EUROPEAN STANDARD
NORME EUROPÉENNE
EUROPÄISCHE NORM

DRAFT
prEN 12405-1

February 2019

ICS 91.140.40

Will supersede EN 12405-1:2018

English Version

Gas meters - Conversion devices - Part 1: Volume conversion

Compteurs de gaz - Dispositifs de conversion - Partie 1
: Conversion de volume

Gaszähler - Umwerter - Teil 1: Volumenumwertung

This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 237.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

[https://standards.iteh.ai/catalog/standards/sist/d01138d2-8b3c-4155-](https://standards.iteh.ai/catalog/standards/sist/d01138d2-8b3c-4155-88d4-627bdacc41a4/osist-pr-en-12405-1-2019)

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

F.8.3.1.1	Before the application of the perturbation.....	106
F.8.3.1.2	During the application of the perturbation.....	106
F.8.3.1.3	Error shift calculation.....	106
F.8.3.2	In/out connections.....	107
F.8.3.2.1	Before the application of the perturbation.....	107
F.8.3.2.2	During the application of the perturbation.....	107
F.8.3.2.3	Error shift calculation.....	107
F.9	Electromagnetic immunity.....	107
F.9.1	Ambient temperature during the test.....	107
F.9.2	Test equipment used.....	107
F.9.3	Test results.....	107
F.9.3.1	Before the application of the perturbation.....	107
F.9.3.2	During the application of the perturbation.....	108
F.9.3.3	Error shift calculation.....	109
F.10	Electrostatic discharges.....	109
F.10.1	Ambient temperature during the test.....	109
F.10.2	Test equipment used.....	109
F.10.3	Test results.....	109
F.10.3.1	Before the application of the perturbation.....	109
F.10.3.2	During the application of the perturbation.....	109
F.10.3.3	Error shift calculation.....	109
