Intellectual Property Rights	10
Foreword.....	10
Modal verbs terminology.....	11
Introduction	11
1 Scope	12
2 References	12
2.1 Normative references	12
2.2 Informative references.....	14
3 Definition of terms, symbols and abbreviations.....	15
3.1 Terms.....	15
3.2 Symbols.....	17
3.3 Abbreviations	17
4 Requirements.....	20
4.0 General	20
4.1 Run time environment timing constraints	21
4.1.1 Abstract (informative).....	21
4.1.2 Background (informative).....	21
4.1.2.1 Use case - Network authentication.....	21
4.1.3 Requirements	21
4.1.4 Interaction with existing features (informative).....	21
4.2 Launch Application feature	22
4.2.1 Abstract (informative).....	22
4.2.2 Background (informative).....	22
4.2.3 Requirements	23
4.2.4 Interaction with existing features (informative).....	23
4.3 Mapped file support on the UICC.....	23
4.3.1 Abstract (informative).....	23
4.3.2 Background (informative).....	24
4.3.3 Requirements	24
4.3.4 Interaction with existing features (informative).....	24
4.4 Extension of logical channels.....	24
4.4.1 Abstract (informative).....	24
4.4.2 Background (informative).....	24
4.4.2.1 Typical problem situation	24
4.4.2.2 Possible problem solution	25
4.4.2.3 Use cases	25
4.4.2.3.1 Use case - JSR 177 applications	25
4.4.2.3.2 Use case - PC connection	25
4.4.3 Requirements	25
4.4.3.1 General requirements	25
4.4.3.2 Backward compatibility requirements.....	25
4.4.4 Interaction with existing features (informative).....	25
4.5 Secure channel to secure local terminal interfaces	25
4.5.1 Abstract (informative).....	25
4.5.2 Background (informative).....	26
4.5.2.0 General	26
4.5.2.1 Use case - User interface.....	26
4.5.2.2 Use case - UICC as a control point for device management.....	27
4.5.2.3 Use case - DRM and distributed applications	28
4.5.2.4 Use case - Toolkit commands protection	29
4.5.3 Requirements	30
4.5.3.0 General	30
4.5.3.1 End point requirements	30
4.5.3.2 Integrity requirements	30

4.5.3.3	Confidentiality requirements.....	30
4.5.3.4	Authentication requirements	31
4.5.3.5	Audit/Compliance requirements	31
4.5.3.6	Policy requirements.....	31
4.5.3.7	Transport Protocol requirements	31
4.5.4	Interaction with existing features (informative).....	31
4.5.4.1	Logical Channels.....	31
4.5.4.2	CAT access over a modem interface.....	31
4.6	Authenticate command longer than 255 bytes.....	31
4.6.1	Abstract (informative).....	31
4.6.2	Background (informative).....	32
4.6.2.1	Use case - EAP packet exchange	32
4.6.3	Requirements	32
4.6.3.1	General requirements	32
4.6.3.2	Backward compatibility requirements.....	32
4.6.4	Interaction with existing features (informative).....	32
4.7	CAT mechanisms to indicate the bearer connection status	32
4.7.1	Abstract (informative).....	32
4.7.2	Background (informative).....	32
4.7.2.1	Use case - Availability of network bearers	32
4.7.2.2	Use case - Network connection temporarily lost.....	33
4.7.2.3	Use case - Availability of local bearers.....	33
4.7.3	Requirements	33
4.7.3.1	Requirement 1 - Network bearer connection status	33
4.7.3.2	Requirement 2 - Local bearer connection status	33
4.7.4	Interaction with existing features (informative).....	33
4.8	New UICC-Terminal interface.....	33
4.8.1	Abstract (informative).....	33
4.8.2	Background (informative).....	34
4.8.2.0	General	34
4.8.2.1	Use case - Multimedia file management.....	34
4.8.2.2	Use case - MMI on UICC.....	34
4.8.2.3	Use case - Real-time multimedia data encryption/decryption.....	34
4.8.2.4	Use case - Storage of terminal applications on the UICC.....	34
4.8.2.5	Use case - Direct and indirect UICC connection to a PC.....	34
4.8.2.6	Use case - Web server on Smart Card.....	35
4.8.2.7	Use case - Antivirus on UICC.....	35
4.8.2.8	Use case - Big phonebook management from the UICC.....	35
4.8.2.9	Use case - Reduce personalization time.....	35
4.8.2.10	Use case - generic TCP/IP connectivity.....	35
4.8.3	Requirements	36
4.8.3.1	General requirements	36
4.8.3.2	Backward compatibility requirements.....	36
4.8.4	Interaction with existing features (informative).....	37
4.9	UICC based application acting as a server	37
4.9.1	Abstract (informative).....	37
4.9.2	Background (informative).....	37
4.9.3	Requirements	37
4.9.4	Interaction with existing features (informative).....	37
4.10	API for applications registered to a Smart Card Web Server	37
4.10.1	Abstract (informative).....	37
4.10.2	Background (informative).....	38
4.10.2.0	General	38
4.10.2.1	Registration of an application to the SCWS.....	38
4.10.2.2	Data exchange between SCWS and application.....	38
4.10.2.3	Issuing Proactive Commands	38
4.10.3	Requirements	38
4.10.4	Interaction with existing features (informative).....	39
4.11	Specific UICC environmental conditions.....	39
4.11.1	Abstract (informative).....	39
4.11.2	Background (informative).....	39
4.11.2.0	General	39

