1 Scope

This European Standard specifies the dimensions, tolerances and physical constants of drawn and/or descaled round steel bars used in aerospace construction.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 2030, *Aerospace series — Steel X105CrMo17 (1.3544) — Hardened and tempered — Bars — $D_e \leq 150 \text{ mm}$*

3 Materials

The materials are defined in the material standards and technical specification.

4 Required characteristics

The dimensions, tolerances, cross sectional areas and linear mass are defined in Figure 1 and Table 1.
