Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 23, Tractors and Machinery for Agriculture and Forestry, Subcommittee SC 14, Operator controls, operator symbols and other displays, operator manuals.

This fourth edition cancels://andlareplacesathe/sthird/sedition9(1S078600:1996), which has been technically revised. 696062d0b251/iso-3600-2015

Introduction

In the preparation of this International Standard, consideration has been given to the fact that manuals are expected to be available for both operators and service technicians. Operators need to have a manual, giving guidance for the correct use and routine basic service and preventive maintenance of the machine and its equipment and attachments. It is expected that such a manual be clear and simple to understand, that it contains warnings for foreseeable hazards as well as definitions of terms, and that the units, symbols, and pictorials used comply with the relevant International Standards.

Tractors, machinery for agriculture and forestry, powered lawn and garden equipment — Operator's manuals — Content and format

1 Scope

This International Standard specifies the content and gives guidance on the format of operator's manuals for tractors, machinery for agriculture and forestry, and powered lawn and garden equipment. It is intended to assist manufacturers of the machinery in the drafting and presentation of these manuals. Manuals intended for use by a service technician are not within the scope of this International Standard.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 11684, Tractors, machinery for agriculture and forestry, powered lawn and garden equipment — Safety signs and hazard pictorials of General principles RD PREVIEW

3 Terms and definitions (standards.iteh.ai)

For the purpose of this document, the following terms and definitions apply.

3.1 https://standards.iteh.ai/catalog/standards/sist/c7a39b53-7786-42ce-91e6-696062d0b251/iso-3600-2015

operator

person using the machine for the purpose intended by the manufacturer and complying with the information for operation, including safety practices, as specified by the manufacturer in the operator's manual and by signs on the machine

3.2

normal operation and service

use of the machine for the purpose intended by the manufacturer by an operator

3.3

service technician

person specifically trained to service, maintain, diagnose problems, and repair the machine

4 Content of operator's manuals

4.1 Basic information

4.1.1 General

The information specified in 4.1.2 through 4.1.9 shall be included as appropriate and applicable to the machine. It is recommended that the information be presented in the order shown in 4.1.2 through 4.1.9 but deviations may be made to suit particular machines or situations.

4.1.2 Identification of manual

4.1.2.1 The following information shall be shown on the front cover:

ISO 3600:2015(E)

- name or type of publication;
- model number, model name, or type designation of machine.
- **4.1.2.2** The following information shall be provided:
- manufacturer or distributor of machine, including contact information;
- part number or publication number by which the manual can be ordered;
- printing or publication date, or revision level or a publication code, that can be used to identify the publication date or revision level.

4.1.3 Contents

- **4.1.3.1** Table of contents shall list, as a minimum, the main sections of the manual with the page number of the first page of each section.
- **4.1.3.2** Contents list of each main section, if applicable, shall be included in the table of contents or at the beginning of the section to which the contents list applies, or both.

4.1.4 Identification of machine

The following information shall be included:

ANDARD PREVIEW

- model designations of the machines to which the manual applies;
 standards.iten.ai
- serial numbers, serial number range, or beginning serial number of the range to which the manual applies, as appropriate;
- description, either by words of pictorially, or both, of the location of serial numbers of the machine and of serialized components;
- spaces to record serial numbers pertaining to the particular machine the manual accompanies.

4.1.5 Introduction

The following information shall be included:

- statement of the importance of the information given in the manual and the necessity for all operators to read the manual and to understand the information contained in the manual;
- information regarding the functions for which the machine is designed (intended use);
- any information to aid the correct interpretation of the information given in the manual;
- information regarding sources of assistance in understanding the information given in the manual and other concerns regarding operation of the machine.

4.1.6 Safety information

4.1.6.1 Safety alert symbol

Attention shall be drawn to the use of the safety alert symbol, in the manual and on the machine, to highlight information about potential safety concerns. The meaning of the safety alert symbol shall be included in the manual.

The safety alert symbol shall be either the solid background version, or the outline version, as shown in ISO 11684.

4.1.6.2 Signal words

The meaning of signal words (DANGER, WARNING, CAUTION, etc.), if used in conjunction with safety messages in the manual and on safety signs on the machine, shall be explained. The meaning of other signal words not associated with safety messages, such as NOTE and IMPORTANT, shall also be explained, if used in the manual.

4.1.6.3 Safety messages

Information shall be given regarding hazards and precautions to be taken to avoid or minimize the effect of hazards associated with the following aspects of machine use, as applicable:

- preparation for use;
- normal operation and service;
- clearing blockages and cleaning;
- transport;
- maintenance and adjustment;
- storage.

Safety messages that are specific to particular hazards shall appear in the pertinent sections of the manual and shall precede the functional instructions to which they apply. These messages may also be included in the safety section.

4.1.6.4 Safety signs

(standards.iteh.ai)

Information shall be provided regarding all safety signs that are affixed to the machine. This information shall include the following ndards.iteh.ai/catalog/standards/sist/c7a39b53-7786-42ce-91e6-

- 696062d0b251/iso-3600-2015
 reproduction of the safety signs, in legible size;
- location of the safety signs on the machine;
- explanation of the meaning of the safety signs, in particular if the safety sign does not contain a written message.

In addition, the following information should be provided:

- instruction to keep the safety signs clean and visible;
- instruction to replace safety signs, if they are missing or illegible;
- instruction regarding affixing safety signs to replacement parts, as applicable;
- information on how to obtain replacement safety signs.

4.1.7 Operation

4.1.7.1 Controls and displays

Illustrations and descriptions shall be provided for all controls and displays, including

- location relative to the operator's position,
- purpose, function, and mode of operation, and
- explanation of any symbols used.