4.11.2.1	Use case - Automotive service	39
4.11.2.2	Use case - Remote monitoring camera.....	39
4.11.2.3	Use case - Remote stock monitoring for vending machines	39
4.11.2.4	Use case - Online electronic advertising board	39
4.11.3	Considerations (informative)	39
4.11.4	Requirements	40
4.11.4.1	Requirement 1: Temperature range	40
4.11.4.2	Requirement 2: Humidity.....	40
4.11.5	Interaction with existing features (informative).....	40
4.12	Introduction of high density memory technology in UICC.....	40
4.12.1	Abstract (informative).....	40
4.12.2	Background (informative).....	40
4.12.2.1	Use case - Enhanced UICC features.....	40
4.12.3	Requirements	41
4.12.4	Interaction with existing features (informative).....	41
4.13	Power supply indication mechanism	41
4.13.1	Abstract (informative).....	41
4.13.2	Background (informative).....	41
4.13.2.1	Use case - Generic situation	41
4.13.2.2	Use case - USIM application with toolkit applications	42
4.13.3	Requirements	42
4.13.3.1	General Requirements	42
4.13.3.2	Backward compatibility requirements.....	42
4.13.4	Interaction with existing features (informative).....	42
4.14	Internet Connectivity up to UICC applications	42
4.14.1	Abstract (informative).....	42
4.14.2	Use Cases (informative).....	43
4.14.2.0	General	43
4.14.2.1	Use Case - Card OTA management	43
4.14.2.2	Use Case - User local access from the terminal to a card server.....	43
4.14.2.3	Use Case - Remote access to an identity server in the card	44
4.14.2.4	Use Case - User access from a locally connected device to a card service	44
4.14.3	Requirements	44
4.14.4	Interaction with existing features (informative).....	44
4.15	Contactless UICC services	44
4.15.1	Abstract (informative).....	44
4.15.2	Background (informative).....	44
4.15.2.0	General	44
4.15.2.1	Use case - Access	45
4.15.2.1.1	System aspects of use case	45
4.15.2.1.2	UICC role in use case	45
4.15.2.2	Use case - Tickets	46
4.15.2.2.0	General	46
4.15.2.2.1	System aspects of throughput ticketing scenario	47
4.15.2.2.2	System aspects of high priced ticketing scenario	47
4.15.2.2.3	UICC role in use case	47
4.15.2.3	Use case - Digital rights	48
4.15.2.3.1	System aspects of contactless digital rights	48
4.15.2.3.2	UICC role in use case	49
4.15.2.4	Use case - Payment application.....	49
4.15.2.5	Use case - Loyalty application	50
4.15.2.6	Use case - Health care application	51
4.15.2.7	Use case - Retail.....	51
4.15.2.7.1	System aspects of the use case	51
4.15.2.7.2	UICC role in the use case	51
4.15.2.8	Consideration about multiple applications in peer to peer mode	52
4.15.2.8.1	System aspects of multiple applications in peer to peer mode	52
4.15.2.8.2	Service discovery in peer to peer mode	52
4.15.2.8.3	Application connection in peer to peer mode	52
4.15.2.8.4	Customer care in peer to peer mode	52
4.15.2.9	Considerations about the P2P technology	52
4.15.2.10	Consideration about multiple HCI Hosts in card emulation mode.....	53

