

# Standard Specification for Coded Values Used in the Electronic Health Record<sup>1</sup>

This standard is issued under the fixed designation E1633; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

## 1. Scope\*

1.1 This specification covers the identification of the lexicons to be used for the data elements identified in Appendix X1 of Guide E1384. It is intended to unify the representations for: (1) primary record of care data elements, (2) the data elements identified in other standard statistical data sets, (3) data elements used in other healthcare data message exchange format standards, or (4) in data gathering forms for this purpose, and (5) in data derived from these elements in order that data recorded in the course of patient care be exchangeable and be the source of accurate statistical and resource management data. This specification is applicable to all paper and automated systems.

## 3. Terminology

### 3.1 Acronyms:

3.1.1 NCHS—National Center for Health Statistics

3.1.2 NCVHS—National Committee for Vital and Health Statistics

3.1.3 NOS—not otherwise specified

## 4. Significance and Use

4.1 *Purpose*—The approval of Guide E1384, concerned with the structure and content of the computer-based patient record, now includes a formal indexing of data elements and a cataloging of the minimal essential value set for these elements. Indexing of these data elements with a unique identifier keyed to its position in the logical structure of Appendix X1 of Guide E1384 now provides a means of cataloging the value sets representing each data element (see Guide E1384). Specification E1238, coordinated with Guide E1239, describes conventions for representing many of the data values for data elements that are included in the more comprehensive listing in Guide E1384. A comprehensive listing of all of the value sets associated with Guide E1384 has not yet been assembled. This specification begins to catalog the representation conventions for a number of these elements and in particular to list the coded values. It is important that this catalog consider the traditionally assigned representations for each of these elements, and it must resolve differences in a manner that introduces systematics and consistency into the representation. The catalog must establish both a global framework consistent with international standardization and with long-term growth, while at the same time maximizing familiar or traditional representations. This standard has been developed with input

<sup>5</sup> Available from Health Level 7, Mark McDougall, Executive Director, 900 Victors Way, Suite 122, Ann Arbor, MI 48108.

\*A Summary of Changes section appears at the end of this standard

from many organizations, including government agencies and other standards bodies and professional associations, and as a result of the effort to achieve consistency and comprehensiveness among the data dealt with by various standards efforts.

4.2 *General Values*—Early in the coordination of healthcare information standards an informal body, the Healthcare Information Standards Coordinating Committee (HISCC), identified certain common data element types and agreed upon conventions for representing these data element types in a standard manner. This set the stage for the development of the value sets for the CODED VALUE data type. The status of the standard noncoded data types, and their representations, agreed upon by the HISCC are:

4.2.1 *Person Names*— Specification **E1238**, Guide **E1239**, Practice **E1715**, Practice **E1744**, and HL-7 use the same representation for American and European forms.

4.2.2 *Addresses*—Common format in Specification **E1238**, Guide **E1239**, Practice **E1715**, and Practice **E1744**. **E1239**.

4.2.3 *Telephone Numbers*—Specification **E1238** and Guide **E1239** currently use the same representation with area code enclosed in parentheses and country code preceding the parentheses.

4.2.4 *Dates*—Date and time represented as ANS X3.51-1986/ISO 8601-1988 with years in four digits; time not separated from date by “T” as permitted by ISO 8601.

4.2.5 *Numbers*—Numbers are represented either as integers or fixed point numbers; exponential notation not presently accepted in Specification **E1238**, Guide **E1239**, or HL-7. Units of Measure by ISO 2955-1983 or ANS X3.50-86.

4.2.6 *Strings*—7-bit ASCII characters; multilingual character sets not yet defined.<sup>6</sup>

## 5. Assignment of Coded Values

5.1 The major important data elements in Guide **E1384** having coded data types and the current status of the cataloging of their values are:

|             |   |
|-------------|---|
| 01035       | Patient Multiple Birth code (5.2.23)      |
| 01040       | Sex (5.2.20)                              |
| 01042       | Biogeographic Ancestry (Race) (5.2.3)     |
| 01045       | Ethnicity (5.2.4)                         |
| 01047       | Religion (5.2.7)                          |
| 01052       | Marital status (5.2.2)                    |
| 01055       | Nationality/Country of Origin (5.2.6)     |
| 01057       | Language (5.2.5)                          |
| 01060       | Educational Level (5.2.8)                 |
|             | Educational Certification (5.2.9)         |
| 01062       | Current Work Status (5.2.24)              |
| 01065       | Occupation (5.2.11) also 01070,01090.03   |
| 01067       | Current Vocational Status (5.2.25)        |
| 01085       | Usual Living arrangement (5.2.26)         |
| 01099       | Foreign Residency Code (5.2.27)           |
| 01090.03    | Family Relationship (5.2.10)              |
| 01155       | Color Eyes (5.2.38)                       |
| 01160       | Color Hair (5.2.39)                       |
| 01175       | Body Build for Identification (5.2.40)    |
| 02052       | Durable Power of Attorney Status (5.2.28) |
| 06001.01.15 | Immunization reaction/result (5.2.63)     |
| 04001.50    | Professional Specialty (5.2.16)           |
| 08005       | Birth method (5.2.64)                     |
| 08095       | Health History Response (5.2.76)          |

<sup>6</sup> The boldface numbers in parentheses refer to the list of references at the end of this standard.

