

### Designation: D4035-95-Designation: D4035 - 02 (Reapproved 2008)

# Standard Performance Specification for Knitted Necktie and Scarf Fabrics<sup>1</sup>

This standard is issued under the fixed designation D 4035; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (\$\epsilon\$) indicates an editorial change since the last revision or reapproval.

#### 1. Scope

- 1.1 This performance specification covers knitted necktie and scarf fabrics composed of any textile fiber or mixture of textile fibers
- 1.2 These requirements apply to the length and width directions for those properties where fabric direction is pertinent.
- 1.3 The following precautionary statement pertains only to the test methods portion, Section 7, of this specification. This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

#### 2.3 Federal Standard:<sup>4</sup>

16 CFR 1610—Standard for Flammability of Clothing Textiles

Note 1—Reference to test methods in this specification give only the permanent part of the designation of ASTM, AATCC, or other test methods. The current editions of each test method cited shall prevail.

#### 3. Terminology

- 3.1 Definitions:
- 3.1.1 necktie—a decorative band of fabric worn around the neck and tied in a knot or a bow.
- 3.1.2 scarf—in apparel, an oblong or square piece of cloth worn for warmth or as a decorative item.
- 3.2 For definitions of textile terms used in this specification, refer to the individual ASTM and AATCC test methods and to Terminology D 123.

#### 4. Specification Requirements

4.1 The properties of fabrics for neckties and scarfs shall conform to the specification requirements in Table 1.

#### 5. Significance and Use

- 5.1 Upon mutual agreement between the purchaser and the seller, fabrics intended for this end use should meet all of the requirements listed in Table 1 of this specification.
- 5.2 It is recognized that for purposes of fashion or aesthetics the ultimate consumer of articles made from these fabrics may find acceptable fabrics that do not conform to all of the requirements in Table 1. Therefore, one or more of the requirements listed in Table 1 may be modified by mutual agreement between the purchaser and the seller.
- 5.2.1 In such cases, any references to the specification shall specify that: "This fabric meets ASTM Specification D 4035 except for the following characteristic(s)."

## iTeh Standards

#### **TABLE 1 Specification Requirements**

Note 1—Class for colorfastness and DP rating is based on a numerical scale of 5 for negligible or no color change, color transfer, or wrinkle to 1 for very severe color change, color transfer, or wrinkle. The numerical rating in Table 1 or a higher numerical rating is acceptable.