4.15.3	Requirements	54
4.15.3.1	Physical interface requirements	54
4.15.3.2	Multi-protocol concurrent operation requirements	54
4.15.3.3	Contactless communication modes requirements	54
4.15.3.4	Compatibility with existing contactless systems requirements	54
4.15.3.5	Parameters to be transported by the CLFIP requirements	54
4.15.3.6	Application integration requirements	55
4.15.3.7	Terminal and user interaction requirements	55
4.15.3.8	Interoperability requirements	55
4.15.3.9	RFID requirements	56
4.15.3.10	P2P mode requirements	56
4.15.3.10.1	General P2P requirements	56
4.15.3.10.2	P2P application management requirements	57
4.15.4	Interaction with existing features (informative)	58
4.16	Administration of the Smart Card Web Server	58
4.16.1	Abstract (informative)	58
4.16.2	Background (informative)	58
4.16.3	Requirements	58
4.16.4	Interaction with existing features (informative)	58
4.17	Confidential Application Services	58
4.17.1	Abstract (informative)	58
4.17.2	Background (informative)	59
4.17.2.1	Use case 1: Mobile TV services	59
4.17.2.2	Use case 2: Banking Services	60
4.17.2.3	Use case 3: Contactless Applications	61
4.17.2.4	Use case 4: Mobile Virtual Network Operator services	62
4.17.3	Requirements	63
4.17.3.0	General	63
4.17.3.1	Confidential application environment	63
4.17.3.2	Administration by Card issuer	63
4.17.3.2.1	Third party area environment administration	63
4.17.3.2.2	Third party area creation	64
4.17.3.2.3	Third party area policy definition	64
4.17.3.3	Administration by Third party	64
4.17.3.4	Service Operator specific requirements	65
4.17.4	Interaction with existing features (informative)	65
4.18	UICC for Machine-to-Machine (M2M) applications	65
4.18.1	Abstract (informative)	65
4.18.2	Use Cases (informative)	66
4.18.2.1	Use case - Track and Trace	66
4.18.2.1.0	General	66
4.18.2.1.1	Use case - Emergency Call	66
4.18.2.1.2	Use case - Fleet Management	67
4.18.2.1.3	Use case - Theft Tracking	67
4.18.2.2	Use case - Monitoring	68
4.18.2.2.0	General	68
4.18.2.2.1	Use case - Metering/Prepaid delivery of utilities (water, gas, electricity)	68
4.18.2.2.2	Use case - Person/Animal protection	69
4.18.2.2.3	Use case - Object protection	69
4.18.2.3	Use case - Transaction	70
4.18.2.3.1	Use case - PoS Terminals (Point of Sale Terminals)	70
4.18.2.4	Use case - Control	70
4.18.2.4.1	Use case - Controlling vending machines	70
4.18.2.4.2	Use case - Controlling production machines	71
4.18.3	Requirements	71
4.18.3.0	General	71
4.18.3.1	General M2M UICC Requirements	71
4.18.3.1.0	General	71
4.18.3.1.1	Specific requirements related to definition of classes	72
4.18.3.1.2	Example for a possible class system (informative)	72
4.18.3.2	MFF Requirements	72
4.18.4	Interaction with existing features (informative)	73

