AMENDMENT 1
2012-12-01

**Motorcycles — Methods for setting running
resistance on a chassis dynamometer**

AMENDMENT 1

*Motorcycles — Méthodes pour fixer la résistance à l'avancement sur un
banc dynamométrique*

Amendement 1

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 11486:2006 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 22, *Motorcycles*.

Motorcycles — Methods for setting running resistance on a chassis dynamometer

AMENDMENT 1

Page 5, 7.2 Ambient conditions for the road test

Replace the third paragraph with the following:

Standard ambient conditions shall be as follows:

- pressure, p_0 : 100 kPa;
- temperature, T_0 : 293 K;
- relative air density, d_0 : 0,9197;
- air volumetric mass, ρ_0 : 1,189 kg/m³.
