Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

iTeh STANDARD PREVIEW
(standards.iteh.ai)

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found under http://webapp.etsi.org/key/queryform.asp.

8.4.1.7 Test requirement for PRACH with L_{RA}=1151 and L_{RA}=571....242

Annex A (normative): Reference measurement channels....244

A.1 Fixed Reference Channels for reference sensitivity level, ACS, in-band blocking, out-of-band blocking, receiver intermodulation and in-channel selectivity (QPSK, R=1/3)....244

A.2 Fixed Reference Channels for dynamic range (16QAM, R=2/3)....245

A.3 Fixed Reference Channels for performance requirements (QPSK, R=193/1024)....247

A.3A Fixed Reference Channels for performance requirements (QPSK, R=99/1024)....249

A.3B Fixed Reference Channels for performance requirements (QPSK, R=308/1024)....250

A.4 Fixed Reference Channels for performance requirements (16QAM, R=658/1024)....251

A.5 Fixed Reference Channels for performance requirements (64QAM, R=567/1024)....253

A.6 PRACH test preambles....255

A.7 Fixed Reference Channels for performance requirements (QPSK, R=157/1024)....255

Annex B (normative): Environmental requirements for the BS equipment....257

B.1 General....257

B.2 Normal test environment....257

B.3 Extreme test environment....257
B.3.1 Extreme temperature....257

B.4 Vibration....258

B.5 Power supply....258

B.6 Measurement of test environments....258

Annex C (informative): Test tolerances and derivation of test requirements....259

C.1 Measurement of transmitter....259

C.2 Measurement of receiver....261

C.3 Measurement of performance requirements....262

Annex D (informative): Measurement system set-up....265

D.1 *BS type 1-C* transmitter....265
D.1.1 Base station output power, output power dynamics, transmitter ON/OFF power, frequency error, EVM, unwanted emissions for BS type 1-C....265
D.1.2 Transmitter intermodulation for BS type 1-C....265