4.19	Location based services for broadcast technology	73
4.19.1	Abstract (informative).....	73
4.19.2	Use Cases (informative).....	73
4.19.3	Requirement for retrieving location information for broadcast technology.....	73
4.19.4	Interaction with existing features (informative).....	73
4.20	Terminals with reduced functionality.....	74
4.20.1	Abstract (informative).....	74
4.20.2	Use case (informative).....	74
4.20.2.1	Use case - Data card.....	74
4.20.3	Requirements	74
4.20.4	Interaction with existing features (informative).....	74
4.21	Digital Rights Management.....	74
4.21.1	Abstract (informative).....	74
4.21.2	Use cases (informative)	74
4.21.2.0	General.....	74
4.21.2.1	Use case - Transfer of protected contents and rights by using a UICC.....	75
4.21.2.2	Use case - Provisioning of rights in the UICC	75
4.21.2.3	Use case - Direct rendering of DRM-protected content by using the UICC	75
4.21.2.4	Use case - Pre-loading of rights by using the UICC	75
4.21.3	Requirements	75
4.21.4	Interaction with existing features (informative).....	76
4.22	Multicast dataflow in UICC	76
4.22.1	Abstract (informative).....	76
4.22.2	Use cases (informative)	76
4.22.2.1	Use case - Broadcast data services.....	76
4.22.2.2	Use case - Mobile TV related services.....	76
4.22.3	Requirement for multicast dataflow (subscription and dataflow reception)	77
4.22.4	Interaction with existing features (informative).....	77
4.23	New type of data storage and access.....	77
4.23.1	Abstract (informative).....	77
4.23.2	Background (informative).....	77
4.23.2.0	General	77
4.23.2.1	Use case - Taking a picture from the terminal, storing it on the UICC and retrieving it.....	77
4.23.2.2	Use case - Storing and protecting data through operator portal.....	78
4.23.2.3	Use case - Storing a service description.....	78
4.23.2.4	Use case - Managing multimedia content via UICC to a remote server.....	78
4.23.2.5	Use case - Partitioning UICC memory.....	78
4.23.2.6	Use case - UICC content depending on user authentication	78
4.23.2.7	Use case - Migration to a USB UICC without ICCD class	78
4.23.3	Requirements	78
4.23.3.1	Data storage and structure requirements	78
4.23.3.2	Data protection requirements	79
4.23.3.3	Local and remote access requirements	79
4.23.4	Interaction with existing features (informative).....	79
4.24	CAT access over a modem interface	79
4.24.1	Abstract (informative).....	79
4.24.2	Background (informative).....	80
4.24.2.0	General	80
4.24.2.1	Use case - Extending CAT to the connected entity capabilities.....	80
4.24.2.2	Use case - Using CAT for data acquisition and control in an M2M device.....	80
4.24.2.3	Use case - Addition of CAT support by adding a CAT extender device	81
4.24.3	Requirements	81
4.24.3.1	General requirements	81
4.24.3.2	Connected device registration requirements	81
4.24.3.3	Legacy support requirements	82
4.24.3.4	Extended support requirements.....	83
4.24.3.5	CAT over modem-client interface requirements.....	83
4.24.3.6	Connected entity termination requirements	84
4.24.3.7	Security requirements.....	84
4.24.4	Interaction with existing features (informative).....	84
4.25	UICC-Terminal applications and services over USB	84
4.25.1	Abstract (informative).....	84

