Supersedes EN 62790:2015 and all of its amendments and corrigenda (if any)

English Version

Junction boxes for photovoltaic modules - Safety requirements and tests (IEC 62790:2020)

Boîtes de jonction pour modules photovoltaïques -Exigences de sécurité et essais (IEC 62790:2020)

Anschlussdosen für Photovoltaik-Module -Sicherheitsanforderungen und Prüfungen (IEC 62790:2020)

This European Standard was approved by CENELEC on 2020-08-19. CENELEC members & bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the Matus of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards be obtained on application to the CEN-CENELEC

Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, Jeruan). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical continuities of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece Flurgian, Celand, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Mededonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. Turkey and the United Kingdom.

European foreword

The text of document 82/1719/FDIS, future edition 2 of IEC 62790, prepared by IEC/TC 82 "Solar photovoltaic energy systems" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 62790:2020.

The following dates are fixed:

- latest date by which the document has to be implemented at national (dop) 2021-05-19 level by publication of an identical national standard or by endorsement
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2023-08-19

This document supersedes EN 62790:2015 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

Endorsement notice and the property of the pro

The text of the International Standard IEC 62790;2020 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the tollowing notes have to be added for the standards indicated:

IEC 60112	NOTE	Hamiltonized as EN 60112
IEC 60228	NOTE	Harmonized as EN 60228
IEC 60512-1	NOTE	Harmonized as EN IEC 60512-1
IEC 60664-3	NOTE	Harmonized as EN 60664-3
IEC 60998-2-1	NOTE	Harmonized as EN 60998-2-1
IEC 60998-2-2	NOTE	Harmonized as EN 60998-2-2
IEC 61730-2	NOTE	Harmonized as EN IEC 61730-2

Annex ZA (normative)

Normative references to international publications with their corresponding European publications

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 Where an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: www.cenelec.eu.

Tall ST A THAT I A THE STANDARD STANDAR

INTERNATIONAL ELECTROTECHNICAL COMMISSION

JUNCTION BOXES FOR PHOTOVOLTAIC MODULES -SAFETY REQUIREMENTS AND TESTS

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and nongovernmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use accepted by IEC National Committees in that sense. While all reasonable efforts are made to entire that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the which they are used or for any misinterpretation by any end user.
- In order to promote international uniformity, IEC National Boundities undertake to apply IEC Publications transparently to the maximum extent possible in their platical and regional publications. Any divergence between any IEC Publication and the corresponding national regional publication shall be clearly indicated in the latter.
 IEC itself does not provide any attestation of conformity endependent certification bodies provide conformity assessment services and, in some areas, access to the marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- services carried out by independent certification bodies
- 6) All users should ensure that they have the latest contion of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and the National Committees for any personal injury, property damage or other damage of any nature whatsoe whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62790 has been prepared by IEC technical committee 82: Solar photovoltaic energy systems.

This second edition cancels and replaces the first edition published in 2014. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Modifications in normative references and terms and definitions;
- b) Improvement of declaration of categories for junction boxes in 4.1;
- c) Clarification for ambient temperature in 4.1;
- d) Addition of requirement to provide information concerning RTE/RTI or TI in 4.2;
- e) Reference to IEC 62930 instead of EN 50618 in 4.6;
- f) Addition of "Functional insulation" in Table 1;
