ISO 6539:2014(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 34, *Food products*, Subcommittee SC 7, *Spices, culinary herbs and condiments*.

This third edition cancels and replaces the second edition (ISO 6539:1997), of which it constitutes a minor revision.

Cinnamon (*Cinnamomum zeylanicum* Blume) — Specification

1 Scope

This International Standard specifies requirements for whole or ground (powdered) cinnamon, of the Sri Lankan, Madagascan and Seychelles types; this cinnamon is the bark of the tree or shrub *Cinnamomum zeylanicum* Blume.¹⁾

Recommendations relating to storage and transport conditions are given in [Annex A](#).

NOTE Requirements for cassia (Chinese type, Indonesian type and Vietnamese type) are given in ISO 6538.^[4]

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 927, *Spices and condiments — Determination of extraneous matter and foreign matter content*

ISO 928, *Spices and condiments — Determination of total ash*

ISO 930, *Spices and condiments — Determination of acid-insoluble ash*

ISO 939, *Spices and condiments — Determination of moisture content — Entrainment method*

ISO 948, *Spices and condiments — Sampling*

ISO 1208, *Spices and condiments — Determination of filth*

ISO 2825, *Spices and condiments — Preparation of a ground sample for analysis*

ISO 6571, *Spices, condiments and herbs — Determination of volatile oil content (hydrodistillation method)*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1

cinnamon quill

full tube

scraped peel of the inner bark of mature plantation cinnamon shoots joined together by overlaps, the hollow of which has been filled with small pieces of the same peel and thereafter dried in the sun after air curing

3.2

cinnamon quilling

broken tube

broken piece and split of varying sizes of all grades of cinnamon quills

1) Other Latin names are *Cinnamomum verum* J. Presl; *Cinnamomum zeylnacum* Nees and *Laurus cinnamomum* L.

ISO 6539:2014(E)

3.3

cinnamon feathering

piece of inner bark, obtained by peeling and/or scraping the bark of small twigs and stalks of plantation cinnamon shoots, which may include a quantity of chips as specified

3.4

cinnamon chip

dried unpeelable bark of plantation cinnamon, inclusive of the outer bark, which has been obtained by beating or scraping the shoots

3.5

ground cinnamon

powder obtained by grinding cinnamon of the types considered in this International Standard, excluding all additives

3.6

whole cinnamon

all commercial forms of cinnamon except cinnamon powder

3.7

foxing

occurrence of reddish-brown patches on the surface of the quills, which may become dark brown with time

3.8

bale

package of any one particular grade of quills wrapped in a suitable material for export purposes

iTeh STANDARD PREVIEW
(standards.iteh.ai)

4 Types and classification

SIST ISO 6539:2018

<https://standards.iteh.ai/catalog/standards/sist/7204a275-4c40-4ade-9842-be7ad947c399/sist-iso-6539-2018>

4.1 Types

4.1.1 Sri Lankan type cinnamon

This is the dried bark of cultivated varieties of the species *Cinnamomum zeylanicum* Blume of the Lauraceae family.

Sri Lankan type cinnamon is produced in four forms:

- a) quills (see [3.1](#));
- b) quillings (see [3.2](#));
- c) featherings (see [3.3](#));
- d) chips (see [3.4](#)).

4.1.2 Seychelles type cinnamon

This is the bark of trunks or branches of *Cinnamomum zeylanicum* Blume, cultivated on the Seychelles.

Seychelles type cinnamon is produced in three forms:

- a) rough cinnamon bark, which consists of slightly curved, elongated, irregular, medium or small pieces of the whole unscraped bark;
- b) scraped cinnamon bark, which is obtained from younger shoots from bushes of the same species; the shoots are scraped with a curved knife before the bark is detached from the wood;

- c) quills and quillings, which are prepared from the young shoots, of bushes in a way similar to that used for Sri Lankan type cinnamon.

4.1.3 Madagascan type cinnamon

This is the bark of trunks or branches of *Cinnamomum zeylanicum* Blume, which grows wild on Madagascar. It is produced either

- a) in the form of simple, hollow tubes of unscraped or scraped bark, of rather coarse appearance, about 30 cm long, cut from smaller branches with a knife, or more usually
- b) in the form of unscraped or scraped pieces of bark from the larger branches and trunks, broken off with the flat side of a hatchet.

4.2 Commercial grades

4.2.1 Sri Lankan type cinnamon

4.2.1.1 Quills

For classification, see [Table 1](#).

4.2.1.2 Quillings

Quillings may contain up to 3 % (mass fraction) of featherings and chips.

4.2.1.3 Featherings

Featherings may contain up to 5 % (mass fraction) of chips.

4.2.1.4 Chips

Chips shall consist of well dried and unpeelable cinnamon bark.

4.2.2 Seychelles type and Madagascan type cinnamon

For classification, see [Table 2](#).

5 Ground cinnamon

Ground cinnamon shall consist solely of the types of cinnamon listed in [Clause 4](#).

If there is a designation of origin, the ground cinnamon should be prepared exclusively from the barks concerned.