4.25.2	Background (informative).....	85
4.25.2.1	Use case - Migration of existing services over IP	85
4.25.2.2	Use case - End-user interaction.....	85
4.25.2.3	Use case - Integration of UICC services into terminal user interface	85
4.25.2.4	Use case - Access status of communication services	85
4.25.2.5	Use case - Access to specific terminal hardware.....	86
4.25.2.6	Use case - Interaction between terminal and UICC applications	86
4.25.3	Requirements	86
4.25.3.1	General framework requirements.....	86
4.25.3.2	Framework service discovery and management requirements.....	87
4.25.3.3	Interaction between UICC and terminal applications requirements.....	87
4.25.3.4	Framework security requirements	87
4.25.3.5	User Interface requirements	88
4.25.3.6	Device interaction requirements.....	88
4.25.3.7	Network related requirements	88
4.25.3.8	Specific Services requirements	88
4.25.3.9	Backwards compatibility requirements.....	89
4.25.4	Interaction with existing features (informative).....	89
4.26	Integration of a UICC in a Mobile Broadband Notebook	89
4.26.1	Abstract (informative).....	89
4.26.2	Background (informative).....	89
4.26.2.1	Architecture considerations.....	89
4.26.2.2	Use cases	90
4.26.2.2.1	Authentication	90
4.26.2.2.2	Mass storage for MNO content	90
4.26.2.2.3	Mass storage for user content	90
4.26.2.2.4	Cryptographic services	91
4.26.2.2.5	Web services.....	91
4.26.2.2.6	Secure execution environment.....	91
4.26.2.2.7	Device Management.....	91
4.26.2.3	Security considerations	91
4.26.3	Requirements	92
4.26.3.1	Generic requirements.....	92
4.26.3.2	Security requirements.....	92
4.26.3.3	Security policy related requirements.....	92
4.26.4	Interaction with existing features (informative).....	92
4.27	Fourth UICC Form Factor	92
4.27.1	Abstract (informative).....	92
4.27.2	Background (informative).....	93
4.27.2.0	General	93
4.27.2.1	Use Case - Introduction of new devices that can support UICC	93
4.27.2.2	Use Case - Slimmer mobile devices.....	93
4.27.2.3	Use Case - Enhanced end user experience	93
4.27.3	Technical Solution Selection Criteria	93
4.27.4	Requirements	93
4.28	Name resolution mechanism for the UICC	94
4.28.1	Abstract (informative).....	94
4.28.2	Use Cases (informative).....	94
4.28.2.0	General	94
4.28.2.1	Use Case - Card OTA management	94
4.28.2.2	Use Case - Access to a payment server.....	94
4.28.3	Requirements	95
4.28.4	Interaction with existing features (informative).....	95
4.29	UICC Access Optimization	95
4.29.1	Abstract (informative).....	95
4.29.2	Background (informative).....	95
4.29.3	Requirements	95
4.30	Mechanism for monitoring the wear of a UICC.....	95
4.30.1	Abstract (informative).....	95
4.30.2	Use cases (informative)	96
4.30.2.1	Use case - Remote management of wear index information	96
4.30.2.2	Use case - New communication modules in cars	96

4.30.2.3	Use case - Automatic detection of memory defects	96
4.30.3	Requirements	96
4.31	Mechanism to suspend the UICC	96
4.31.1	Abstract (informative).....	96
4.31.2	Use cases (informative)	97
4.31.3	Requirements	97
4.31.3.1	Power requirements.....	97
4.31.3.2	Toolkit requirements	97
4.31.3.3	Security requirements.....	97
4.31.3.4	Backward compatibility requirements.....	97
4.32	UWB services.....	97

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™** and **LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

BLUETOOTH® is a trademark registered and owned by Bluetooth SIG, Inc.

ITEH STANDARD PREVIEW
(standards.iteh.ai)

Foreword

ETSI TS 102 412 V16.3.0 (2021-10)

<https://standards.iteh.ai/catalog/standards/sist/507588dd-d038-4330->

[a8dd-de67c2940259/etsi-ts-102-412-v16-3-0-2021-10](https://standards.iteh.ai/catalog/standards/sist/507588dd-d038-4330-a8dd-de67c2940259/etsi-ts-102-412-v16-3-0-2021-10)

This Technical Specification (TS) has been produced by ETSI Technical Committee Smart Card Platform (SCP).

