Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 16047:2005 was prepared by Technical Committee ISO/TC 2, *Fasteners*, Subcommittee SC 12, and by Technical Committee CEN/TC 185, *Fasteners* in collaboration.

Fasteners — Torque/clamp force testing

AMENDMENT 1

Page 1, Scope

In the second paragraph, replace “... whose mechanical properties are specified in ISO 898-1, ISO 898-2 or ISO 898-6, having ISO metric threads with thread sizes M3 to M39.” with “... whose mechanical properties are specified in ISO 898-1 or ISO 898-2, having ISO metric threads with thread sizes M3 to M39.”.

In the third paragraph, delete “or threaded fasteners having additional self-locking features”.

Page 1, Normative references

Delete the reference to ISO 898-6.

Page 3, Table 1

In the ninth row for symbol F_p , replace “Proof load according to ISO 898-1, ISO 898-2 or ISO 898-6, whichever is relevant” with “Proof load according to ISO 898-1 or ISO 898-2, whichever is relevant”.
