cage bushes, flanged, type 1
- Part 8: Form G, gliding bushes, stepped, type 1
- Part 9: Form B, ball cage bushes, plain, type 2
- Part 10: Form E, gliding bushes, flanged, type 2
- Part 11: Form F, ball cage bushes, flanged, type 2

### Tools for pressing — Guide bushes —

### Part 4:

# Form C, gliding bushes, headed, type 1

### 1 Scope

This part of ISO 9448 specifies the main dimensions and tolerances, in millimetres, of guide bushes of form C, headed gliding bushes, type 1, intended for use in press tools and to be mounted in the clamp plate with transition fit and fixed to the plate by means of screws.

It gives guidance on the materials, and specifies the hardness and the designation of bushes in accordance with this part of ISO 9448.

#### 2 Dimensions

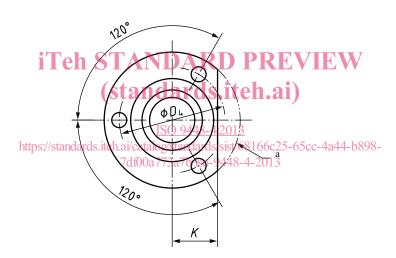

The dimensions of type 1 headed gliding bushes (form C) shall conform to the indications of <u>Figure 1</u> and Table 1.

Details not stated, such as chamfers, radii and lubrication grooves, are left to the manufacturer's discretion.

(standards.iteh.ai)

Ra0,8  $\phi D_2$   $\phi D_1$   $\phi D_6$   $\phi D_6$ 

Surface roughness values in micrometres

Left to the manufacturer's discretion.

#### 3 Material

The material is left to the manufacturer's discretion and the hardness shall be 60  $^{+2}_{\phantom{0}0}$  HRC.

### 4 Designation

A guide bush in accordance with this part of ISO 9448 shall be designated by:

- a) "Guide bush";
- b) a reference to this part of ISO 9448, i.e ISO 9448-4;
- c) its form;
- d) its guiding diameter,  $D_1$ , in millimetres;
- e) its length,  $l_1$ , in millimetres.

EXAMPLE A guide bush of form C, headed gliding bush, type 1 of guiding diameter  $D_1$  = 16 mm and of length  $l_1$  = 25 mm is designated as follows:

#### Guide bush ISO 9448-4 C - 16 × 25

a Intended to fit into a hole having a tolerance of H7.48-4.2013
