About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 14 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Glossary - std.iec.ch/glossary

More than 55 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

Contents

FOREWORD.....	13
Introduction	15
1 Scope	18
2 Normative references	18
3 Terms and definitions	18
4 Typographical conventions.....	20
4.1 Maturity model.....	20
4.2 Experimental maturity level	20
4.3 Implemented maturity level	20
4.4 Stable maturity level.....	21
4.5 Finalized maturity level.....	21
4.6 Deprecated Material.....	21
5 Storage Library Profile.....	23
5.1 Description	23
5.1.1 General.....	23
5.1.2 Instance Diagrams	23
5.1.3 System Level View	23
5.1.4 MediaAccessDevice-centric View	24
5.1.5 ChangerDevice-centric View	25
5.1.6 Physical View	25
5.1.7 StorageMediaLocation Instance Diagram	26
5.1.8 Durable Names and Correlatable IDs of the Profile	26
5.1.9 Media Library Indications	27
5.2 Health and Fault Management Considerations.....	36
5.3 Cascading Considerations	36
5.4 Supported Subprofiles and Packages	36
5.5 Methods of this Profile.....	36
5.6 Client Considerations and Recipes	36
5.6.1 Recipe Overview	36
5.6.2 Discover a Storage Media Library	36
5.6.3 Determine Library Physical Media Capacity.....	37
5.6.4 Determine Physical Media Inventory	37
5.6.5 Discover Storage Library Control Type	37
5.6.6 Determine Library Drive Capacity	37
5.6.7 Determine Drive Data Path Technology.....	37
5.6.8 Find asset Information.....	37
5.6.9 Discovery of Mailslots, Import/Export Elements or LimitedAccessPorts in a Storage Library.....	38
5.6.10 Counting assets in large storage libraries	38
5.7 Registered Name and Version	38
5.8 CIM Elements.....	38
5.8.1 General.....	38
5.8.2 CIM_ChangerDevice	47
5.8.3 CIM_Chassis	48
5.8.4 CIM_ComputerSystem	48
5.8.5 CIM_ComputerSystemPackage	49
5.8.6 CIM_ElementCapabilities	49
5.8.7 CIM_ElementSoftwareIdentity.....	50
5.8.8 CIM_MediaAccessDevice	50
5.8.9 CIM_PackagedComponent	50
5.8.10 CIM_PhysicalMedia.....	51
5.8.11 CIM_PhysicalMediaInLocation	51

5.8.12	CIM_ProtocolControllerForUnit	52
5.8.13	CIM_Realizes	52
5.8.14	CIM_SCSIProtocolController.....	52
5.8.15	CIM_SoftwareIdentity	53
5.8.16	CIM_StorageLibraryCapabilities.....	53
5.8.17	CIM_StorageMediaLocation	54
5.8.18	CIM_SystemDevice (System to Changer Device).....	54
5.8.19	CIM_SystemDevice (System to MediaAccessDevice)	54
5.8.20	CIM_SystemDevice (System to SCSIProtocolController)	55
6	Element Counting Subprofile.....	56
6.1	Description	56
6.1.1	General.....	56
6.1.2	Discovery.....	56
6.2	Health and Fault Management Considerations	56
6.3	Cascading Considerations	56
6.4	Supported Subprofiles and Packages.....	56
6.5	Methods of the Profile	56
6.5.1	GetClassTypes.....	56
6.5.2	GetUnitTypes	57
6.5.3	ReportCapacity.....	58
6.6	Client Considerations and Recipes	58
6.7	Registered Name and Version	59
6.8	CIM Elements.....	59
6.8.1	General.....	59
6.8.2	CIM_ConfigurationReportingService.....	60
6.8.3	CIM_HostedService	60
7	InterLibraryPort Connection Subprofile.....	61
7.1	Introductory remark.....	61
7.2	Description	61
7.3	Durable Names and Correlatable IDs	61
7.4	Health and Fault Management Considerations	62
7.5	Cascading Considerations	62
7.6	Supported Subprofiles and Packages.....	62
7.7	Methods of the Profile	62
7.8	Client Considerations and Recipes	62
7.9	Registered Name and Version	62
7.10	CIM Elements.....	62
7.10.1	General.....	62
7.10.2	CIM_InterLibraryPort.....	62
7.10.3	CIM_LibraryExchange.....	63
8	Library Capacity Subprofile	64
8.1	Description	64
8.2	Health and Fault Management Considerations.....	64
8.3	Cascading Considerations	64
8.4	Supported Subprofiles and Packages.....	64
8.5	Client Considerations and Recipes	64
8.6	Registered Name and Version	64
8.7	CIM Elements.....	65
8.7.1	General.....	65
8.7.2	CIM_ConfigurationCapacity	65
8.7.3	CIM_ElementCapacity.....	65
9	Limited Access Port Elements Subprofile.....	66
9.1	Description	66
9.1.1	General.....	66

INFORMATION TECHNOLOGY – STORAGE MANAGEMENT – Part 8: Media libraries

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees and ISO member bodies.
- 3) IEC, ISO and ISO/IEC publications have the form of recommendations for international use and are accepted by IEC National Committees and ISO member bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC, ISO and ISO/IEC publications is accurate, IEC or ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees and ISO member bodies undertake to apply IEC, ISO and ISO/IEC publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any ISO, IEC or ISO/IEC publication and the corresponding national or regional publication should be clearly indicated in the latter.
- 5) ISO and IEC do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. ISO or IEC are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or ISO or its directors, employees, servants or agents including individual experts and members of their technical committees and IEC National Committees or ISO member bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication of, use of, or reliance upon, this ISO/IEC publication or any other IEC, ISO or ISO/IEC publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC publication may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO/IEC 24775-8 was prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology.

This International Standard, together with ISO/IEC 24775-1 to ISO/IEC 24775-7, replaces ISO/IEC 24775, second edition, published in 2011, and constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) reorganization into eight parts;
- b) maturity identification using stages; and
- c) new profiles.

The list of all currently available parts of the ISO/IEC 24775 series, under the general title *Information technology – Storage management*, can be found on the IEC web site.

This International Standard has been approved by vote of the member bodies, and the voting results may be obtained from the address given on the second title page.
