This European Standard was approved by CENELEC on 2019-02-22. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

[SIST EN IEC 60947-7-4:2019](#)

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

EN IEC 60947-7-4:2019 (E)**European foreword**

The text of document 121A/255/FDIS, future edition 2 of IEC 60947-7-4, prepared by SC 121A "Low-voltage switchgear and controlgear" of IEC/TC 121 "Switchgear and controlgear and their assemblies for low voltage" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 60947-7-4:2019.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2019-11-22
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2022-02-22

This document supersedes EN 60947-7-4:2013.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

iTeh STANDARD PREVIEW
(standards.iteh.ai)

The text of the International Standard IEC 60947-7-4:2019 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60512-2-1	NOTE Harmonized as EN 60512-2-1
IEC 60512-5-1	NOTE Harmonized as EN 60512-5-1
IEC 60512-9-5:2010	NOTE Harmonized as EN 60512-9-5:2010 (not modified)
IEC 60664-1:2007	NOTE Harmonized as EN 60664-1:2007 (not modified)
IEC 60695-10-2	NOTE Harmonized as EN 60695-10-2
IEC 60695-11-5	NOTE Harmonized as EN 60695-11-5
IEC 60947-7-1:2009	NOTE Harmonized as EN 60947-7-1:2009 (not modified)
IEC 60998-1:2002	NOTE Harmonized as EN 60998-1:2004

INTRODUCTION.....	6
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	9
4 Classification.....	10
5 Characteristics	10
5.1 Summary of characteristics.....	10
5.2 Type of PCB terminal block.....	10
5.3 Rated and limiting values	10
5.3.1 Rated voltages	10
5.3.2 Rated current.....	11
5.3.3 Standard cross-sections	11
5.3.4 Maximum cross-section	12
5.3.5 Connecting capacity	12
6 Product information	13
6.1 Marking.....	13
6.2 Additional information	13
7 Normal service, mounting and transport conditions.....	13
8 Constructional and performance requirements.....	13
8.1 Constructional requirements.....	13
8.1.1 Clamping units.....	13
8.1.2 Mounting and installation	14
8.1.3 Clearances and creepage distances	14
8.1.4 Terminal identification and marking	14
8.1.5 Resistance to abnormal heat and fire.....	15
8.1.6 Maximum cross-section and connecting capacity	15
8.2 Performance requirements.....	15
8.2.1 Temperature-rise (current-temperature derating)	15
8.2.2 Dielectric properties.....	15
8.2.3 Short-time withstand current.....	15
8.2.4 Contact resistance.....	16
8.2.5 Ageing tests	16
8.3 Electromagnetic compatibility (EMC).....	16
9 Tests	16
9.1 Kinds of test.....	16
9.2 General.....	16
9.3 Verification of mechanical characteristics.....	17
9.3.1 General	17
9.3.2 Attachment of the PCB terminal block on its support.....	17
9.3.3 Vacant	18
9.3.4 Verification of the maximum cross-section and connecting capacity.....	18
9.3.5 Verification of maximum cross-section (special test with gauges)	18
9.4 Verification of electrical characteristics	19
9.4.1 General	19

9.4.2	Verification of clearances and creepage distances.....	19
9.4.3	Dielectric tests.....	19
9.4.4	Verification of contact resistance	20
9.4.5	Temperature-rise test (current-temperature derating)	22
9.4.6	Short-time withstand current test	24
9.4.7	Ageing tests	25
9.5	Verification of thermal characteristics.....	29
9.6	Verification of EMC characteristics.....	30
9.6.1	General	30
9.6.2	Immunity.....	30
9.6.3	Emission.....	30
Annex A (informative)	Structure of a PCB terminal block.....	31
Annex B (informative)	Additional information to be specified between the manufacturer and the user	32
B.1	Additional information available on request of the user	32
B.2	Information for testing in addition to those mentioned above	32
Annex C (informative)	Examples of PCBs and PCB terminal blocks for high-current application	33
C.1	Layout of high-current PCBs (schematic diagram).....	33
C.2	High-current PCB terminal blocks	34

INTERNATIONAL ELECTROTECHNICAL COMMISSION

LOW-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

**Part 7-4: Ancillary equipment –
PCB terminal blocks for copper conductors**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
<https://standards.iteh.ai/catalog/standards/sist/e17a03da-61f7-41b4-a9f1-2715b46d67ff/sist-en-iec-60947-7-4-2019>
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60947-7-4 has been prepared by subcommittee 121A: Low-voltage switchgear and controlgear, of IEC technical committee 121: Switchgear and controlgear and their assemblies for low voltage.

This second edition cancels and replaces the first edition published in 2013. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) additional test for PCB terminal blocks with clamping units, where contact pressure is transmitted through insulating materials;
- b) tightening torques for screws now given in Table 4 of this document (previously given in Table 4 of IEC 60947-1:2007); tightening torques added for an additional type of screw;
- c) new criteria for verification of contact resistance introduced;

- d) clarification in the description of the temperature-rise test (current-temperature derating); corrections in the test sequence according to Figure 4.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
121A/255/FDIS	121A/265/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60947 series, published under the general title *Low-voltage switchgear and controlgear*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