|               |  |
|---------------|--|
| 09001.12      | Body System/Region (5.2.22)                        |
| 09001.13      | Exam Finding (5.2.77)                              |
| 09001.30      | Tooth ID (5.2.74)                                  |
| 09001.30.05   | Tooth Surface (5.2.75)                             |
| 09001.30.06   | Tooth Sensitivity Code (5.2.65)                    |
| 09001.30.07   | Tooth Mobility Code (5.2.66)                       |
| 09001.40.1    | Prosthesis Type (5.2.67)                           |
| 11001.01.24   | Test Specimen Source (5.2.68)                      |
| 14001.A002    | Patient (Encounter) Type/Admission Source (5.2.17) |
| 14001.A004    | Confidentiality Status (5.2.1)                     |
| 14001.A010    | Encounter Status (5.2.69)                          |
| 14001.A013    | Facility Care/Healthcare setting (5.2.18)          |
| 14001.A016    | Reason for Visit (5.2.19)                          |
| 14001.A020    | Encounter patient Arrival Condition (5.2.70)       |
| 14001.A021    | Mode of Arrival (5.2.29)                           |
| 14001.A030    | Nature of Injury (5.2.30)                          |
| 14001.A033    | Mode of Injury (5.2.31)                            |
| 14001.A034    | Product of Injury (5.2.37)                         |
| 14001.A040    | Injury On the Job Status (5.2.71)                  |
| 14001.A044    | Protective Equipment Used (5.2.32)                 |
| 14001.A063    | Patient Admission Type (5.2.12)                    |
| 14001.A110    | Professional Specialty (5.2.16)                    |
| 14001.A133    | Accommodation type (5.2.15)                        |
| 14001.A163.01 | Patient In-residence Transfer Type (5.2.13)        |
| 14001.A170    | Diagnosis (5.2.33)                                 |
| 14001.A170.01 | Diagnosis Type (5.2.34)                            |
| 14001.A170.02 | Diagnosis Status Code (5.2.35)                     |
| 14001.A186.01 | Current Clinical Status (5.2.36)                   |
| 14001.A206    | Police Hold Status (5.2.72)                        |
| 14001.A213    | Medical Examiner Notification Code (5.2.73)        |
| 14001.A223    | Source of Payment Code (5.2.21)                    |
| 14001.F050    | Discharge Disposition Category (5.2.14)            |

This standard identifies the current value list for each of these elements as of the approval date of this standard (see footnote 1) and states the evolving status of this catalog as the knowledge of the use of these elements expands as a result of ongoing investigation. Each element is identified by the index assigned to it in the revised Appendix X1 of Guide **E1384**. Moreover, the definition for that element from the Data Element Catalog (5) is included with the value set.

5.2 *Value Set Tables*—These tables collect the representation of coded data values for specific data elements in computer-based patient record structures identified in Appendix X1 of Guide **E1384**. The terms listed here are the minimal essential ones but may be further subclassified to include more specific terms by appropriate extensions of the included terms.

5.2.1 *Confidentiality Status*—This data element, Index: 14001.A004, contains the minimal commonly used values appearing in both manual and automated systems. See Specification **E1238**.

|                      |     |
|----------------------|-----|
| Unwed mother         | UWM |
| Celebrity            | VIP |
| Psychiatric patient  | PSY |
| Employee             | EMP |
| AIDS patient         | AID |
| HIV patient          | HIV |
| Alcohol/Drug patient | ETH |
| Usual control        | U   |
| Restricted           | R   |
| Very restricted      | V   |

5.2.2 *Marital Status*—This data element, Index: 01052, encompasses the values noted by Westermeyer (6), Bureau of Census, the VA DHCP system, the DoD CHCS system, the X12 835 Transaction Set (7), UB-82 (8), and used in common practice.

|               |   |
|---------------|---|

| Other                                   | O |
| Unreported                              | T |

**5.2.3 Biogeographic Ancestry** (previously stated as: *Race*)—This data element, Index: 01042, indicates the region of the world from which the patient’s ancestors came. This is a biologic attribute that very generally indicates possible biologic diversity to which the patient might be subject. Due to ambiguity inherent in the diversity of the large number of inherited attributes which might characterize such ancestry, other data elements of the care record will be required to assign full meaning to the value set recorded for this attribute. The name originates from recommendations in the genetics literature (Am J Hum Gent 77:519-532 2005). Therefore, utilization of these other attributes is strongly recommended. To be consistent with census data, the six values currently given in OMB Directive 15 are shown for relationship to the recommended new terms. New subcategories may be added as recommended by the genetics professional disciplines. The check digit for the code is calculated via program previously given in Specification **E1238** and shown in **Appendix X1**. Note that NOS in the term means “Not Otherwise Specified.”

| Proposed Term                                      | Code   | Present Term                      |

**5.2.4 Ethnicity**—In keeping with current demographic practice, this data element, Index: 01045, reflects the ethnic cultural group with which the patient identifies. Multiple selections may be made. Each value has associated with it an ancestral cultural origin tag that is most closely associated with the ancestral geographic origin of that cultural pattern. This tag does not signify the ancestral biologic characteristics of the individual which is recorded in other data elements of the record. See **Fig. 1**.

**5.2.5 Language**—This data element, Index 01058, is specified by the two character lower case code in ISO 639 Table 1. The upper case three character code, now in ISO balloting may be added in a future revision of this specification. The language symbol only is shown here, but an original name and French language name are available (see **Fig. 2** for list).

**5.2.6 Nationality/Country of Origin**—This data element, Index: 01055, Citizenship, is specified by ISO 3166. The two letter codes are shown here. A three letter and a numeric code exists for each entry. New entries may be added in the future.
