DRAFT INTERNATIONAL STANDARD

ISO/DIS 21416

ISO/TC 228

Secretariat: UNE

Voting begins on:
2018-04-13Voting terminates on:
2018-07-06

Recreational diving services — Requirements and guidance on sustainable practices in recreational diving

Services relatifs à la plongée de loisirs — Exigences et lignes directrices relatives aux pratiques durables en matière de plongée de loisirs

ICS: 13.020.20; 03.080.30; 03.200.99

THIS DOCUMENT IS A DRAFT CIRCULATED FOR COMMENT AND APPROVAL. IT IS THEREFORE SUBJECT TO CHANGE AND MAY NOT BE REFERRED TO AS AN INTERNATIONAL STANDARD UNTIL PUBLISHED AS SUCH.

IN ADDITION TO THEIR EVALUATION AS BEING ACCEPTABLE FOR INDUSTRIAL, TECHNOLOGICAL, COMMERCIAL AND USER PURPOSES, DRAFT INTERNATIONAL STANDARDS MAY ON OCCASION HAVE TO BE CONSIDERED IN THE LIGHT OF THEIR POTENTIAL TO BECOME STANDARDS TO WHICH REFERENCE MAY BE MADE IN NATIONAL REGULATIONS.

RECIPIENTS OF THIS DRAFT ARE INVITED TO SUBMIT, WITH THEIR COMMENTS, NOTIFICATION OF ANY RELEVANT PATENT RIGHTS OF WHICH THEY ARE AWARE AND TO PROVIDE SUPPORTING DOCUMENTATION.

This document is circulated as received from the committee secretariat.

ISO/DIS 21416:2018(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 228, *Tourism and related services*.

Introduction

The diving community has a unique capability and therefore responsibility in observing and reporting on the condition of the aquatic environment. This document will elaborate on how the recreational diving community can make use of this capability while ensuring that full consideration is given to sustainable interaction with the aquatic environment. It provides guidance on how divers can positively affect the aquatic environment through activities such as underwater clean ups and marine surveys.

This document specifies best practice used to promote sustainable interactions with the aquatic environment. In diver training and diving activities divers must have an awareness of their environmental impact. This should include actively minimising any negative aspects. Such training should encourage awareness of positive actions.

Stakeholders that will benefit from this document are:

- divers and snorkellers;
- diving instructors and guides;
- dive centres, schools or clubs;
- dive boat operators;
- diver training organisations;
- tour operators offering diving holidays;
- governmental and other bodies seeking information on diving and the aquatic environment.
