

Designation: F917-91 (Reapproved 2003) Designation: F 917 – 91 (Reapproved 2008)^{ε1}

Standard Specification for Commercial Food Waste Disposers¹

This standard is issued under the fixed designation F 917; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

This standard has been approved for use by agencies of the Department of Defense.

^{ε1} NOTE—Editorially corrected Footnote 4 in December 2008.

1. Scope

1.1 This specification covers commercial food waste disposers intended for the grinding of food waste.

3. Terminology

3.1 Definition:

3.1.1 *commercial food waste disposer*—intended for grinding food waste into small particles which are then flushed by water into a sanitary sewer system. Food wastes can be cooked or noncooked soils from the preparation or serving of foods. Disposers are not intended to be used for grinding glass, china, metals, clam or oyster shells, large bones, wood, paper, cardboard, or plastic. A disposer shall consist of the following principal parts: Motor, grind chamber, flywheel, shredder ring, hopper, leg(s) (see 7.12).

4. Classification

4.1 Commercial disposers shall be of the following types:

4.1.1 *Type I*—Cone.

4.1.2 *Type II*—Sink.

4.1.3 *Type III*—Trough mounted.

4.1.4 *Type IV*—Free standing.

4.1.5 *Type V*—Special.

4.2 Horsepowers and drain sizes shall be as specified in Table 1.

5. Ordering Information

5.1 Purchasers should select the preferred options and include the following information in purchasing document:

5.1.1 Title, number, and date of this standard.

5.1.2 Type, horsepower, and drain size required (see Section 4).

5.1.3 Electrical power supply characteristics (HP, voltage, phase, frequency).

5.1.4 Spare and maintenance parts required.

5.1.5 Control panel, manual, magnetic, special, or motor-reversing control, manual or automatic.

5.1.6 Accessory equipment as required, such as: water inlet(s), solenoid valve, vacuum breaker, flow control(s), silverware trap, and splash guard.

5.2 *Interchangeability of Items*—All disposers of the same model and material list designation furnished with similar options under a specific purchase order shall be identical to the extent necessary to ensure interchangeability of component parts, assemblies, accessories, and spare parts.

6. Materials and Design

6.1 All materials shall be as specified as follows:

6.1.1 Materials used shall be free from defects that would adversely affect the performance or maintenance ability of individual components of the overall assembly.

6.1.2 *Corrosion Resistant Steel*—Corrosion-resistant steel and heat resisting steel shall conform to the requirements of any 300 or 400 series steel specified in Specifications A 167, A 554, A 276, and A 582.

6.1.3 *Aluminum Alloy*—Aluminum alloy shall conform to the requirements specified in Specification B 108 or Specification B 26.

6.1.4 *Abrasion-Resistant Cast Iron*—Abrasion-resistant cast iron shall conform to the requirements specified in Specification A 532.

6.1.5 *Austenitic Gray Iron*—Austenitic gray iron shall conform to the requirements specified in Specification A 436.

6.1.6 *Copper Tube*—Copper tube used for water supply shall conform to the requirements specified in Specification B 75.

6.1.7 *Brass Pipe*—Brass pipe used for water supply shall conform to the requirements specified in Specification B 43.

6.1.8 *Alloy Steel*—Alloy steel shall conform to the requirements specified in Specification A 681 and Specification A 29.

6.1.9 *Black and Galvanized Pipe*—Black and galvanized pipe shall conform to the requirements specified in Specification A 120.

6.1.10 *Gaskets/Seals*—All gaskets and seals shall conform to the requirements specified in Specification D 2287, Specification D 2000, and Classification F 104.

7. Construction Requirements Construction Requirements

7.1 General:

7.1.1 The disposer shall be complete, ready for water, waste, and electrical connection; freestanding or with provision to mount to sink, or cone, or trough, or special support mount.

TABLE 1 Recommended Horsepower and Drain Size^A

Drain Size	Light Duty					Medium Duty			Heavy Duty		Flow Rate
	1/2	3/4	1	1 1/4	1 1/2	2	3	5	7	10	GPM
1 1/2 in. (3.81 cm)	X	X	X	X	X						5 (18.9 l/m)
2 in. (5.08 cm)				X	X	X	X	X			8 (30.3 l/m)
3 in. (7.62 cm)						X	X	X	X	X	10 (37.8 l/m)

^A More or less water may be used, depending on waste load, drain size, and configuration.