The contents of the present document are subject to continuing work within TC SCP and may change following formal TC SCP approval. If TC SCP modifies the contents of the present document, it will then be republished by ETSI with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 0 early working draft;
 - 1 presented to TC SCP for information;
 - 2 presented to TC SCP for approval;
 - 3 or greater indicates TC SCP approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"must" and "must not" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Introduction

The present document specifies the requirements for Release 7 onwards of the TC SCP.

iTeh STANDARD PREVIEW
(standards.iteh.ai)

[ETSI TS 102 412 V16.3.0 \(2021-10\)](#)

<https://standards.iteh.ai/catalog/standards/sist/507588dd-d038-4330-a8dd-de67c2940259/etsi-ts-102-412-v16-3-0-2021-10>

1 Scope

The present document specifies the additional requirements for Release 7 onwards of the TC SCP with respect to earlier releases.

The present document covers all the Stage 1 requirements which are not covered by other TC SCP stage 1 documents.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

- In the case of a reference to a TC SCP document, a non specific reference implicitly refers to the latest version of that document in the same Release as the present document.

Referenced documents which are not found to be publicly available in the expected location might be found at <https://docbox.etsi.org/Reference/>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

- In the case of a reference to a TC SCP document, a non specific reference implicitly refers to the latest version of that document in the same Release as the present document.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

- [i.1] GSMA Pay Buy Mobile, Business Opportunity Analysis, Public White Paper, version 1.0, November 2007.

NOTE: Available at https://www.openmobilealliance.org/release/SRM/V1_0-20090310-A/OMA-TS-SRM-V1_0-20090310-A.pdf.

- [i.13] IETF RFC 2616: "Hypertext Transfer Protocol -- HTTP/1.1".

NOTE: Obsoleted by IETF RFC 7230, IETF RFC 7231, IETF RFC 7232, IETF RFC 7233, IETF RFC 7234 and IETF RFC 7235.

3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the following terms apply:

AT command interface: modem interface protocol specified in ETSI TS 127 007 [17]

card emulation mode: mode of operation where the UICC emulates a contactless card through the CLF

central repository: repository of registered applications residing in the UICC

chunked transfer-coding: mechanism that allows HTTP messages to be split in several parts as defined in IETF RFC 2616 [i.13]

ContactLess Front-end (CLF): circuitry in the terminal which:

- Handles the analog part of the contactless communication.
- May handle some layers of the contactless protocol.
- May exchange data with the terminal and the UICC.

CLF Interface (CLFI): physical interface between the UICC and the CLF

CLFI Protocol (CLFIP): communication protocol between the UICC and the CLF carried over the CLFI

DRM agent: entity in the Device that manages Permissions for Media Objects on the Device, as described in OMA SRM technical specification [i.12]

DRM agent-SRM agent mutual authentication: DRM Agent and the SRM Agent can authenticate each other based on credentials that are securely provisioned in each

NOTE: The result of this mutual authentication allows the DRM Agent and SRM Agent to establish a secure communication for the exchange and sharing of secret elements as described in the OMA SRM architecture specification [14].

external entity: entity that is external to the UICC and the modem; it can be the Mobile Broadband Notebook or a distant entity (e.g. a server)

HCI host: logical entity that operates one or more contactless service(s), as defined in ETSI TS 102 622 [19]

High Speed Protocol (HSP): running on top of the NUT interface

Host Controller Interface (HCI): HCI is a part of the implementation of CLFIP, as defined in ETSI TS 102 622 [19]

logical SE: SE functionalities, applications and files grouped together to act like a SE (e.g. UICC) when multiple logical SE interfaces are supported

Logical SE interface: logical connection between an endpoint in the terminal and one logical SE

M2M communication module: electronics system including all necessary components to establish wireless communications between machines

NOTE: M2M communication modules are usually integrated directly into target devices, such as Automated Meter Readers (AMRs), vending machines, alarm systems, car equipment or others.

M2M device applications: applications deployed on a machine to machine device that deliver a service to the UICC

MFF (M2M form factor): new form factor dedicated to M2M applications

M2M UICC: UICC with specific properties for use in M2M environments, this includes existing form factors and an optional new form factor
