This European Standard was approved by CENELEC on 2019-09-25. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

EN IEC 63052:2021 (E)**European foreword**

The text of document 23E/1131/FDIS, future edition 1 of IEC 63052, prepared by SC 23E "Circuit-breakers and similar equipment for household use" of IEC/TC 23 "Electrical accessories" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 63052:2021.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2022-02-20
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2024-08-20

This document supersedes EN 50550:2011 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a Standardization Request given to CENELEC by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s) / Regulation(s).

For relationship with EU Directive(s) / Regulation(s), see informative Annex ZZ, which is an integral part of this document.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

Annex ZZ (informative)

Relationship between this European standard and the safety objectives of Directive 2014/35/EU [2014 OJ L96] aimed to be covered

This European Standard has been prepared under a Commission's standardization request relating to harmonized standards in the field of the Low Voltage Directive, M/511, to provide one voluntary means of conforming to safety objectives of Directive 2014/35/EU of the European Parliament and of the Council of 26 February 2014 on the harmonisation of the laws of the Member States relating to the making available on the market of electrical equipment designed for use within certain voltage limits [2014 OJ L96].

Once this standard is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of this standard given in Table ZZ.1 confers, within the limits of the scope of this standard, a presumption of conformity with the corresponding safety objectives of that Directive, and associated EFTA regulations.

Table ZZ.1 — Correspondence between this European standard and Annex I of Directive 2014/35/EU [2014 OJ L96]

Safety objectives of Directive 2014/35/EU	Clause(s) / sub-clause(s) of this EN	Remarks / Notes

(3) (c)	8.8, 9.11, Annex C	

WARNING 1 — Presumption of conformity stays valid only as long as a reference to this European standard is maintained in the list published in the Official Journal of the European Union. Users of this standard should consult frequently the latest list published in the Official Journal of the European Union.

WARNING 2 — Other Union legislation may be applicable to the product(s) falling within the scope of this standard.

Figure 1 – Thread forming tapping screw.....	74
Figure 2 – Thread cutting tapping screw.....	74
Figure 3 – Standard test finger (see 9.6).....	75
Figure 4 – Typical diagram for all short circuit tests except for the verification of the suitability in IT systems.....	76
Figure 5 – Typical diagram for the verification of the suitability in IT systems.....	77
Figure 6 – Detail of impedance Z, Z ₁ and Z ₂ in Figure 4 and Figure 5	77
Figure 7 – Example of calibration record for short-circuit test (see 9.11.2.2 j))	79
Figure 8 – Mechanical shock test apparatus (see 9.12.1).....	80
Figure 9 – Mechanical impact test apparatus (see 9.12.2).....	81
Figure 10 – Striking element for pendulum impact test apparatus (see 9.12.2).....	82
Figure 11 – Mounting support for sample for mechanical impact test (see 9.12.2).....	83
Figure 12 – Example of mounting of unenclosed POPs for mechanical impact test (see 9.12.2).....	84
Figure 13 – Example of mounting of panel mounting type POPs for mechanical impact test (see 9.12.2)	85
Figure 14 – Application of force for mechanical test of rail mounted POPs (see 9.12.2)	86
Figure 15 – Ball-pressure test apparatus (see 9.13.2).....	86
Figure 16 – Surge current impulse 8/20 µs.....	87
Figure 17 – Test circuit for the surge current test.....	87
Figure 18 – Example of test circuit for verification of ageing of electronic components (see 9.17)	88
