This European Standard was approved by CEN on 19 October 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

EN 17072:2018 (E)**European foreword**

This document (EN 17072:2018) has been prepared by Technical Committee CEN/TC 252 “Child care articles”, the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2019, and conflicting national standards shall be withdrawn at the latest by June 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under Mandate M/464 given to CEN by the European Commission and the European Free Trade Association.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

[SIST EN 17072:2019](https://standards.iteh.ai/catalog/standards/sist/50c73bc4-9fcb-4610-8b41-a7dc0e5d8081/sist-en-17072-2019)

<https://standards.iteh.ai/catalog/standards/sist/50c73bc4-9fcb-4610-8b41-a7dc0e5d8081/sist-en-17072-2019>

1 Scope

This document specifies safety requirements and test methods for children's bath tubs and stands and for non-standalone bathing aids that are designed and intended to be used only in conjunction with a children's bath tub.

This document does not cover children's bath tubs and stands and non-standalone bathing aids designed for children with special needs.

NOTE 1 Standalone bathing aids are covered in EN 17022.

NOTE 2 Where the product has several functions or can be converted into another function it is due to comply with relevant standard(s).

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 71-3, *Safety of toys — Part 3: Migration of certain elements*

EN ISO 291, *Plastics — Standard atmospheres for conditioning and testing (ISO 291)*

ISO 7619-1, *Rubber, vulcanized or thermoplastic — Determination of indentation hardness — Part 1: Durometer method (Shore hardness)*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1

children's bath tub

product providing containment of water by itself, designed for bathing children, which can be used as stand-alone product or combined with stands

Note 1 to entry: A bath tub can also be foldable or can comprise integral parts that can be folded or adjusted (e.g. foldable legs).

Note 2 to entry: When the wording "bath tub" is used in the standard it refers to children's bath tubs unless otherwise stated.

3.2

stand

static structure, not integrated into the children's bath tub, designed to accommodate, support and elevate a children's bath tub

Note 1 to entry: A stand can either be standalone or be designed to be fitted over an adult bath tub.

EN 17072:2018 (E)

3.3

non-standalone bathing aid

product, that does not provide containment of water by itself and requires a child's bath tub to stand

Example: Figure 1 shows an example of a non-standalone bathing aid.

**Key**

- A non-standalone bathing aid
- B child's bath tub

Figure 1 — Example of non-standalone bathing aids
(standards.iteh.ai)

3.3.1

non-standalone bath cradle

non standalone bathing aid designed to keep a child in a reclined position during bathing

Note 1 to entry: These products are intended for use from birth and until the child is able to sit upright unassisted.

3.3.2

non-standalone bath seat

non-standalone bathing aid designed to keep a child in a seated position during bathing

Note 1 to entry: These products are intended for use with a child who is able to sit upright unassisted and until the child begins pulling up to a standing position.

3.4

integrated bath cradle

non-removable part of a children's bath tub designed to keep a child in a reclined position during bathing. See Figure 2.

Note 1 to entry: These products are intended for use from birth and until the child is able to sit upright unassisted.

Figure 2 — Example of integrated bath cradle

4 Test equipment

4.1 Test probes for finger entrapment

4.1.1 Test probes with hemispherical end

Probes made from plastic or other hard, smooth material of diameters $(7_{-0,1}^0)$ mm and $(12_{0}^{+0,1})$ mm with a full hemispherical end that can be mounted on a force-measuring device, see Figure 3.

Mesh probe made from plastic or other hard, smooth material as shown in Figure 4.

Dimensions in millimetres

Key

Probe type	7 mm probe	12 mm probe
Diameter A	$7_{-0,1}^0$	$12_{0}^{+0,1}$
Radius RB	half of diameter A	half of diameter A
1	Line scribed around circumference showing depth of penetration	

Figure 3 — Test probes with hemispherical end

EN 17072:2018 (E)

**Key**

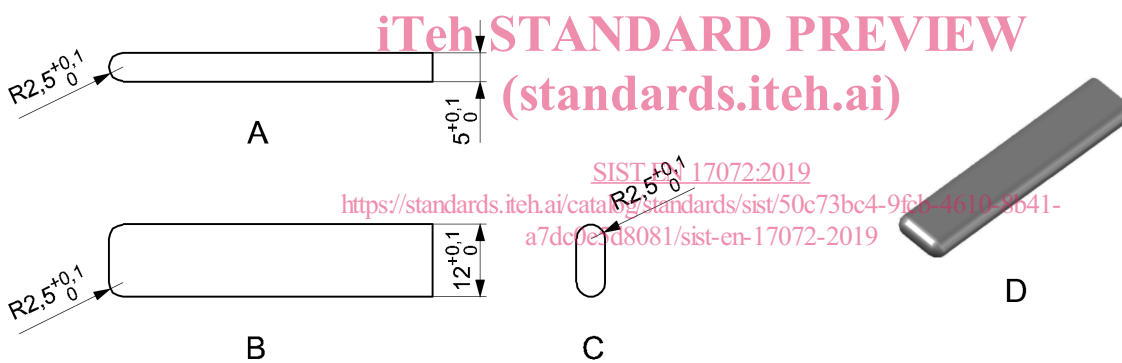

Probe type	mesh probe
Diameter A	$7^{0}_{-0,1}$
Diameter B	$5,6^{0}_{-0,1}$
Radius RB	half of diameter B

Figure 4 — Test probe for mesh

4.1.2 Shape assessment probe

Probe made from plastics or other hard, smooth material with the dimensions shown in Figure 5.

Dimensions in millimetres

4.3 Test mass A

A rigid cylinder (160 ± 5) mm in diameter and (300 ± 5) mm in height, having a mass of 9 kg and with its centre of gravity in the centre of the cylinder. All edges shall have a radius of (5 ± 1) mm. Two anchorage points shall be provided. These shall be positioned ($150 \pm 2,5$) mm from the base and at 180° to each other around the circumference (see Figure 9).
