Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 34, *Food products*, Subcommittee SC 11, *Animal and vegetable fats and oils*.

Animal and vegetable fats and oils — Determination of Lovibond® colour — Automatic method

AMENDMENT 1

Page 1, Clause 1

Replace the Scope with the following:

1 Scope

This International Standard specifies a method for the determination of Lovibond®¹⁾ colour of animal and vegetable fats and oils using automatic instrumentation.

The interlaboratory trials have shown that these instruments are not suitable for use with oils and fats with a colour intensity above 4 Lovibond® red units, for which the manual reference method, ISO 15305^[5], is applicable.

The trials also showed that these instruments are not suitable for sample with strong blue, green and brown hues, for which the manual reference method, ISO 15305^[5], is applicable.

Milk and milk products (or fat coming from milk and milk products) are excluded from the scope of this International Standard.

ISO 27608:2010/Amd 1:2016

1) Lovibond is the trade name of a colour scale developed and supplied by The Tintometer Ltd (www.tintometer.com). This information is given for the convenience of users of this document and does not constitute an endorsement by ISO of the product named. Equivalent products may be used if they can be shown to lead to the same results.
